## GAMBLE OSBORN

38 The Process Of Digestion begins the process of mechanical digestion. mechanical digestion. the physical breakdown of large pieces of food into smaller pieces. chemical digestion. as you chew your food, digestive enzymes begin the breakdown of carbohydrates into smaller molecules. 38-2 The Process of Digestion Flashcards | Quizlet 38.2.1 Identify the organs of the digestive system. 38.2.2 Describe the function of the digestive system. If students have difficulty pronouncing any of the Vocabulary words, it may interfere with their comprehension. Read each of the words to the class and have students repeat them after you. Section 38-2 38-2 The Process of Digestion 38.2 the process of digestion. Terms in this set (19) What is the function of organs in the digestive system. To help convert food into simpler molecules; to make molecules easier to absorb and use. Mechanical digestion. The physical breakdown of large pieces of food into smaller pieces. Chemical digestion. 38.2 the process of digestion Flashcards | Quizlet The \_\_\_\_\_ is an accessory digestive organ associated with the small intestine. Its digestive function is to produce bile. Bile is the major vehicle for excreting cholesterol from the body and bile salts emulsify (break up) fats so that digestive enzymes can act on them. Ex.38 The Digestive System Flashcards | Quizlet Section 38-2, The Process of Digestion study guide by cassidysteeves514 includes 14 questions covering vocabulary, terms and more. Quizlet flashcards, activities and games

help you improve your grades. Section 38-2, The Process of Digestion Flashcards | Quizlet Most of the chemical digestion and absorption of the food you eat occurs in the small intestine. As chyme enters the duodenum from the stomach, it mixes with enzymes and digestive fluids from the pancreas, the liver, and even the lining of the duodenum itself. The pancreas and liver are shown in. Figure 38-13. 38-2 The Process of Digestion Section 38-2 digestion. 3. The breakdown of large food molecules into smaller molecules that can be absorbed into the bloodstream is called digestion. 4. Label the drawing of the digestive system with the following structures: mouth, esophagus, stomach, liver, small intestine, and large intestine. Salivary glands Pharynx Pancreas Gallbladder Rectum Chapter 38 Digestive and Excretory Systems Section 38-1 ... The process of digestion is a fascinating and complex one that takes the food we place in our mouth and turns it into energy and waste products. This process takes place in the gastrointestinal tract, a long, connected, tubular structure that starts with the mouth and ends with the anus. The Digestion Process Parts, Organs, and Functions After food enters your stomach, the stomach muscles mix the food and liquid with digestive juices. The stomach slowly empties its contents, called chyme, into your small intestine. Small intestine. The muscles of the small intestine mix food with digestive juices from the pancreas, liver, and intestine, ... Your Digestive System & How it Works | NIDDK The small intestine continues the process of breaking down food by using enzymes released by the pancreas and bile from the liver. Bile is a compound that aids in the digestion of fat

and eliminates waste products from the blood. Peristalsis (contractions) is also at work in this organ, moving food through... Digestive System (Anatomy): How It Works They produce substances that get dumped into the digestive tract to help with digestion), The small fingerlike projections on the inside of the small intestine that help increase absorption of food by increasing the surface area that food comes in contact with are called \_\_\_\_\_. Quia - Section 38.2: The Process of Digestion digestive organ in which most chemical digestion takes place pancreas gland that produces hormones that regulate blood sugar; enzymes that break down carbohydrates, proteins, lipids, and nucleic acids; and sodium bicarbonate, a base that neutralizes stomach acid Quia - Section 38.2: The Process of Digestion Digestive System Processes and Regulation. Learning Objectives. By the end of this section, you will be able to: ... Although there may be a tendency to think that mechanical digestion is limited to the first steps of the digestive process, it occurs after the food leaves the mouth, as well. Digestive System Processes and Regulation | Anatomy and ... 38-2 The Process Of Digestion; Lisa T. • 17 cards. Key Concepts. The digestive system includes the mouth, pharynx, esophagus, stomach, small intestine and large intestine. Several major accessory structures, including the salivary glands, the pancreas, and the liver, add secretions to the digestive system 38-2 The process of digestion - Biology with Boardman at ...
