What Climate Science Tells Us, What It Doesn't, and Why It Matters Penguin UK  
Hurricanes Katrina and Rita devastated the Gulf Coast in 2005. Commentary and analysis typically focused on what went wrong in the post-disaster emergency response. This forward-looking book, however, presents a more cautiously optimistic view about the region's ability to bounce back after multiple disasters. Catastrophes come in different forms—hurricanes, recessions, and oil spills, to name a few. It is imperative that we learn how best to rebuild in the wake of disasters and what capacities and conditions are needed to improve future resilience. Since the devastating summer of 2005, leaders have made important inroads to restoring communities in more prosperous ways. Resilience and Opportunity is an important contribution to our collective learning from a teachable moment. Contributors: Ivey Allen, Foundation for the Mid South; Lance Buhl, Duke University; Ann Carpenter, Federal Reserve Bank of Atlanta; Robert A. Collins, Dillard University; Mark S. Davis, Tulane University Law School; Breonne DeDecker, Brandeis University; Karen B. DeSalvo, Tulane University School of Medicine; Kathryn A. ### **The Autobiography of a Couple**

Simon & Schuster

Shows how we must make deep changes to complete our paradigm shift from the old mechanistic worldview to the new organic worldview • Reveals the distinct stages of paradigm shifts through the ages, including the 18th-century Enlightenment and the critical stage of our current shift • Explains how the new organic worldview began with Goethe and Kant • Offers solutions for each of us to be able to realize and make the deep changes needed for global regeneration  
In *Global Awakening*, Michael Schacker shows that hidden within our global crises is a positive future for the planet. Sharing his 30 years of intensive research into the history of change as well as the evolution of consciousness and regenerative science, Schacker explains how our current shift from the old mechanistic worldview to a new organic worldview based on biological models follows the same pattern as other paradigm shifts across history, including the 18th-century Enlightenment and the American Revolution. He reveals the creative geniuses who have contributed to the

birth of the organic worldview, beginning with Goethe, Kant, and Hahnemann. Exposing the scientific and social forces that drive paradigm shifts, he details the stages every paradigm shift progresses through: the early Enlightenment, the conservative backlash, the intensive phase, and the transformational phase leading to the Organic Shift. Explaining that we are currently in the throes of the paradigm flip, the critical last phase of our paradigm shift, Schacker shows how the mechanistic worldview is crumbling around us and nothing but a complete transformation in the way we think will keep us from the path of total self-destruction. Providing a map to overcome the allure of the simplistic mechanical model that has spawned countless unsustainable practices and problems--from global warming to intense economic disparities--the author offers concrete solutions showing how each of us can use our talents, skills, and time to make the deep changes needed for global regeneration.

**New Science and the 21st-Century Enlightenment** Ronin Publishing

Tina Chen just wants a degree and a job, so her parents never have to worry about making rent again. She has no time for Blake Reynolds, the sexy billionaire who stands to inherit Cyclone Systems. But when he makes an off-hand comment about what it means to be poor, she loses her cool and tells him he couldn't last a month living her life. To her shock, Blake offers her a trade: She'll get his income, his house, his car. In exchange, he'll work her hours and send money home to her family. No expectations; no future obligations. But before long, they're trading not just lives, but secrets, kisses, and heated nights together. No expectations might

break Tina's heart...but Blake's secrets could ruin her life. Trade Me is the first book in the Cyclone series.

Trade Me WIT Press

A quantitative introduction to atmospheric science for students and professionals who want to understand and apply basic meteorological concepts but who are not ready for calculus.

**Walden** Farrar, Straus and Giroux

In the first of L. Frank Baum's time-honored Oz novels, country girl Dorothy Gale gets whisked away by a cyclone to the fantastical Land of Oz. Dropped into the midst of trouble when her farmhouse crushes a tyrannical sorceress, Dorothy incurs the wrath of the Wicked Witch of the West. Dorothy is desperate to return to her native Kansas, and, aided by the Good Witch of the North, she sets out for the Emerald City to get help from the legendary Wizard. On her way, she meets three unlikely allies who embody key human virtues--the Scarecrow, the Tin Woodman, and the Cowardly Lion.

*Sailing Directions for the Southeast Coast of Africa* A&C Black

Center of the Cyclone Looking into Inner Space Ronin Publishing

*The Science of Belief* Ronin Publishing

"A 22-volume, highly illustrated, A-Z general encyclopedia for all ages, featuring sections on how to use World Book, other research aids, pronunciation key, a student guide to better writing, speaking, and research skills, and comprehensive index"--

An Autobiography of Inner Space Float on

One day Sophie comes home from school to find two questions in her mail: "Who are you?" and "Where does the world come from?" Before she knows it she is enrolled in a correspondence course with a mysterious philosopher. Thus begins Jostein Gaarder's unique

novel, which is not only a mystery, but also a complete and entertaining history of philosophy.

### **Atmosphere-ocean Interactions**

Government Printing Office

*Simulations of God* is a brilliant, provocative work by one of the great creative scientists of the twentieth century, John Lilly, M.D.. In it he examines the sacred realms of self, religion, science, philosophy, sex, drugs, politics, money, crime, war, family, and spiritual paths “with no holds barred, with courage and a sense of excitement”. Lilly’s purpose is to provide readers with a unique view of inner reality to help them unfold new areas for growth and self-realization.

*The Possibilities of Talking with Other Species* Tarcher

The increase in levels of population and human development in coastal areas has led to a greater importance of understanding atmosphere-ocean interactions. This second volume on atmosphere-ocean interactions aims to present several of the key mechanisms that are important for the development of marine storms.

**Theory and Experiments** Lippincott Williams & Wilkins

Presentation of Lilly's theory of man as a biological computer; an essential introduction and explanation followed by three experimental sessions. Contents: Pt. 1: Introduction to biocomputer exercises; Pt. 2: Meditative exercises; Pt. 3: Models and beliefs; Pt. 4: Programming awareness.

Paper Towns Three Rivers Press

The researcher whose work was the basis for two Hollywood movies recounts his efforts at communication with dolphins and his work with consciousness research, detailing how this has led to his radical spiritual

transformation

A Metaphysical Autobiography World Book

The parallels between the human brain and computers is easy to see today. But in the 1950’s when John Lilly developed his theory of the human biocomputer, this was a dramatic new way of viewing humans. Much like a driver can step out of the car, we are not our biocomputer. The Self is something far greater and more mysterious. Rooted in his extensive knowledge of neurophysiology, neuroanatomy and electronics and developed through personal experimentation in the sensory isolation tank which he invented, Lilly presents a method for learning to manipulate—to drive the bio-robot, which is our vehicle here on Earth. robots. This manual shows how to step out of the mind-body and find out who we really are.

**A True Story of Men Against the Sea** Center of the Cyclone Looking into Inner Space

The saga of the greatest tornado chaser who ever lived: a tale of obsession and daring and an extraordinary account of humanity’s high-stakes race to understand nature’s fiercest phenomenon from Brantley Hargrove, “one of today’s great science writers” (The Washington Post). At the turn of the twenty-first century, the tornado was one of the last true mysteries of the modern world. It was a monster that ravaged the American heartland a thousand times each year, yet science’s every effort to divine its inner workings had ended in failure. Researchers all but gave up, until the arrival of an outsider. In a field of PhDs, Tim Samaras didn’t attend a day of college in his life. He chased storms with brilliant tools of his own invention and pushed closer to the

tornado than anyone else ever dared. When he achieved what meteorologists had deemed impossible, it was as if he had snatched the fire of the gods. Yet even as he transformed the field, Samaras kept on pushing. As his ambitions grew, so did the risks. And when he finally met his match—in a faceoff against the largest tornado ever recorded—it upended everything he thought he knew. Brantley Hargrove delivers a “cinematically thrilling and scientifically wonky” (Outside) tale, chronicling the life of Tim Samaras in all its triumph and tragedy. Hargrove takes readers inside the thrill of the chase, the captivating science of tornadoes, and the remarkable character of a man who walked the line between life and death in pursuit of knowledge. *The Man Who Caught the Storm* is an “adrenaline rush of a tornado chase...Readers from all across the spectrum will enjoy this” (Library Journal, starred review)

unforgettable exploration of obsession and the extremes of the natural world.

**Teacher's Guide with Activities for Earth and Space Science** Courtney Milan

The author of *Mind of the Dolphin* and *Center of the Cyclone* tells the story of his astonishing discoveries - from his early experiments mapping the brains of monkeys and communication with dolphins to his awesome breakthroughs with consciousness expanding drugs and isolation tanks. His revelations in *The Scientist* are staggering - his latest report on the "solid state conspiracy," on communication with extraterrestrials and the imperative of dolphin/human dialog will grip the reader with its sense of cosmic vision. This expanded edition of *The Scientist* contains "bubbles" of consensus reality - text and photos - in the hyperspace narrative. It includes an

introduction by Timothy Leary, an afterward by Burgess Meredith, biographical and bibliographic information. The third edition has an update on John Lilly's work with Human/Dolphin communication and the results of recent reintroduction of captive dolphins and other cetaceans to the wild.

*John Lilly, So Far* Ronin Publishing

The ultimate guide to the ultimate storms, *Hurricane Watch* is a fascinating blend of science and history from one of the world's foremost meteorologists and an award-winning science journalist. This in-depth look at these awe-inspiring acts of nature covers everything from the earliest efforts by seafarers at predicting storms to the way satellite imaging is revolutionizing hurricane forecasting. It reveals the latest information on hurricanes: their effects on ocean waves, the causes of the variable wind speeds in different parts of the storm, and the origins of the super-cooled shafts of water that vent at high altitudes. *Hurricane Watch* is a compelling history of man's relationship with the deadliest storms on earth. Includes: - The story of the nineteenth-century Cuban Jesuit whose success at predicting the great cyclones was considered almost mystical. - A new look at Isaac Cline, whose infamous failure to predict the Galveston Hurricane left him obsessed with the devastating effects of storm surge. - The story of the Hurricane Hunters, including the first man ever to deliberately fly into a hurricane. - A complete account of how computer modeling has changed hurricane tracking. - A history of Project Stormfury: the only significant, organized effort to reduce the damaging strength of severe hurricanes. - A unique firsthand account of Hurricane Andrew by both authors,

who were at the National Hurricane Center when Andrew struck. - A listing of the deadliest storms in history.

**The Quiet Center** BenBella Books

The news-breaking book that has sent shockwaves through the White House, *Ghost Wars* is the most accurate and revealing account yet of the CIA's secret involvement in al-Qaeda's evolution. Prize-winning journalist Steve Coll has spent years reporting from the Middle East, accessed previously classified government files and interviewed senior US officials and foreign spymasters. Here he gives the full inside story of the CIA's covert funding of an Islamic jihad against Soviet forces in Afghanistan, explores how this sowed the seeds of bin Laden's rise, traces how he built his global network and brings to life the dramatic battles within the US government over national security. Above all, he lays bare American intelligence's continual failure to grasp the rising threat of terrorism in the years leading to 9/11 - and its devastating consequences.

*Tropical Storm Agnes!* Ronin Publishing

In this Consciousness Classic dating from 1967, Dr. John C. Lilly details the discoveries of his research regarding the abilities of dolphins, current ideas (at that time) about their intellect, and the paradoxes of interspecies communication. The book includes a detailed account of the experiment carried out by Dr. Lilly of having a dolphin and human live together in a specially designed house, and this expanded edition includes black-and-white photo plates and additional articles and writings from Dr. Lilly on

dolphins as well as other scientific subjects. This is the book that launched a subculture seeking human-dolphin interaction. Although some of Lilly's findings on dolphin communication have now been refuted, Dr. Lilly's willingness to delve into areas not documented in the scientific literature is still an important scientific achievement and a cultural model for younger generations.

*The Deep Self* Courtney Milan

Special edition slipcase edition of John Green's *Paper Towns*, with pop-up paper town. From the bestselling author of *The Fault in our Stars*. Quentin Jacobsen has always loved Margo Roth Spiegelman, for Margo (and her adventures) are the stuff of legend at their high school. So when she one day climbs through his window and summons him on an all-night road trip of revenge he cannot help but follow. But the next day Margo doesn't come to school and a week later she is still missing. Q soon learns that there are clues in her disappearance . . . and they are for him. But as he gets deeper into the mystery - culminating in another awesome road trip across America - he becomes less sure of who and what he is looking for. Masterfully written by John Green, this is a thoughtful, insightful and hilarious coming-of-age story.

**Isolation and Spirit** Brookings

Institution Press

Presents a vivid account of a history-making storm that hit the New England coast in October 1991 and the lives it changed, weaving together the history of the fishing industry, the science of storms, and personal accounts. Tour.
