From one of our most important scholars and civil rights activist icon, a powerful study of the women's liberation movement and the tangled knot of oppression facing Black women. "Angela Davis is herself a woman of undeniable courage. She should be heard."—The New York Times
Angela Davis provides a powerful history of the social and political influence of whiteness and elitism in

feminism, from abolitionist days to the present, and demonstrates how the racist and classist biases of its leaders inevitably hampered any collective ambitions. While Black women were aided by some activists like Sarah and Angelina Grimke and the suffrage cause found unwavering support in Frederick Douglass, many women played on the fears of white supremacists for political gain rather than take an intersectional approach to liberation. Here, Davis not

only contextualizes the legacy and pitfalls of civil and women's rights activists, but also discusses Communist women, the murder of Emmitt Till, and Margaret Sanger's racism. Davis shows readers how the inequalities between Black and white women influence the contemporary issues of rape, reproductive freedom, housework and child care in this bold and indispensable work.

Festivals have always been part of city life, but their relationship with their host cities has continually changed. With the rise of

industrialization, they were largely considered peripheral to the course of urban affairs. Now they have become central to new ways of thinking about the challenges of economic and social change, as well as repositioning cities within competitive global networks. In this timely and thought-provoking book, John and Margaret Gold provide a reflective and evidence-based historical survey of the processes and actors involved, charting the ways that regular festivals

have now become embedded in urban life and city planning. Beginning with David Garrick's rain-drenched Shakespearean Jubilee and ending with Sydney's flamboyant Mardi Gras celebrations, it encompasses the emergence and consolidation of city festivals. After a contextual historical survey that stretches from Antiquity to the late nineteenth century, there are detailed case studies of pioneering European arts festivals in their

urban context: Venice's Biennale, the Salzburg Festival, the Cannes Film Festival and Edinburgh's International Festival. Ensuing chapters deal with the worldwide proliferation of arts festivals after 1950 and with the ever-increasing diversification of carnival celebrations, particularly through the actions of groups seeking to assert their identity. The conclusion draws together the book's key themes and sketches the future prospects for festival cities. Lavishly illustrated,

and copiously researched, this book is essential reading not just for urban geographers, social historians and planners, but also for anyone interested in contemporary festival and events tourism, urban events strategy, urban regeneration, or simply building a fuller understanding of the relationship between culture, planning and the city.

From the Emmy-winning creator and writer of *All My Children* and *One Life to Live*, a memoir of her trailblazing rise to the top of the television industry, including behind-the-scenes stories from some of the most beloved soaps of all time. Before there was *Erica Kane*, *Adam Chandler*, or *Victoria Lord*, there was *Agnes Nixon*, a young girl who dreamed up stories for paper dolls. Those tales she imagined--ones filled with ambitions, rivalries, and romances--would soon parallel her own path to

success. In a memoir filled with as much drama as the soaps she penned, Nixon shares her journey from Nashville to New York City, as she overcomes the loss of her fiancé in World War II, a father intent on crushing her writing dreams, and the jealousy of her male colleagues on her way to becoming one of the most successful names in television. While fans will delight in Nixon's own incredible life, they will also love her behind-the-scenes insight into her most popular shows.

Inside, she shares the inspiration for Erica Kane and how she cast Susan Lucci in the role; an excerpt from the never-before-seen All My Children story bible; entertaining anecdotes about her shows' beloved casts and special guests, including Carol Burnett, Kelly Ripa, Oprah Winfrey, and Warren Buffett; and more. But My Life to Live is also a portrait of a pioneer. Driven to use her ratings power for good, Nixon fought and broke network taboos by wrestling with

controversial social issues ranging from women's health, interracial relationships, and the Vietnam War to drug addiction, LGBT rights, and AIDS. By infusing her characters with sensitivity, humor, and humanity, she enabled millions to examine an opposite point of view. And long before Shonda Rhimes launched a golden age of female showrunners, Agnes Nixon positioned ABC to become the media giant it is today. She is a true television legend, and her

candid and inspiring glimpse behind the curtain of the television industry will charm soap fans and story lovers alike.

Dangerous Crossing Texas A&M University Press
A challenge to the cultural tradition of corporal punishment in Black homes and its connections to racial violence in America Why do so many African Americans have such a special attachment to whupping children? Studies show that nearly 80 percent of black

parents see spanking, popping, pinching, and beating as reasonable, effective ways to teach respect and to protect black children from the streets, incarceration, encounters with racism, or worse. However, the consequences of this widely accepted approach to child-rearing are far-reaching and seldom discussed. Dr. Stacey Patton's extensive research suggests that corporal punishment is a crucial factor in explaining why black folks are subject to

disproportionately higher rates of school suspensions and expulsions, criminal prosecutions, improper mental health diagnoses, child abuse cases, and foster care placements, which too often funnel abused and traumatized children into the prison system. Weaving together race, religion, history, popular culture, science, policing, psychology, and personal testimonies, Dr. Patton connects what happens at home to what happens in the streets in a way that is thought-

provoking, unforgettable, and deeply sobering. Spare the Kids is not just a book. It is part of a growing national movement to provide positive, nonviolent discipline practices to those rearing, teaching, and caring for children of color.

In 1995, Texas Historical Commission underwater archaeologists discovered the wreck of La Salle's La Belle, remnant of an ill-fated French attempt to establish a colony at the

mouth of the Mississippi River that landed instead along today's Matagorda Bay in Texas. During 1996–1997, the Commission uncovered the ship's remains under the direction of archaeologist James E. Bruseth and employing a team of archaeologists and volunteers. Amid the shallow waters of Matagorda Bay, a steel cofferdam was constructed around the site, creating one of the most complex nautical archaeological excavations ever

attempted in North America and allowing the archaeologists to excavate the sunken wreck much as if it were located on dry land. The ship's hold was discovered full of everything the would-be colonists would need to establish themselves in the New World; more than 1.8 million artifacts were recovered from the site. More than two decades in the making, due to the immensity of the find and the complexity of cataloging and conserving the artifacts, this book

thoroughly documents one of the most significant North American archaeological discoveries of the twentieth century.

In this “thrilling, seductive, and utterly absorbing” (Paula Hawkins, #1 New York Times bestselling author) historical suspense novel in the tradition of Agatha Christie's *Death on the Nile* and Ruth Ware's *The Woman in Cabin 10*, pre-war tension and forbidden

romance abound, and not everyone will survive the journey... The ship has been like a world within itself, a vast floating city outside of normal rules. But the longer the journey continues, the more confined it is starting to feel, deck upon deck, passenger upon passenger, all of them churning around each other without anywhere to go... 1939: Europe is on the brink of war when young Lily Shepherd boards an ocean liner in England, bound for Australia. She is ready to

start anew, leaving behind the shadows of her past. The passage proves magical, complete with live music, cocktails, and fancy-dress balls. With stops at exotic locations along the way—Naples, Cairo, Ceylon—the voyage shows Lily places she's only ever dreamed of and enables her to make friends with those above her social station, people who would not ordinarily mingle with her. She even allows herself to hope that a man she couldn't possibly have a future with outside the cocoon of

the ship might return her feelings. But Lily soon realizes that she's not the only one hiding secrets. Her newfound friends—the toxic wealthy couple Eliza and Max; Cambridge graduate Edward; Jewish refugee Maria; fascist George—are also running away from their pasts. As the glamour of the voyage fades, the stage is set for something sinister to occur. By the time the ship docks, two passengers are dead, war has been declared, and Lily's life is irrevocably

changed. “A vividly descriptive ride” (Marie Claire) with a “jaw-dropping ending” (RT Book Reviews, Top Pick), *Dangerous Crossing* is a transporting and “gorgeously atmospheric” (Ruth Ware, New York Times bestselling author) story for the ages.

The notion of 'resilience' is gaining currency in European and transatlantic security policy discussions. The EU and NATO are each building the capacity of

their member states to anticipate, preempt and resolve disruptive challenges to vital societal functions. The EU and NATO are also exploring ways to work more effectively together in this area. But is resilience enough to deal with disruptive threats in a deeply interconnected world? In this new study, authors and experts argue that while state-by-state approaches to resilience are important, they are likely to be insufficient in a world where few critical infrastructures are limited

to national borders, and where robust resilience efforts by one country may mean little if its neighbor's systems are weak. They argue not only that resilience must be shared, it must be projected forward, and that traditional notions of territorial security must be supplemented with actions to address flow security - protecting critical links that bind societies to one another. *Why Whupping Children Won't Save Black America* Cengage Learning

"Reinventing the Wheel is equal parts popular science, history, and muckraking. Over the past hundred and fifty years, dairy farming and cheesemaking have been transformed, and this book explores what has been lost along the way. Today, using cutting-edge technologies like high-throughput DNA sequencing, scientists are beginning to understand the techniques of our

great-grandparents. The authors describe how geneticists are helping conservationists rescue rare dairy cow breeds on the brink of extinction, microbiologists are teaching cheesemakers to nurture the naturally occurring microbes in their raw milk rather than destroying them, and communities of cheesemakers are producing "real" cheeses that reunite farming and flavor, rewarding diversity and sustainability at every level."--Provided by publisher.

From the author of the #1 New York Times bestselling series *The Clique* comes Lisi Harrison's debut adult novel about four modern-day strangers who inherit a dirty book club that was started in the 1960s. M.J. Stark's life is picture-perfect—she has a dream job as a magazine editor, a sexy doctor boyfriend, and a glamorous life in Manhattan. But behind her success, she can't

shake a deep sense of loneliness, so when her boyfriend offers her a completely new life in California, she decides to give it a try. Once there, M.J. is left to fend for herself in a small California beach town, with only the company of her elderly neighbor, Gloria. One day M.J. receives a mysterious invitation and a copy of *Prim: A Modern Woman's Guide to Manners*. She recognizes the book as an outdated classic, but when she opens it, she discovers that it's actually

a copy of *Fear of Flying* by Erica Jong and the invitation is to join Gloria's secret book club—one that only reads erotic books. Out of curiosity, M.J. goes to the meeting at a local bookstore, and discovers three other women who have also been selected by the club's original members—who have suddenly left the country to honor a fifty-year-old pact. As these unlikely friends bond over naughty bestsellers, each woman shares not only the intimate details of her

own sex life, but all areas of her life. Inspired by the characters in the novels they read—and the notes passed down by the club's original members—the new members of The Dirty Book Club help each other find the courage to rewrite their own stories and risk it all for a happy ending.

The Encyclopaedia Britannica Routledge
From the 1787 Wedgwood antislavery medallion featuring the image of an enchained and pleading black body to Quentin Tarantino's *Django*

Unchained (2012) and Steve McQueen's *Twelve Years a Slave* (2013), slavery as a system of torture and bondage has fascinated the optical imagination of the transatlantic world. Scholars have examined various aspects of the visual culture that was slavery, including its painting, sculpture, pamphlet campaigns, and artwork. Yet an important piece of this visual culture has gone unexamined: the popular and frequently reprinted antislavery illustrated

books published prior to Harriet Beecher Stowe's *Uncle Tom's Cabin* (1852) that were utilized extensively by the antislavery movement in the first half of the nineteenth century. The *Illustrated Slave* analyzes some of the more innovative works in the archive of antislavery illustrated books published from 1800 to 1852 alongside other visual materials that depict enslavement. Martha J. Cutter argues that some illustrated narratives attempt to shift

a viewing reader away from pity and spectatorship into a mode of empathy and interrelationship with the enslaved. She also contends that some illustrated books characterize the enslaved as obtaining a degree of control over narrative and lived experiences, even if these figurations entail a sense that the story of slavery is beyond representation itself. Through exploration of famous works such as *Uncle Tom's Cabin*, as well as unfamiliar ones by

Amelia Opie, Henry Bibb, and Henry Box Brown, she delineates a mode of radical empathy that attempts to destroy divisions between the enslaved individual and the free white subject and between the viewer and the viewed.

La Belle SUNY Press Advances critical conversations in Native American literary studies by situating its subject in global, transnational, and modernizing contexts. Since the rise of the Native American

Renaissance in literature and culture during the American civil rights period, a rich critical discourse has been developed to provide a range of interpretive frameworks for the study, recovery, and teaching of Native American literary and cultural production. For the past few decades the dominant framework has been nationalism, a critical perspective placing emphasis on specific tribal nations and nationalist concepts. While this nationalist intervention has produced

important insights and questions regarding Native American literature, culture, and politics it has not always attended to the important fact that Native texts and writers have also always been globalized. The World, the Text, and the Indian breaks from this framework by examining Native American literature not for its tribal-national significance but rather its connections to global, transnational, and cosmopolitan forces. Essays by leading scholars in the field

assume that Native American literary and cultural production is global in character; even claims to sovereignty and self-determination are made in global contexts and influenced by global forces. Spanning from the nineteenth century to the present day, these analyses of theories, texts, and methods—from trans-indigenous to cosmopolitan, George Copway to Sherman Alexie, and indigenous feminism to book history—interrogate the dialects of global

indigeneity and settler colonialism in literary and visual culture.

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can

arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee

to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.
