The Gay Archipelago is the first book-length exploration of the lives of gay men in Indonesia, the world's fourth most populous nation and home to more Muslims than any other country. Based on a range of field methods, it explores how Indonesian gay and lesbian identities are shaped by nationalism and globalization. Yet the case of gay and lesbian Indonesians also compels us to ask more fundamental questions about

how we decide when two things are "the same" or "different." The book thus examines the possibilities of an "archipelagic" perspective on sameness and difference. Tom Boellstorff examines the history of homosexuality in Indonesia, and then turns to how gay and lesbian identities are lived in everyday Indonesian life, from questions of love, desire, and romance to the places where gay men and lesbian women meet. He also explores the roles of mass media, the state, and marriage in gay and lesbian identities. The *Gay Archipelago* is unusual in taking the whole nation-state of Indonesia as its subject, rather than the ethnic groups usually studied by anthropologists. It is by looking at the nation in cultural terms, not just political terms, that

identities like those of gay and lesbian Indonesians become visible and understandable. In doing so, this book addresses questions of sexuality, mass media, nationalism, and modernity with implications throughout Southeast Asia and beyond.

Sexual Victimization: Then and Now provides scholars easy access to information that specifically examines the continuum of sex crimes and the perception of victims by our criminal justice system and society as a whole. This text features contributions from well-known researchers in the field and serves as an important resource to provide scholars with up-to-date research on sexual victimization that will educate students on this complex and evolving challenge for the criminal justice system. Editors Tara N. Richards and Catherine D. Marcum approach the

concept by examining how the criminal justice system handles sexual victimization, the association between individuals in a relationship and sexual assault, and unusual and special issues associated with contemporary sexual victimization. By discussing these issues, the theoretical explanations for these crimes and the effectiveness of the policy that has been applied will effectively link the criminological areas of theory, research, and policy.

Why we need a daily dose of touch: an investigation of the effects of touch on our physical and mental well-being. Although the therapeutic benefits of

touch have become increasingly clear, American society, claims Tiffany Field, is dangerously touch-deprived. Many schools have “no touch” policies; the isolating effects of Internet-driven work and life can leave us hungry for tactile experience. In this book Field explains why we may need a daily dose of touch. The first sensory input in life comes from the sense of touch while a baby is still in the womb, and touch continues to be the primary means of learning about the world throughout infancy and well into childhood. Touch is critical, too, for adults' physical and mental health. Field describes studies showing that touch therapy can benefit everyone, from premature infants to children with asthma to patients with conditions that range from cancer to eating disorders.

This second edition of *Touch*, revised and updated with the latest research, reports on new studies that show the role of touch in early development, in communication (including the reading of others' emotions), in personal relationships, and even in sports. It describes the physiological and biological effects of touch, including areas of the brain affected by touch, and the effects of massage therapy on prematurity, attentiveness, depression, pain, and immune functions. Touch has been shown to have positive effects on growth, brain waves, breathing, and heart rate, and to decrease stress and anxiety. As Field makes clear, we enforce our society's touch taboo at our peril.

The English-language debut of Indonesia's rising star. The epic novel *Beauty Is a Wound* combines history, satire, family tragedy, legend, humor, and romance in a sweeping polyphony. The beautiful Indo prostitute Dewi Ayu and her four daughters are beset by incest, murder, bestiality, rape, insanity, monstrosity, and the often vengeful undead. Kurniawan's gleefully grotesque hyperbole functions as a scathing critique of his young nation's troubled past: the rapacious offhand greed of colonialism; the chaotic struggle for independence; the 1965 mass murders of perhaps a million "Communists," followed by three decades of Suharto's

despotic rule. *Beauty Is a Wound* astonishes from its opening line: One afternoon on a weekend in May, Dewi Ayu rose from her grave after being dead for twenty-one years.... Drawing on local sources—folk tales and the all-night shadow puppet plays, with their bawdy wit and epic scope—and inspired by Melville and Gogol, Kurniawan's distinctive voice brings something luscious yet astringent to contemporary literature.

As constitutional scholar John Nowak noted when the book was first released, "Professor Choper's *Judicial Review and the National Political Process* is mandatory reading for anyone seriously attempting to study our constitutional system of government. It is an important assessment of the democratic process and the theoretical and practical role of the Supreme Court." That view is no less true today, as borne out by the countless citations to this landmark work over the decades, including scores in the last few years alone. It is simply part of the foundational canon of constitutional law and political theory, an essential part of

the library of scholars, students, and educated readers interested in considering the hard choices inherent in what the courts should decide and how they should decide them.

Presented here are four major theories behind the functioning of the world's presses: (1) the Authoritarian theory, which developed in the late Renaissance and was based on the idea that truth is the product of a few wise men; (2) the Libertarian theory, which arose from the

works of men like Milton, Locke, Mill, and Jefferson and avowed that the search for truth is one of man's natural rights; (3) the Social Responsibility theory of the modern day: equal radio and television time for political candidates, the obligations of the newspaper in a one-paper town, etc.; (4) the Soviet Communist theory, an expanded and more positive version of the old Authoritarian theory.
