 Ducati stunned the world in 1988 when the struggling, small Italian firm unleashed its Desmoquattro -- 8-valve, desmodromic -- Superbike. The bike found success on the world's racetracks right from the start. Road-going versions soon carried that success to the general public, proving this design wasn't just another noisy prototype. The Superbikes -- 748, 851, 888, 916, and 996 -- are now Ducati's best-selling machines in the United States; and the Desmoquattro engine found its way into the company's more pedestrian series such as the Monster roadster and ST4 sport-tour. This is the comprehensive volume on Ducati's ultimate performance motorcycles and replaces the out-of-print Ducati Super Bikes: 851, 888, 916.

The most practical and sensible way to implement ERM-while avoiding all of the classic mistakes Emphasizing an enterprise risk management approach that utilizes actual business data to estimate the probability and impact of key risks in an organization, Practical Enterprise Risk Management: A Business Process Approach boils this topic down to make it accessible to both line managers and high level executives alike. The key lessons involve basing risk estimates and prevention techniques on known quantities rather than subjective estimates, which many popular ERM methodologies consist of. Shows readers how to look at real results and actual business processes to get to the root cause of key risks Explains how to manage risks based on an understanding of the problem rather than best guess estimates Emphasizes a focus on potential outcomes from existing processes, as well as a look at actual outcomes over time Throughout, practical examples are included from various healthcare, manufacturing, and retail industries that demonstrate key concepts, implementation guidance to get started, as well as tables of risk indicators and metrics, physical structure diagrams, and graphs.

The Story of Dizzy Dean and Baseball During the Great Depression One Point Six Technology Pvt Ltd
 At a moment of great discovery, one Big Idea can change the world... Today, computers touch every aspect of our lives and dominate the world of technology. They have revolutionised the modern age of communication and are arguably one of humankind's greatest achievements. To imagine a 21st Century existence without a computer seems impossible. Yet despite our utter reliance on computers, how much is really known about the way they work or their inventor, Alan Turing? Turing's work has lasting implications for our day-to-day lives as well as our first notions of artificial intelligence. Both engaging and accessible, Turing and the Computer pays homage to the extraordinary life and work of an intense and emotional man who struggled with discrimination from his peers and family, helped break the Enigma codes to win World War II, and invented the world's first computer...before being largely forgotten by the world. The Big Idea series is a fascinating look at the greatest advances in our scientific history, and at the men and women who made these fundamental breakthroughs.

For 100 years, the Isle of Man Tourist Trophy races have been the world's most dangerous organized sporting event. As one of thirty thousand fans who attended the annual spectacle, Mark Gardiner harbored no illusions about his own skill or bravery. He was, however, an avid motorcyclist for whom the race represented a boyhood dream. He went home, quit his job, sold everything he owned, and returned to the Island to race there himself. Riding Man is the account of an Everyman, struggling to qualify for -- and survive -- the TT races. If you're a dreamer, the lesson in this book is that the pursuit of any worthwhile goal involves risks, rewards and, almost inevitably some regrets. If you're not a dreamer, the lesson is more important: the deepest regrets are always over risks not taken.

The long-departed Steve McQueen is still the coolest man on two wheels. Get an intimate look at his coolest bikes right here, right now, in McQueen's Motorcycles. Even thirty years after his death, Steve McQueen remains a cultural icon. His image continues to appear in advertising and pop culture and his fan base spans from car lovers to racing enthusiasts to motorcycle obsessives. In his movies, McQueen's character always had an envy-inducing motorcycle or car, but in his personal life, motorcycles were always McQueen's first true love. McQueen's Motorcycles focuses on the bikes that the King of Cool raced and collected. From the first Harley McQueen bought when he was an acting student in New York to the Triumph "desert sleds" and Huskys he desert raced all over California, Mexico, and Nevada, McQueen was never without a stable of two wheelers. His need for speed propelled him from Hollywood into a number of top off-road motorcycle races, including the Baja 1000, Mint 400, Elsinore Grand Prix, and even as a member of the 1964 ISDT team in Europe. Determined to be ahead of the pack, McQueen maintained his body like it was a machine itself. He trained vigorously, weight lifting, running, and studying martial arts. Later in his life, as he backed away from Hollywood, his interests turned to antique bikes and he accumulated an extensive collection, including Harley-Davidson, Indian, Triumph, Brough Superior, Cyclone, BSA, and Ace motorcycles. Today, McQueen still has the Midas touch; anything that was in the man's possession is a hot commodity. McQueen's classic motorcycles sell for top dollar at auctions, always at a multiple of what the same bike is worth without the McQueen pedigree. McQueen's Motorcycles reveals these highly sought-after machines in gorgeous photography and full historical context.

The Red Baron's Ultimate Ducati Desmo Manual Motorbooks

The book deals with the identification of "identity" based on culturally specific color codes and images that conceal assumptions about members of a people comprising a nation, or a people within a nation. Flags narrate constructions of belonging that become tethered to negotiations for power and resistance over time and throughout a people's history. Bennet (2005) defines identity as "the imagined sameness of a person or social group at all times and in all circumstances". While such likeness may be imagined or even perpetuated, the idea of sameness may be socially, politically, culturally, and historically contested to reveal competing pasts and presents. Visually evocative and ideologically representative, flags are recognized symbols fusing color with meaning that prescribe a story of unity. Yet, through semiotic confrontation, there may be different paths leading to different truths and applications of significance. Knowing this and their function, the book investigates these transmitted values over time and space. Indeed, flags may have evolved in key historical periods, but contemporaneously transpire in a variety of ways. The book investigates these transmitted values: Which values are being transmitted? Have their colors evolved through space and time? Is there a shift in cultural and/or collective meaning from one space to another? What are

their sources? What is the relationship between law and flags in their visual representations? What is the shared collective and/or cultural memory beyond this visual representation? Considering the complexity and diversity in the building of a common memory with flags, the book interrogates the complex color-coded sign system of particular flags and their meanings attentive to a complex configuration of historical, social and cultural conditions that shift over time. Advance Praise for *Flags, Color, and the Legal Narrative* "In an epoch of fragmentation, isolation and resurgent nationalism, the flag is waved but often forgotten. The flag, its colors, narratives, shape and denotations go without saying. The red flag over China, the Star-Spangled Banner, the Tricolore are instantly recognisable and over determined, representing a people, a nation, a culture, languages, legacies, leaders. In this fabulous volume flags are revealed as concentrated, complex, chromatic assemblages of people, place and power in and through time. It is in bringing a multifocal awareness of the modes and meanings of flag and color in public representations that is particular strength. Editors Anne Wagner and Sarah Marusek have gathered critical thinkers from the North and South, East and West, to help know the essential and central - yet often forgotten and not seen - work of flags and color in narratives of nation, conflict, struggle and law. A kaleidoscopic contribution to the burgeoning field of visual jurisprudence, this volume is essential to comprehending the ocular machinery through which power makes, and is seen to make, the world."Kieran Tranter, Chair of Law, Technology and Future, Faculty of Law, Queensland University of Technology, Australia "This comprehensive volume of essays could not be arriving at a more opportune time. The combined forces of climate change, inequality, and pandemic are causing instability and painful recognitions of our collective uncertainties about nationhood and globalism. In the United States, where I am writing these few lines, our traditional red/white/blue flag has been collapsed into two colors: Red and Blue. While these colors have semiotically deep texts, the division of the country into these two colors began with television stations designing how to report the vote count in the 2000 presidential election year creating "red" and "blue" parties and states. The colors stuck and have become customary. We Americans are told all the time by pundits that we are a deeply divided nation, as proven by unobtrusive colored maps. To a statistician, we are a Purple America, though the color is unequally distributed. White, the color of negotiation and peace is rarely to be found. To begin to approach understanding the problems flagged in my brief account requires the insight of multiple disciplines. That is what Wagner and Marusek, wonderful scholars in their own work, have assembled as editors -- a conversation among scholars at the forefront of thinking about how flags and colors represent those who claim them thus exemplifying how to resist simple explanations and pat answers. The topic is just too important."Christina Spiesel, Senior Research Scholar in Law, Yale Law School; Adjunct Professor of Law, Quinnipiac University School of Law, USA "Visuals, such as symbols and images, in addition to conventional textual forms, seem to have a unique potential for the study of a collective identity of a community and its traditions, as well as its narratives, and at the same time, in the expression of one's ideas, impressions, and ideologies in a specific socio-political space. Visual analysis thus has become a well-established domain of investigations focusing on how various forms of text-external semiotic resources, such as culturally specific symbols, including patterns and colors, make it possible for scholars to account for and thus demystify discursive symbols in a wider social and public space. *Flags, Identity, Memory: Critiquing the Public Narrative through Colors*, as an international and interdisciplinary volume, is a unique attempt to demystify the thinking, values, assumptions and ideologies of specific nations and their communities by analyzing their choice of specific patterns and colors represented in a national flag. It offers a comprehensive and insightful range of studies of visual and hidden discursive processes to understand social narratives through patterns of colours in the choice of national flags and in turn to understand their semiotic, philosophical, and legal cultures and traditions. Wagner and Marusek provide an exclusive opportunity to reflect on the functions, roles, and limits of visual and discursive representations. This volume will be a uniquely resourceful addition to the study of semiotics of colours and flags, in particular, how nations and communities represent their relationship between ideology and pragmatism in the repository of identity, knowledge and history."Vijay K Bhatia, Chinese University of Hong Kong, Full Professor, Hong Kong "In all societies, colors play a critical function in the realm of symbolism. Nation societies perceive great significance in the colors of flags and national emblems. Colors constitute, in other words, sign systems of national identity. The relation of color codes and their relation to concepts of nationhood and its related narratives is the theme of this marvelous and eye-opening collection of studies. Flags are mini-texts on the inherent values and core concepts that a nation espouses and for this reason the colors that they bear can be read at many levels, from the purely representational to the inherently cultural. Written by experts in various fields this interdisciplinary anthology will be of interest to anyone in the humanities, social sciences, jurisprudence, narratology, political science, and semiotics. It will show how a seemingly decorative aspect of nationhood—the colors on flags—tells a much deeper story about the human condition."/divMarcel Danesi, University of Toronto, Full Professor of Anthropology, Canada/div
