The Illustrated Encyclopaedia of 'Ugly' Animals National Geographic Books
 CHILDREN'S BOOK OF THE YEAR, INDIE BOOK AWARDS 2020
 Marvel as you enter the fascinating hidden world of ugly animals in this encyclopaedia of the animal kingdom's most unusual and and so-called 'ugly' species. It's time to see ugliness in a whole new light! With more than sixty animals to explore, this compendium of the unusual celebrates the beauty in 'ugliness'. Children and adults alike will pore over the breathtaking scientific illustrations of unusual animals, discovering why these animals developed such extraordinary features and learning about science and nature along the way. Featuring illustrations and facts about the thorniest species the animal kingdom has to offer, from the naked mole rat to the goblin shark, aye-aye, blobfish and many more. This gorgeous hardcover book is illustrated in

exquisite detail by debut artist Sami Bayly.

Bartimaeus, everyone's favorite (wise-cracking) djinni, is back in book four of this best-selling series, now available in paperback. As alluded to in the footnotes throughout the series, Bartimaeus

has served hundreds of magicians during his 5,010 year career. Now fans can go back in time with the djinni, to Jerusalem and the court of King Solomon in 950 BCE. Only in this adventure, it seems the great Bartimaeus has finally met his match. He'll have to contend with an unpleasant master and his sinister servant, and he runs into just a "spot" of trouble with King Solomon's magic ring....

One Man's Quest to Document the World's Animals

Hachette UK

What would you do if you found an alligator in your garage? Or if you spotted a mountain lion downtown? In cities and suburbs around the world, wild creatures are showing up where we least expect them. Not all of them arrive by accident, and some are here to stay. As the human population tops seven billion, animals are running out of space. Their natural habitats are surrounded—and sometimes even replaced—by highways, shopping centers, office parks, and subdivisions. The result? A wildlife invasion of our urban neighborhoods. What kinds of animals are making cities their new home? How can they survive in our ecosystem of concrete, steel, and glass? And what does their presence there mean for their future and ours? Join scientists, activists, and the folks next door on a journey around the globe to track down our newest wild animal neighbors. Discover what is bringing these creatures to our backyards—and how we can create spaces for people and animals to live side by side.
