Formation Processes Of
The Archaeological Site
Formation Processes
refers to the events that
created and affected an
archaeological site before,

during, and after its
occupation by humans. To
gain the best possible
understanding of an
archaeological site,
researchers collect
evidence of the natural
and cultural events that
happened there. The Site

Archaeological Record: Michael ...Formation processes are the events that affect how sites of human activity came to be buried and what happened to them afterwards. Each site has evidence of use and abandonment. Once the site ceases to have human activity present, it becomes subject to a myriad of events that dictate its potential survival and future in the archaeological record. Archaeological Formation Processes This handbook synthesizes the
