 Confirmatory Factor Analysis Using AmosThe purpose of this
 paper is to demonstrate the process of using AMOS to test first-
 and higher-order confirmatory factor analysis (CFA) models. We

performed the analyses with the AMOS 17.0 statistic package, a
 very user-friendly program for structural equation
 modeling. Confirmatory factor analysis using AMOS: a

Although the results from the one-factor CFA suggest that a one factor solution may capture much of the variance in these items, the model fit suggests that this model can be improved.
