The articles in this collection, written by medievalists and Renaissance scholars, are part of the recent "cultural turn" in translation studies, which approaches translation as an activity that is powerfully affected by its socio-political context and the demands of the translating culture. The links made between culture, politics, and translation in these texts highlight the impact of ideological and political forces on cultural transfer in early European thought. While the personalities of powerful

thinkers and translators such as Erasmus, Etienne Dolet, Montaigne, and Leo Africanus play into these texts, historical events and intellectual fashions are equally important: moments such as the Hundred Years War, whose events were partially recorded in translation by Jean Froissart; the Political tussles around the issues of lay readers and rewriters of biblical texts; the theological and philosophical shift from scholasticism to Renaissance relativism; or European relations with the Muslim world add to the interest of these articles. Throughout this volume, translation is treated as a form of writing, as the production of text and meaning, carried out in a certain cultural and political ambiance, and for identifiable - though not always stated - reasons. No translation, this collection argues, is an innocent, transparent rendering of the original.

Cambridge Latin Course Unit 2 Teacher's Manual North American edition Cambridge University Press

A companion to Bloomsbury's popular two-volume Greek to GCSE, this is the first course for Latin students that directly reflects the curriculum in a clear, concise and accessible way. Enhanced by colour artwork and text features, the books support the new OCR specification for Latin (first teaching 2016) as well as meeting the needs of later students, both at university and beyond. Written by two experienced school teachers, one also an examiner, the course is based on a keen understanding of what pupils find difficult, concentrating on the essentials and on the explanation of principles in both accidence and syntax: minor irregularities are postponed and subordinated so that the need for rote learning is reduced. User-friendly, it also gives pupils a firm foundation for further study. Part 1 covers the basics and is

self-contained, with its own reference section. It outlines the main declensions, a range of active tenses and a vocabulary of 275 Latin words to be learned. Pupil confidence is built up by constant consolidation of the material covered. After the preliminaries, each chapter concentrates on stories with one source or subject: the Fall of Troy, the journeys of Aeneas, the founding of Rome and the early kings, providing an excellent introduction to Roman culture alongside the language study.

Praised by teachers for many years, this format is now easier to manage. Passages are carefully controlled to use only vocabulary and syntax already taught and tested. Reading-skills instruction and translation help prepare students for second-year Latin. Twenty lessons formerly in Level I are now at the beginning of Level II, thereby providing better overall pacing.

Reading Virgil Cambridge University Press

This innovative study shows how printing and translation transformed English literary culture in the Renaissance. Focusing on the century after Caxton brought the press to England in 1476, Coldiron illustrates the foundational place of foreign, especially French language, materials. The book reveals unexpected foreign connections between works as different as Caxton's first printed translations, several editions of Book of the Courtier, sixteenth-century multilingual poetry, and a royal Armada broadside. Demonstrating a new way of writing literary history beyond source-influence models, the author treats the patterns and processes of translation and printing as co-transformations. This provocative book will interest scholars and advanced students of book history, translation studies, comparative literature and Renaissance literature.

Cambridge Latin Course Unit 2 Omnibus Workbook North American edition University of Ottawa Press

Designed for North American students, this special version of the Oxford Latin Course combines the best features of both modern and traditional methods of Latin teaching, providing an exciting, stimulating introduction and approach to Latin based on the reading of original texts. In this four-volume North American edition, the order of declensions corresponds to customary U.S. usage, and the spelling has been Americanized. In addition, it offers full-color illustrations and photographs throughout Parts I

and II and an expanded Teacher's Book with translations for each part. Parts I-III (now available in hardcover editions) are built around a narrative detailing the life of Horace, now based more closely on historical sources, which helps students to get to know real Romans--with their daily activities, concerns, and habits--and to develop an understanding of Roman civilization during the time of Cicero and Augustus. Part IV (paperback) is a reader consisting of extracts from Caesar, Cicero, Catullus, Virgil, Livy, and Ovid. The second edition of the Oxford Latin Course has been carefully designed to maximize student interest, understanding, and competence. It features a clearer presentation of grammar, revised narrative passages, new background sections, more emphasis on daily life and on the role of women, a greater number and variety of exercises, and review chapters and tests. Each chapter opens with a set of cartoons with Latin captions that illustrate new grammar points. A Latin reading follows, with new vocabulary highlighted in the margins and follow-up exercises that focus on reading comprehension and grammatical analysis. A background essay in English concludes each chapter. Covering a variety of topics--from history to food, from slavery to travel, these engaging essays present a well-rounded picture of Augustan Rome. The Oxford Latin Course, Second Edition offers today's students and teachers an exceptionally engaging and attractive introduction to the language, literature, and culture of Rome--one that builds skills effectively and is exciting to use.

Fabulae Ancillantes: Units 1 and 2 Prentice Hall

This collection of ancillary Latin narrative passages is intended to supplement the Cambridge Latin Course, and can be used to provide extra practice in translation and/or comprehension, or to provide material for evaluation purposes on tests and examinations. The stories have served both purposes in the classes for which they have been composed over the last 20 years. The Cambridge Latin Course is successful in its avowed aim to prepare students to read and understand Latin, mainly because its stories are so interesting that students want to be

able to read them. That success, however, poses a challenge to the teacher/evaluator. To measure a student's success in achieving the Course's primary aim, the student has to be asked to translate or answer comprehension questions "at sight" on a connected passage of Latin. The *Fabulae Ancillantes* answer this need, providing passages that are in line with the Cambridge Latin Course, yet are new to the student.

A New York Times Notable Book for 2011 One of The Economist's 2011 Books of the Year People speak different languages, and always have. The Ancient Greeks took no notice of anything unless it was said in Greek; the Romans made everyone speak Latin; and in India, people learned their neighbors' languages—as did many ordinary Europeans in times past (Christopher Columbus knew Italian, Portuguese, and Castilian Spanish as well as the classical languages). But today, we all use translation to cope with the diversity of languages. Without translation there would be no world news, not much of a reading list in any subject at college, no repair manuals for cars or planes; we wouldn't even be able to put together flat-pack furniture. *Is That a Fish in Your Ear?* ranges across the whole of human experience, from foreign films to philosophy, to show why translation is at the heart of what we do and who we are. Among many other things, David Bellos asks: What's the difference between translating unprepared natural speech and translating *Madame Bovary*? How do you translate a joke? What's the difference between a native tongue and a learned one? Can you translate between any pair of languages, or only between some? What really goes on when world leaders speak at the UN? Can machines ever replace human translators, and if not, why? But the biggest question Bellos asks is this: How do we ever really know that we've understood what anybody else says—in our own language or in another? Surprising, witty, and written with great *joie de vivre*, this book is all about how we comprehend other people and shows us how, ultimately, translation is another name for the

human condition.
