Sedekah bisa dilakukan kapan saja dan di mana saja. Bisa dilakukan dengan cara yang mudah hingga yang paling sulit. Sedekah juga bisa dilakukan dengan murah ataupun mahal, bahkan tanpa biaya. Sedekah tidaklah sesulit yang kita pikirkan. Tersenyum, membantu orang lain, hingga memberikan barang-barang kita bisa dilakukan untuk sedekah. Dengan membahagiakan orang lain, kita sudah bersedekah. Dengan keikhlasan hati, kita sudah bersedekah. Lalu, sudahkah Anda bersedekah hari ini?

Indonesian Islam is often portrayed as being intrinsically moderate by virtue of the role that mystical Sufism played in shaping its traditions. According to Western observers--from Dutch colonial administrators and orientalist scholars to modern anthropologists such as the late Clifford Geertz--Indonesia's peaceful interpretation of Islam has been perpetually under threat from outside by more violent, intolerant Islamic traditions that were originally imposed by conquering Arab armies. *The Makings of Indonesian Islam* challenges this widely accepted narrative, offering a more balanced assessment of the intellectual and cultural history of the most populous Muslim nation on Earth. Michael Laffan traces how the popular image of Indonesian Islam was shaped by encounters between colonial Dutch scholars and reformist Islamic thinkers. He shows how Dutch religious preoccupations sometimes echoed Muslim concerns about the relationship between faith and the state, and how Dutch-Islamic discourse throughout the long centuries of European colonialism helped give rise to Indonesia's distinctive national and religious culture. *The Makings of Indonesian Islam* presents Islamic and colonial history as an integrated whole, revealing the ways our understanding of Indonesian Islam, both past and present, came to be.

This work marks the meeting point of 4 different traditions of the Qur'anic commentary: philosophical, Sufi, Shi'ite and theological. It also presents the author's metaphysical commentary and records the earlier commentaries on the Light Verse. It is significant from the point of view of both the history of Qur'anic commentary and Islamic

Philosophy. The most outstanding characteristic of the book is that he explains the meaning of light by establishing its metaphysics, encompassing ontology, cosmology, epistemology, psychology and spiritual wayfaring.

Since the publication of the best-selling first edition, the growing price and environmental cost of energy have increased the significance of tribology. Handbook of Lubrication and Tribology, Volume II: Theory and Design, Second Edition demonstrates how the principles of tribology can address cost savings, energy conservation, and environmental protection. This second edition provides a thorough treatment of established knowledge and practices, along with

detailed references for further study. Written by the foremost experts in the field, the book is divided into four sections. The first reviews the basic principles of tribology, wear mechanisms, and modes of lubrication. The second section covers the full range of lubricants/coolants, including mineral oil, synthetic fluids, and water-based fluids. In the third section, the contributors describe many wear- and friction-reducing materials and treatments, which are currently the fastest growing areas of tribology, with announcements of new coatings, better performance, and new vendors being made every month. The final section presents components, equipment, and designs commonly found in tribological systems. It also examines specific industrial areas and their processes. Sponsored by the Society of Tribologists and Lubrication Engineers, this handbook incorporates up-to-date, peer-reviewed information for tackling tribological problems and improving lubricants and tribological systems. The book shows how the proper use of generally accepted tribological practices can save money, conserve energy, and protect the environment.

*The Call of the Minaret* Createspace Independent Publishing Platform  
The renowned science writer, mathematician, and bestselling author of *Fermat's Last Theorem* masterfully refutes the overreaching claims the "New Atheists," providing millions of educated believers with a clear, engaging explanation of what science really says, how there's still much space for the Divine in the universe, and why faith in both God and empirical science are not mutually exclusive. A highly publicized coterie of scientists and thinkers, including Richard Dawkins, the late Christopher Hitchens, and Lawrence Krauss, have vehemently contended that breakthroughs in modern science have disproven the existence of God, asserting that we must accept that the creation of the universe came out of nothing, that religion is evil, that evolution fully explains the dazzling complexity of life, and more. In this much-needed book, science journalist Amir Aczel profoundly disagrees and conclusively demonstrates that science has not, as yet, provided any definitive

proof refuting the existence of God. Why Science Does Not Disprove God is his brilliant and incisive analyses of the theories and findings of such titans as Albert Einstein, Roger Penrose, Alan Guth, and Charles Darwin, all of whose major breakthroughs leave open the possibility—and even the strong likelihood—of a Creator. Bolstering his argument, Aczel lucidly discourses on arcane aspects of physics to reveal how quantum theory, the anthropic principle, the fine-tuned dance of protons and quarks, the existence of anti-matter and the theory of parallel universes, also fail to disprove God.

Kitab Al I'tisam seems to have been written by Al Shatibi "May Allah (swt) have mercy on him" for his disciples and the scholars and students of knowledge,

rather than for the laymen and commoners among the people. He underwent great difficulties to achieve this glorious task. The book is indeed a scientific encyclopedia, which includes a lot of benefits and unique issues, which make its holder and carrier dispense with anything else, in residence as well as on journey. He prefaced the book with a wonderful and concentrated introduction, in which he talked about the alienation of Islam, and the emergence and spread of the religious innovations, which motivated him to write his book, in the hope it would benefit the Muslims in the world and the hereafter. He divided the book into ten sections, each including many chapters as required by content and in-depth explanation of the issues: 1. Definition and meaning of religious innovation 2. Condemnation of religious innovation, and the evil consequences of its men; 3. Condemnation of religious innovations in general, and all changes made in the religion, in which he discussed the malicious allegations of the religious innovators and those of scholars who regard good or bad the religious innovations. 4. The approaches of religious innovators in attestation; 5. The real and additional religious innovations, and the difference between them; 6. The rulings of the religious innovations, which are not of the same rank; 7. The innovation, whether it pertains to the acts of worship in particular, or includes

also the normal habits; 8. The difference between the benefits which were not specifically addressed with Islamic text, and the appreciation; 9. The reason for which the sects of religious innovators broke away from the established community of the Muslims; 10. The straight path from which the religious innovators deviated
