The bold futurist and bestselling author of *The Singularity is Nearer* explores the limitless potential of reverse-engineering the human brain. Ray Kurzweil is arguably today's most influential—and often controversial—futurist. In *How to Create a Mind*, Kurzweil presents a provocative exploration of the most important project in human-machine civilization—reverse engineering the brain to understand precisely how it works and using that knowledge to create even more intelligent machines. Kurzweil discusses how the brain functions, how the mind emerges from the brain, and the implications of vastly increasing the powers of our intelligence in addressing the world's problems. He thoughtfully examines emotional and moral intelligence and the origins of consciousness and envisions the radical possibilities of our merging with the intelligent technology we are creating. Certain to be one of the most widely discussed and debated science books of the year, *How to Create a Mind* is sure to take its place alongside Kurzweil's previous classics which include *Fantastic Voyage: Live Long Enough to Live Forever* and *The Age of Spiritual Machines*.

Mind Your Thoughts Penguin

The world is simpler than it seems. Everything that happens occurs because of cause and effect. Eliminate the cause of relationship problems, poverty, health issues, and disharmony—and you change the effect. Too often, though, we look for external causes, when the true cause lies within our own all-powerful and divine subconscious minds. The universe is made up of interconnected energy—and what are our thoughts if not pure energy? Change the workings of your inner mind, and you can quite literally change your life. In *Sixth Sense*, noted holistic

success coach Eugene N. Nwosu provides a set of deceptively simple tools designed to help you "rewire" your subconscious mind, change your life, and acquire the enlightenment and wisdom vital for true balance, equilibrium, and success. Nwosu's practical affirmations help harness the mind's ability to operate in harmony with the unchanging rules of the infinite, divine universe. Simpler and easier to incorporate into everyday life than *The Secret* and its complexities, *Sixth Sense* frees you from the limitations of entrenched thought patterns, creating instead full engagement in your passions and dreams. Once properly aligned with the universe, you will succeed—all the time.

Success is measured not by the size of your brain, but rather by the size of your thinking. This intrigues a lot of people, and if you

observe how people behave, you will have a clear understanding of what success really means. Time and time again, history and experience have proved that the degree of our general satisfaction and happiness is dependent on how we think. There is magic in thinking big! Positive thinking helps accomplish so much in our life, but unfortunately not everyone thinks that way. We are all products of our thinking that goes within and around us. There is an environment around us that exerts all sorts of forces on your thinking; some will push you up the ladder while others will pull you down. We have been told many times that opportunities to lead are no longer there; hence we should be content with who we are without having positive aspirations on leadership. The petty environment surrounding us also has its own narrative concerning our lives. It constantly tells us that whatever is destined will eventually happen and we have no control over it. Leaving your fate in the hands of chance can potentially ruin your life and make you miserable. Therefore, before you start giving up your dreams of a finer home or giving a better life for your children, stand firm and resist resigning to fate. Do not lie down and wait to die. Success is worth every effort you expend, and every step you make pays a dividend. Even in an environment where competition is intense, you still can succeed as long as your thinking is in the positive quadrant of your mind frame. The basic concepts and principles that underlie the power of thinking big are drawn from the highest-pedigree sources and the finest thinking minds such as Emerson who said "Great men are those who see that thoughts rule the world." Milton who wrote in his book Paradise Lost, "The mind is its own place and in itself can make a heaven of hell or a hell of heaven." Shakespeare made an interesting observation about thinking which he summarized and said "There is nothing either good or bad except that thinking makes it so." Proof is everywhere that thinking big indeed works. When you look at the lives of people who you consider as big thinkers, you will be amazed at their winning success, happiness and achievements. This book will show you proven strategies from different life situations that will turn your life around.

Is it possible to make sense of something as elusive as creativity? Based on psychologist Scott Barry Kaufman's groundbreaking research and Carolyn Gregoire's popular article in the Huffington Post, *Wired to Create* offers a glimpse inside the "messy minds" of highly creative people. Revealing the latest findings in neuroscience and psychology, along with engaging examples of artists and innovators throughout history, the book shines a light on the practices and habits of mind that promote creative thinking.
