Homework 9-2 Answers Chapter 9 Chemical Calculations and Chemical Formulas 329 In order to explore and make use of the seemingly limitless changes that matter can undergo, chemists and chemistry students often need to answer questions that Chemistry Chapter 9 Test Answer Key - full exams.com As we noted in Chapter 9.2 the heat released by a reaction carried out at constant volume is identical to the change in internal energy (ΔE) rather than the enthalpy change (ΔH); ΔE is related to ΔH by an expression that depends on the change in the number of moles of gas during the reaction. The difference between the heat flow measured at constant volume and the enthalpy change is usually quite small, however (on the order of a few percent). Answer Key Chapter 9 - Chemistry: Atoms First 2e | OpenStax. 1. The temperature of 1 gram of burning wood is approximately the same for both a match and a bonfire. This is an intensive property and depends on the material (wood). However, the overall amount of produced heat depends on the amount of material; this is an extensive property.
