Children are already
learning at birth, and they

develop and learn at a
rapid pace in their early
years. This provides a
critical foundation for
lifelong progress, and the
adults who provide for the
care and the education of
young children bear a
great responsibility for
their health, development,
and learning. Despite the

fact that they share the
same objective - to
nurture young children
and secure their future
success - the various
practitioners who
contribute to the care and
the education of children
from birth through age 8
are not acknowledged as
a workforce unified by the

common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and

the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care

and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional

practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Accounting in Australia (RLE Accounting)

American Philosophical Society

First Published in 1997.

Set in colonial Australia, this explanatory, investigative study examines the dimensions of accounting information prepared for pastoral industry engagement in the Western District of Victoria during 1836-1900 and the local, time-specific environmental factors which shaped

these dimensions. Based on examinations of surviving business records, the study provides evidence of the structure and usage of pastoral accounting information in an unregulated financial reporting environment. As an interpretive historical study, it attempts to provide explanations of the accounting practices observed.

Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business

fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

e emperor Nero is etched into the Western imagination as one of ancient Rome's most infamous villains, and Tacitus' Annals have played a central role in shaping the mainstream historiographical understanding of this flamboyant autocrat. This section of the text

plunges us straight into the moral cesspool that Rome had apparently become in the later years of Nero's reign, chronicling the emperor's fledgling stage career including his plans for a grand tour of Greece; his participation in a city-wide orgy climaxing in his publicly consummated 'marriage' to his toy boy Pythagoras; the great fire of AD 64, during which large parts of central Rome went up in flames; and the rising of Nero's 'grotesque' new palace, the so-called 'Golden

House', from the ashes of the city. This building project stoked the rumours that the emperor himself was behind the conflagration, and Tacitus goes on to present us with Nero's gruesome efforts to quell these mutterings by scapegoating and executing members of an unpopular new cult then starting to spread through the Roman empire: Christianity. All this contrasts starkly with four chapters focusing on one of Nero's most principled opponents, the Stoic senator Thrasea Paetus,

an audacious figure of moral fibre, who courageously refuses to bend to the forces of imperial corruption and hypocrisy. This course book offers a portion of the original Latin text, study aids with vocabulary, and a commentary. Designed to stretch and stimulate readers, Owen's and Gildenhard's incisive commentary will be of particular interest to students of Latin at both A2 and undergraduate level. It extends beyond detailed linguistic analysis

and historical background to encourage critical engagement with Tacitus' prose and discussion of the most recent scholarly thought.

"Fundamentals of Financial Accounting responds by using carefully chosen focus companies that students recognize and engage with in their everyday lives. From tech start-ups to some of the world's most familiar trademark brands, each chapter

opens with an engaging scenario or story using a familiar company. The same focus company, such as Walmart, Cedar Fair, American Eagle, National Beverage, Under Armour, or General Mills, is used throughout the entire chapter so that students can see how the concepts and calculations apply to a real-world company they are already familiar with"--

'American Book Publishing Record' Cumulative Pearson Education India Global environmental change often seems to be the most carefully examined issue of our time. Yet understanding the human side--human causes of and responses to environmental change--has not yet received sustained attention. Global Environmental Change offers a strategy for combining the efforts

of natural and social scientists to better understand how our actions influence global change and how global change influences us. The volume is accessible to the nonscientist and provides a wide range of examples and case studies. It explores how the attitudes and actions of individuals, governments, and organizations intertwine to leave their mark on the health of the planet. The book focuses on establishing a framework for this new field of study,

identifying problems that must be overcome if we are to deepen our understanding of the human dimensions of global change, presenting conclusions and recommendations.

This is a study of the legal rules affecting the practice of female prostitution at Rome approximately from 200 B.C. to A.D. 250. It examines the formation and precise content of the legal norms developed for prostitution and those engaged in this profession, with close attention to their social context. McGinn's unique study explores the "fit"

between the law-system and the socio-economic reality while shedding light on important questions concerning marginal groups, marriage, sexual behavior, the family, slavery, and citizen status, particularly that of women.

The history of accounting in Australia is of interest because it provides an opportunity to examine how accounting techniques, institutions

and concepts have been imported and adapted to an environment similar to, but not exactly the same as that of the exporters. The book emphasizes private sector accounting over public sector accounting which is a reflection of the available literature but not of the real world of Australian accounting and is divided into 7 sections: Early Accounting Records The Financial Year Corporate Financial Reporting Audit Professional Accountancy Accounting Literature Biographies and

In the Roman republic, only the People could pass laws, only the People could elect politicians to office, and the very word *republica* meant 'the People's business'. So why is it always assumed that the republic was an oligarchy? The main reason is that most of what we know about it we know from Cicero, a great man and a great writer, but also an active right-wing politician who took it for granted that what was

good for a small minority of self-styled 'best people' (optimates) was good for the republic as a whole. T. P. Wiseman interprets the last century of the republic on the assumption that the People had a coherent political ideology of its own, and that the optimates, with their belief in justified murder, were responsible for the breakdown of the republic in civil war.

This newest edition of Accounting 1, has been developed to reflect new curriculum requirements as well as changes in accounting practices in the business world. However, it retains those features that have made Accounting 1 a popular text with students and teachers. Oxford University Press Social isolation and loneliness are serious yet underappreciated public health risks that affect a significant portion of the older adult population. Approximately one-

quarter of community-dwelling Americans aged 65 and older are considered to be socially isolated, and a significant proportion of adults in the United States report feeling lonely. People who are 50 years of age or older are more likely to experience many of the risk factors that can cause or exacerbate social isolation or loneliness, such as living alone, the loss of family or friends, chronic illness, and sensory impairments. Over a life course, social isolation and loneliness

may be episodic or chronic, depending upon an individual's circumstances and perceptions. A substantial body of evidence demonstrates that social isolation presents a major risk for premature mortality, comparable to other risk factors such as high blood pressure, smoking, or obesity. As older adults are particularly high-volume and high-frequency users of the health care system, there is an opportunity for health care professionals to identify, prevent, and

mitigate the adverse health impacts of social isolation and loneliness in older adults. Social Isolation and Loneliness in Older Adults summarizes the evidence base and explores how social isolation and loneliness affect health and quality of life in adults aged 50 and older, particularly among low income, underserved, and vulnerable populations. This report makes recommendations specifically for clinical settings of health care to identify those who suffer

the resultant negative health impacts of social isolation and loneliness and target interventions to improve their social conditions. Social Isolation and Loneliness in Older Adults considers clinical tools and methodologies, better education and training for the health care workforce, and dissemination and implementation that will be important for translating research into practice, especially as the evidence base for effective interventions continues to flourish.

 In 1996 the Federal Accounting Standards Advisory Board (FASAB) 1 enacted Standard Number 6, Accounting for Property, Plant, and Equipment (PP&E), the first government-wide initiative requiring federal agencies to report dollar amounts of deferred maintenance annually. The FASAB has identified four overall objectives in federal financial reporting: budgetary integrity, operating performance, stewardship, and systems

and control. FASAB Standard Number 6, as amended, focuses on operating performance and stewardship. The FFC Standing Committee on Operations and Maintenance has prepared this report to identify potential issues that should be considered in any future amendments to the standard and to suggest approaches for resolving them. The committee's intent is to assist the CFO Council, federal agencies, the FASAB, and others as they consider how best to meet

the objectives of federal financial reporting for facilities.
