Teleportation Farrar, Straus and Giroux
David Walsh - the creator of Mona in Hobart - is both a giant and an enigma in the Australian art world. A multi-millionaire who made his money gambling, David has turned a wild vision into a unique reality; he is in turns controversial, mysterious and idolised. A Bone of Fact is his utterly unconventional and absorbing memoir, about which he says: 'By some great good fortune (mine, not yours) you hold in your hands my story, credible I think, but not extraordinary (despite what those avaricious publishers might have you believe). I have captured your attention: maybe you have some resonance with Mona, or maybe good graphical design partly seized your day. To extract 55 bucks from you I need to say something clever, but I can't think of anything. So I'll seduce you with a tale of another, cleverer, writer. Stanislaw Lem, noted Polish science fiction author and notorious smartarse, once told an American colleague that his new collection of short stories would be published in a paper bag. This conjured a mental picture of the stories being selected by lucky dip. The idea that my life story could be told that way, without a disabling manifesto, is appealing. Unfortunately Mr Lem had actually said 'paperback' (his meaning concealed beneath his thick accent), a wholly ordinary practice to deliver extraordinary stories. My story lacks Mr Lem's magical reality and philosophy, and it also lacks a paper bag. You should buy it anyway, if you are at least mildly curious as to why I want you to give me

more money, even though I'm already rich. But if you happen to read Polish you could probably do better reading Lem. Incidentally, Polish is one of the few words that changes its pronunciation when you change the first letter from upper case to lowercase. If you are in Natal or Nice you can probably think of another. But surely, if you are in Natal or Nice you have better things to do than lurk in bookshops. Get out of here, but take me with you. I promise to treat you nice. But not so nice that you'll need to go to a natal clinic.'

This open access book is the biography of one of Britain's foremost animal welfare campaigners and of the world of activism, science, and politics she inhabited. In 1964, Ruth Harrison's bestseller *Animal Machines* triggered a gear change in modern animal protection by popularising the term 'factory farming' alongside a new way of thinking about animal welfare. Here, historian Claas Kirchhelle explores Harrison's avant-garde upbringing, Quakerism, and how animal welfare debates were linked to concerns about the wider ethical and environmental trajectories of post-war Britain. Breaking the myth of Harrison as a one-hit wonder, Kirchhelle reconstructs Harrison's 46 years of campaigning and the rapid transformation of welfare politics and science during this time. Exacerbated by Harrison's own actions, the decades after 1964 saw a polarisation of animal politics, a professionalisation of British activism, and the rise of a new animal welfare science. Harrison's belief in incremental reform allowed her to form ties to leading scientists but alienated her from more radical campaigners. Many of her

1964 demands gradually became part of mainstream politics. However, farm animal welfare's increasing marketisation has also led to a relative divorce from the wider agenda of social improvement that Harrison once bore witness to. This is the first book to cast light on the interlinked histories of British farm animal welfare activism, science, and legislation. Its unique scope allows it to go beyond existing accounts of modern British animal welfare and will be of interest to those interested in animal welfare, environmentalism, and the behavioural sciences.

The President has the power to end the world in minutes. Right now, no one can stop him. Since the Truman administration, America has been one "push of a button" away from nuclear war—a decision that rests solely in the hands of the President. Without waiting for approval from Congress or even the Secretary of Defense, the President can unleash America's entire nuclear arsenal. Almost every governmental process is subject to institutional checks and balances. Why is potential nuclear annihilation the exception to the rule? For decades, glitches and slip-ups have threatened to trigger nuclear winter: misinformation, false alarms, hacked warning systems, or even an unstable President. And a new nuclear arms race has begun, threatening us all. At the height of the Cold War, Russia and the United States each built up arsenals exceeding 30,000 nuclear weapons, armed and ready to destroy each other—despite the fact that just a few hundred are necessary to end life on earth. From authors William J. Perry, Secretary of Defense in the Clinton administration and Undersecretary of

Defense for Research and Engineering in the Carter administration, and Tom Z. Collina, the Director of Policy at Ploughshares Fund, a global security foundation in Washington, DC, The Button recounts the terrifying history of nuclear launch authority, from the faulty 46-cent microchip that nearly caused World War III to President Trump's tweet about his "much bigger & more powerful" button. Perry and Collina share their firsthand experience on the front lines of the nation's nuclear history and provide illuminating interviews with former President Bill Clinton, former Secretary of Defense Jim Mattis, Congressman Adam Smith, Nobel Peace Prize winner Beatrice Fihn, senior Obama administration officials, and many others. Written in an accessible and authoritative voice, The Button reveals the shocking tales and sobering facts of nuclear executive authority throughout the atomic age, delivering a powerful condemnation against ever leaving explosive power this devastating under any one person's thumb.

Wild Cats of the World Facts on File
#1 NEW YORK TIMES BEST SELLER • From the award-winning, best-selling author of the classic *A Little Life*—a bold, brilliant novel spanning three centuries and three different versions of the American experiment, about lovers, family, loss and the elusive promise of utopia. A **BEST BOOK OF THE YEAR: VOGUE • ESQUIRE • NPR • GOODREADS** *To Paradise* is a fin de siècle novel of marvelous literary effect, but above all it is a work of emotional genius. The great power of this remarkable novel is driven by Yanagihara’s understanding of the aching desire to protect those we love—partners, lovers, children, friends, family, and even our fellow citizens—and the pain that ensues when we cannot. In an alternate version of 1893 America, New York is part of the Free States, where people may live and love whomever they please (or so it seems). The fragile young scion of a distinguished family resists betrothal to a worthy suitor, drawn to a charming music teacher of no means. In a 1993 Manhattan besieged by the AIDS epidemic, a young Hawaiian man lives with his much older, wealthier partner,

hiding his troubled childhood and the fate of his father. And in 2093, in a world riven by plagues and governed by totalitarian rule, a powerful scientist’s damaged granddaughter tries to navigate life without him—and solve the mystery of her husband’s disappearances. These three sections comprise an ingenious symphony, as recurring notes and themes deepen and enrich one another: A townhouse in Washington Square Park in Greenwich Village; illness, and treatments that come at a terrible cost; wealth and squalor; the weak and the strong; race; the definition of family, and of nationhood; the dangerous righteousness of the powerful, and of revolutionaries; the longing to find a place in an earthly paradise, and the gradual realization that it can’t exist. What unites not just the characters, but these Americas, are their reckonings with the qualities that make us human: Fear. Love. Shame. Need. Loneliness.

Starfist: First to Fight Little, Brown
The Pulitzer Prize-winning biography of Harry S. Truman, whose presidency included momentous events from the

atomic bombing of Japan to the outbreak of the Cold War and the Korean War, told by America's beloved and distinguished historian. The life of Harry S. Truman is one of the greatest of American stories, filled with vivid characters—Roosevelt, Churchill, Stalin, Eleanor Roosevelt, Bess Wallace Truman, George Marshall, Joe McCarthy, and Dean Acheson—and dramatic events. In this riveting biography, acclaimed historian David McCullough not only captures the man—a more complex, informed, and determined man than ever before imagined—but also the turbulent times in which he rose, boldly, to meet unprecedented challenges. The last president to serve as a living link between the nineteenth and the twentieth centuries, Truman's story spans the raw world of the Missouri frontier, World War I, the powerful Pendergast machine of Kansas City, the legendary Whistle-Stop Campaign of 1948, and the decisions to drop the atomic bomb, confront Stalin at Potsdam, send troops to Korea, and fire General MacArthur. Drawing on newly discovered archival material and extensive interviews with Truman's own family, friends, and Washington colleagues, McCullough tells the deeply moving story of the seemingly ordinary "man from Missouri" who was perhaps the most courageous president in our history.

Experience spiritual enlightenment and personal transformation from world-renowned author, psychiatrist, clinician, spiritual teacher, and researcher of consciousness, David R. Hawkins, M.D., Ph.D. This book combines consciousness studies with transpersonal psychology, providing an accessible gateway into the deeper dimensions of self and reality. It

concludes the presentation of a long-predicted major advance in critical human knowledge. It explains and describes the very substrate and essence of consciousness as it evolved from its primordial appearance as life on earth on up through evolution as the human ego, and hence, to the ego's transcendence as the spiritual Reality of Enlightenment and the Presence of Divinity. It completes the description of the evolution of human consciousness from the level of approximately 800 to its peak experience at 1,000, which historically has been the ultimate possibility in the human domain. This is the realm of the mystic whose truth stems solely from the radical subjectivity of divine revelation. The text of the material is taken from lectures, dissertations, and dialogues with students, visitors, and spiritual aspirants from around the world who have different spiritual and religious backgrounds and varying levels of consciousness. On the referenced Scale of the Levels of consciousness, which calibrates the levels of Truth from 1 to 1,000, Power versus Force calibrates at 850, The Eye of the I at 980, and the final volume of the trilogy, I, calibrates at a conclusive 999.8. The uncommon clarity and lucidity with which the highly evolved subject matter is presented facilitates understanding. As with the reading of Power versus Force or The Eye of the I, the reader's level of consciousness increases measurably as a consequence of exposure to this material itself, which is presented from a powerful field of exposition. Conflict is resolved within the mind of the student by means of recontextualization, which solves the dilemma. Argument and adversity are resolvable by identifying the positionalities of the ego which are

the basis of human suffering. Some Chapters Include: The Process Spiritual Purification The 'Ego' and Society Spiritual Reality Realization The Realization of Divinity The Radical Reality of the Self The Mystic The Levels of Enlightenment The Nature of God The Obstacles Transcending the World The Emotions "Mind" Considerations Karma The Final Doorway The Transcendence The Inner Path "No Mind" The Way of the Heart The Recontextualization Spiritual Research Homo Spiritus This masterpiece is a revolutionary tool for personal transformation, blending quantum physics with spirituality, and a perfect read for anyone seeking enlightenment and a deeper understanding of the universe.

Although concerns over the ecological impacts of pesticides gave rise to the environmental movement of the late 1960s and 1970s, since that time, pesticide use and its effects have been largely ignored by the law and by legal scholars. This book addresses this omission by providing a unique and serious treatment of the significance of pesticide issues in environmental law and takes an ecological perspective on the legal issues. Dealing with a wide range of questions relating to pests and pesticides, the book focuses primarily on agricultural pesticide use as the largest contaminator in the US. It also examines the legacy of past pesticide use and analyzes how recent developments in

ecological science can inform the law and increase our understanding of ecology. Interdisciplinary in its approach, the book will be of interest to academics, lawyers, scientists and environmental and agricultural professionals.

Now Brooks turns to the building blocks of human flourishing in a multilayered, profoundly illuminating work grounded in everyday life. Drawing on a wealth of current research from numerous disciplines, Brooks takes Harold and Erica from infancy to old age, illustrating a fundamental new understanding of human nature along the way: The unconscious mind, it turns out, is not a dark, vestigial place, but a creative one, where most of the brain's work gets done. I am Ren of Atikala. Kobold. Prisoner. Experiment. My father owns me and my days are full of pain. I have many stories to tell. This one is about death. Kobolds die every day. Even hatchlings are familiar with death, taught to understand it from an early age. Death is our nursemaid. By the time a hatchling has reached adulthood it has seen a hundred lives ended. Humans do things differently. Humans avoid talking of

death. It is spoken in whispers, avoided in conversation. When they must discuss it they use euphemisms, silly phrases like “passed on” or “sleeping” or “gone away”. They are hoping, perhaps, they can pretend such euphemisms will not one day apply to them. Ultimately, though, they always do. These are some of the hardest times I have ever faced and some of my sweetest joys. I have so many stories to tell but this one should

come next. It will take some time. This is the story of how I came to truly understand death, and what it means to take a life.
