Sekiro Enemies and Bosses / Characters - TV Tropes
 Answers To Bloodborne And Airborne
 Airborne transmission occurs when infectious agents are carried by dust or droplet nuclei suspended in air. Airborne dust includes material that has settled on surfaces and become resuspended by air currents as well as infectious particles blown from the soil by the wind.

 EXAMPLE 2 Not “Substantially Limited”
 Jose, a physical therapist, fractures one of his vertebrae in a motorcycle accident. He submits a note to his employer from his doctor stating that he cannot perform any lifting at all for six weeks, but thereafter will be able to resume any physical activities and will have no further lifting restrictions.
