 Vice Adm. William H. McRaven helped to devise the strategy for how to bring down Osama bin

Laden, and commanded the courageous U.S. military unit that carried it out on May 1, 2011, ending one of the greatest manhunts in history. In Spec Ops, a well-organized and deeply researched study, McRaven analyzes eight classic special operations. Six are from WWII: the German commando raid on the Belgian fort Eben Emael (1940); the Italian torpedo attack on the Alexandria harbor (1941); the British commando raid on Nazaire, France (1942); the German glider rescue of Benito Mussolini (1943); the British midget-submarine attack on the Tirpitz (1943); and the U.S. Ranger rescue mission at the Cabanatuan POW camp in the Philippines (1945). The two post-WWII examples are the U.S. Army raid on the Son Tay POW camp in North Vietnam (1970) and the Israeli rescue of the skyjacked hostages in Entebbe, Uganda (1976). McRaven—who commands a U.S. Navy SEAL team—pinpoints six essential principles of “spec ops” success: simplicity, security, repetition, surprise, speed and purpose. For each of the case studies, he provides political and military context, a meticulous reconstruction of the mission itself and an

analysis of the operation in relation to his six principles. McRaven deems the Son Tay raid “the best modern example of a successful spec op [which] should be considered textbook material for future missions.” His own book is an instructive textbook that will be closely studied by students of the military arts. The previously untold story of a Cold War spy unit, "one of the best examples of applied unconventional warfare in special operations history" (Small Wars Journal). It is a little-known fact that during the Cold War, two US Army Special Forces detachments were stationed far behind the Iron Curtain in West Berlin. The existence and missions of the two detachments were highly classified secrets. The massive armies of the Soviet Union and its Warsaw Pact allies posed a huge threat to the nations of Western Europe. US military planners decided they needed a plan to slow the expected juggernaut, if and when a war began. This plan was Special Forces Berlin. Their mission—should hostilities commence—was to wreak havoc behind enemy lines and buy time for vastly outnumbered NATO forces to conduct a breakout from the city. In reality, it was an ambitious and extremely dangerous mission, even suicidal. Highly trained and fluent in German, each of these one hundred soldiers and their successors was allocated a specific area. They were skilled in clandestine operations, sabotage, and intelligence tradecraft, and were able to act, if necessary, as independent operators, blending into the local population and working unseen in a city awash with spies looking for information on their every move. Special Forces Berlin left a legacy of a new type of soldier, expert in unconventional warfare, that was sought after for other deployments, including the attempted rescue of American hostages from Tehran in 1979. With the US government officially acknowledging their existence in 2014, their incredible story can now be told—by one of their own.

There has always been a romantic fascination with special operations forces (SOF). The idea of secret commandos or Rangers striking from the shadows surprising the enemy with overwhelming speed, violence of action, and cutting-edge technology appeals to America's image of highly trained, elite Soldiers. There is, however, another Soldier who fights from the shadows. This one is perhaps less known and far less understood. His real weapons are a deep understanding of terrain, the relationships built, and the influence developed to motivate and train others to take up the fight. These Soldiers are the U.S. Army SF, the "quiet professionals" whom history and popular culture often overlook. Designed to organize, train, and support indigenous personnel in behind-the-lines resistance activities, SF belongs to an organization unique in the Army's history. Founded at the Psychological Warfare Center at Fort Bragg in 1952 and based upon lessons learned and formation used in guerrilla warfare during World War II, its sole purpose was UW. The experience in Vietnam gave SF a second purpose: countering a subversive insurgency. This brief history identifies the precursors and major developments that created modern U.S. Army SF. FM 3-18 is the principal manual for Special Forces (SF) doctrine. It describes SF roles, missions, capabilities, organization, mission command, employment, and sustainment operations across the range of military operations. Topics include: The History of Special Forces-World War II, The Cold War, and Modern Special Forces The Role of Special Forces Special Forces Guidance and Principal Tasks The Organization of Special Forces-US Special Operations Command and the John F. Kennedy Special Warfare Center and School Employment of Special Forces-County Teams, Theater of Operations,

Lawrence of Arabia meets Sebastian Junger's War in this unique, incendiary, and dramatic true story of heroism and heartbreak in Afghanistan written by a Pulitzer Prize-nominated war correspondent. Army Special Forces Major Jim Gant changed the face of America's war effort in Afghanistan. A decorated Green Beret who spent years in Afghanistan and Iraq training indigenous fighters, Gant argued for embedding autonomous units with tribes across Afghanistan to earn the Afghans' trust and transform them into a reliable ally with whom we could defeat the Taliban and counter al-Qaeda networks. The military's top brass, including General David Petraeus, commander of U.S. Forces in Afghanistan, approved, and Gant was tasked with implementing his controversial strategy. Veteran war correspondent Ann Scott Tyson first spoke with Gant when he was awarded the Silver Star in 2007. Tyson soon came to share Gant's vision, so she accompanied him to Afghanistan, risking her life to embed with the tribes and chronicle their experience. And then they fell in love. Illustrated with dozens of photographs, American Spartan is their remarkable story—one of the most riveting, emotional narratives of wartime ever published.

In 1950, when he commissioned the first edition of *The Armed Forces Officer*, Secretary of Defense George C. Marshall told its author, S.L.A. Marshall, that "American military officers, of whatever service, should share common ground ethically and morally." In this new edition, the authors methodically explore that common ground, reflecting on the basics of the Profession of Arms, and the officer's special place and distinctive obligations within that profession and especially to the Constitution.
