Raffaella A. Del Sarto examines the creation of Israel's neo-revisionist consensus about security threats and regional order, which took hold of Israeli politics and society after 2000 and persists today. The failed Oslo peace process and the trauma of the Second Palestinian Intifada triggered this shift to the right. Conflicts with Hamas and Hezbollah and Iran's inflammatory rhetoric later created a feeling of being under siege. While Israel faces real security threats, Israeli politics and society have also been besieged by the politics of the neo-revisionist right. Lively political debate has been replaced by a general acceptance of the no-compromise approach to security and the Palestinians. The right, represented by Benjamin

Netanyahu and Likud, has turned Israel away from the peace process and pushes maximalist territorial ambitions. But they have failed to offer a vision for an end to conflict, and there has been little debate about whether or not the hardline policies are counterproductive. Del Sarto explains this disappearance of dissent and examines the costs of Israel's policies. She concludes that Israel's feeling of being under siege has become entrenched, a two-state solution with the Palestinians is highly unlikely for the foreseeable future, and Israel's international isolation is likely to increase.

When confronted with the challenges of border security and illegal immigration, government officials are fond of saying that our borders have never been as safe and secure as they are now. But ranchers in the borderlands of Arizona and Texas fear for their lands, their cattle, their homes, and sometimes their lives due to the human and drug smuggling traffic that regularly crosses their property. Who is right? What does a secure border actually look like? More importantly, is a secure border a realistic goal for the United States? Border Insecurity examines all the aspects of the challenge—and thriving industry—of trying to keep terrorists, drug smugglers, and illegal immigrants from entering the United States across our land borders. It looks at on-the-ground issues and controversies like the border fence, the usefulness of technology, shifts in the connection between illegal immigration and drug

smuggling, and the potential for terrorists and drug cartels to work together. Border Insecurity also delves into how the border debate itself is part of why the government has failed to improve information sharing and why this is necessary to establish a clear and comprehensive border security strategy. The Challenges for Cities North and South Vintage In States of Global Insecurity, Daniel Béland undertakes a comparative, historical, and political analysis of state protection and the politics of insecurity surrounding it. By looking at four major economic, social, and environmental issues (mad cow disease, terrorism and aviation security, urban delinquency, and health care reform), the author expertly describes the political logics behind state making and the social construction of collective insecurity in the context of globalization. States of Global Insecurity can be used in a variety of courses, including introductory sociology, globalization, political sociology, social problems, social stratification, criminology, political science, and modern world history.

"Mel Goodman has spent the last few decades telling us what's gone wrong with American intelligence and the American military, and now, in *National Insecurity*, he tells us what we must do to change the way the system works, and how to fix it. Goodman is not only telling us how to save wasted billions--he is also telling us how to save ourselves." -- Seymour M. Hersh, *The New Yorker*

Upon leaving the White House in 1961, President Eisenhower famously warned Americans about the dangers of a "military industrial complex," and was clearly worried about the destabilizing effects of a national economy based on outsized investments in military spending. As more and more Americans fall into poverty and the global economy spirals downward, the United States is spending more on the military than ever before. What are the consequences and what can be done? Melvin Goodman, a twenty-four-year veteran of the CIA, brings peerless authority to his argument that US military spending is

indeed making Americans poorer and less secure while undermining our political standing in the world. Drawing from his firsthand experience with war planners and intelligence strategists, Goodman offers an insider's critique of the US military economy from President's Eisenhower's farewell warning to Barack Obama's expansion of the military's power. He outlines a much needed vision for how to alter our military policy, practices, and spending in order to better position the United States globally and enhance prosperity and security at home. Melvin A. Goodman is the Director of the National Security Project at the Center for International Policy. A former professor of international security at the National War College and an intelligence adviser to strategic disarmament talks in the 1970s, he is the author of several books, including the critically acclaimed *The Failure of Intelligence*. *Total Insecurity* Verso Books

Alan Watts is "the perfect guide for a course correction in life, away from materialism and its empty promise" (Deepak Chopra). Here he shows

us how—in an age of unprecedented anxiety—we must embrace the present and live fully in the now in order to live a fulfilling life. Spending all our time trying to anticipate and plan for the future and to lamenting the past, we forget to embrace the here and now. We are so concerned with tomorrow that we forget to enjoy today. Drawing from Eastern philosophy and religion, Alan Watts shows that it is only by acknowledging what we do not—and cannot—know that we can learn anything truly worth knowing. “Perhaps the foremost interpreter of Eastern disciplines for the contemporary West, Watts had the rare gift of ‘writing beautifully the unwritable.’” —Los Angeles Times

Threats of terrorism, natural disaster, identity theft, job loss, illegal immigration, and even biblical apocalypse—all are perils that trigger alarm in people today. Although there may be a factual basis for many of these fears, they do not simply represent objective conditions. Feelings of insecurity are instilled by politicians and the media,

and sustained by urban fortification, technological surveillance, and economic vulnerability. Surveillance in the Time of Insecurity fuses advanced theoretical accounts of state power and neoliberalism with original research from the social settings in which insecurity dynamics play out in the new century. Torin Monahan explores the counterterrorism-themed show 24, Rapture fiction, traffic control centers, security conferences, public housing, and gated communities, and examines how each manifests complex relationships of inequality, insecurity, and surveillance. Alleviating insecurity requires that we confront its mythic dimensions, the politics inherent in new configurations of security provision, and the structural obstacles to achieving equality in societies.

In this book, Ann Gordon and Kai Hamilton Gentry expertly illuminate how the public has a role to play in ensuring its own security. Recent terror attacks and mass shootings in the United States have added

urgency to the need for research on terrorism, the public's understanding of the precursors of terrorism and public preparedness for mass shootings and acts of terror. Unfortunately, most Americans do not understand what constitutes suspicious behavior or how to report it. Even more alarmingly, the public does not know what to do in the event of terrorist attack or mass casualty incident. Drawing on five years of the Chapman Survey of American Fears (CSAF), a nationally representative survey, and real-world events, Homeland InSecurity offers actionable solutions on how to educate the public to overcome fear and play an active role securing schools, public venues and the homeland itself. The book addresses proposals by survivors and victims' families to reduce violence through campaigns to deny shooters the notoriety they seek and reduce access to guns. It also explores the rise of activism among survivors of school shootings and their quest to educate the public and end school shootings. Homeland InSecurity will be essential for scholars, students, and

policy makers.

In the years since the 9/11 attacks—and the subsequent lethal anthrax letters—the United States has spent billions of dollars on measures to defend the population against the threat of biological weapons. But as Lynn C. Klotz and Edward J. Sylvester argue forcefully in *Breeding Bio Insecurity*, all that money and effort hasn't made us any safer—in fact, it has made us more vulnerable. *Breeding Bio Insecurity* reveals the mistakes made to this point and lays out the necessary steps to set us on the path toward true biosecurity. The fundamental problem with the current approach, according to the authors, is the danger caused by the sheer size and secrecy of our biodefense effort. Thousands of scientists spread throughout hundreds of locations are now working with lethal bioweapons agents—but their inability to make their work public

causes suspicion among our enemies and allies alike, even as the enormous number of laboratories greatly multiplies the inherent risk of deadly accidents or theft. Meanwhile, vital public health needs go unmet because of this new biodefense focus. True biosecurity, the authors argue, will require a multipronged effort based in an understanding of the complexity of the issue, guided by scientific ethics, and watched over by a vigilant citizenry attentive to the difference between fear mongering and true analysis of risk. An impassioned warning that never loses sight of political and scientific reality, *Breeding Bio Insecurity* is a crucial first step toward meeting the evolving threats of the twenty-first century.

 Americans are feeling insecure. They are retreating to gated communities in record numbers, fearing for their jobs and their 401(k)s, nervous about their health insurance and their debt levels, worrying about terrorist attacks and immigrants. In this

innovative volume, editors Hugh Gusterson and Catherine Besteman gather essays from nineteen leading ethnographers to create a unique portrait of an anxious country and to furnish valuable insights into the nation's possible future. With an incisive foreword by Barbara Ehrenreich, the contributors draw on their deep knowledge of different facets of American life to map the impact of the new economy, the "war on terror," the "war on drugs," racial resentments, a fraying safety net, undocumented immigration, a health care system in crisis, and much more. In laying out a range of views on the forces that unsettle us, *The Insecure American* demonstrates the singular power of an anthropological perspective for grasping the impact of corporate profit on democratic life, charting the links between policy and vulnerability, and envisioning alternatives to life as an insecure American.

 Since the end of the cold war, a series of costly civil

wars, many of them ethnic conflicts, have dominated the international security agenda. The international community, often acting through the United Nations or regional organizations like NATO, has felt compelled to intervene with military forces in many of these conflicts -- four of which comprise the heart of this book: Bosnia and Herzegovina, Somalia, Cambodia, and Rwanda. *Civil Wars, Insecurity, and Intervention* is a detailed examination by a host of distinguished scholars of these recent interventions in order to draw lessons for today's policy debates. The contributors view ethnic conflict and internal war through the prism of the concept of the security dilemma -- a situation in which parties with strong incentives to cooperate wind up nonetheless in bloody competition out of distrust of the opponent. *Civil Wars, Insecurity, and Intervention* assesses how international intervention can help solve the security dilemma in civil wars by designing political and military arrangements that make security commitments credible to the warring parties. The mixed record

of partial successes, failures, and in some cases counterproductive interventions suggests an urgent need to extract lessons with a view toward developing a framework for making future policy choices. [Fear, Migration and Asylum in the EU](#) Simon and Schuster

 Years of remodelling the welfare state, the rise of technology, and the growing power of neoliberal government apparatuses have established a society of the precarious. In this new reality, productivity is no longer just a matter of labour, but affects the formation of the self, blurring the division between personal and professional lives. Encouraged to believe ourselves flexible and autonomous, we experience a creeping isolation that has both

social and political impacts, and serves the purposes of capital accumulation and social control. In *State of Insecurity*, Isabell Lorey explores the possibilities for organization and resistance under the contemporary status quo, and anticipates the emergence of a new and disobedient self-government of the precarious.

 The Routledge International Handbook on Fear of Crime brings together original and international state of the art contributions of theoretical, empirical, policy-related scholarship on the intersection of perceptions of crime, victimisation, vulnerability and risk. This is timely as fear of crime has now been a focus of scholarly and policy interest for some fifty years and shows little sign of abating. Research on fear of crime is demonstrative of the inter-disciplinarity of criminology, drawing in the disciplines of

sociology, psychology, political science, history, cultural studies, gender studies, planning and architecture, philosophy and human geography. This collection draws in many of these interdisciplinary themes. This collection also extends the boundaries of fear of crime research. It does this both methodologically and conceptually, but perhaps more importantly it moves us beyond some of the often repeated debates in this field to focus on novel topics from unique perspectives. The book begins by plotting the history of fear of crime's development, then moves on to investigate the methodological and theoretical debates that have ensued and the policy transfer that occurred across jurisdictions. Key elements in debates and research on fear of crime concerning gender, race and ethnicity are covered, as are contemporary themes in fear of crime research, such as regulation, security, risk and the fear of terrorism, the mapping of fear of crime and fear of crime beyond urban landscapes. The final sections of the book explore geographies of fear and future and

unique directions for this research. *Border Insecurity* Harvard University Press This book demands that we question what we are told about security, using tools we have had for thousands of years. The work considers the history of security rhetoric in a number of distinct but related contexts, including the United States' security strategy, the "war" on Big Tech, and current concerns such as cybersecurity. Focusing on the language of security discourse, it draws common threads from the ancient world to the present day and the near future. The book grounds recent comparisons of Donald Trump to the Emperor Nero in a linguistic evidence base. It examines the potential impact on society of policy-makers' emphasis on the novelty of cybercrime, their likening of the internet to the Wild West, and their claims that criminals have "gone dark". It questions governments' descriptions of technology companies in words normally reserved for terrorists, and asks who might benefit. Interdisciplinary in approach, the book builds on existing

literature in the Humanities and Social Sciences, most notably studies on rhetoric in Greco-Roman texts, and on the articulation of security concerns in law, international relations, and public policy contexts. It adds value to this body of research by offering new points of comparison, and a fresh but tried and tested way of looking at problems that are often presented as unprecedented. It will be essential to legal and policy practitioners, students of Law, Politics, Media, and Classics, and all those interested in employing critical thinking.

The Politics of Innovation Independently Published "Violent Geographies is essential to understanding how the politics of fear, terror, and violence in being largely hidden geographically can only be exposed in like manner. The 'War on Terror' finally receives the coolly critical analysis its ritual invocation has long required." —John Agnew, Professor of Geography, UCLA "Urgent, passionate and deeply humane, Violent Geographies is uncomfortable but utterly compelling reading. An essential guide to a world splintered and wounded

by fear and aggression—this is geography at its most politically engaged, historically sensitive, and intellectually brave." —Ben Highmore, University of Sussex "This is what a 'public geography' should be all about: acute analysis of momentous issues of our time in an accessible language. Gregory and Pred have assembled a peerless group of critical geographers whose essays alter conventional understandings of terror, violence, and fear. No mere gazetteer, *Violent Geographies* shows how place, space and landscape are central components of the real and imagined practices that constitute organised violence past and present. If you thought terror, violence, and fear were the professional preserve of security analysts and foreign affairs experts this book will force you to think again." —Noel Castree, School of Environment and Development, Manchester University "A studied, passionate and moving examination of the way in which the violent logics of the 'War on Terror' have so quickly shuttered and reorganized the spaces of this planet on its different

scales. From the book emerges a critical new cartography that clearly charts an archipelago of a large multiplicity of 'wild' and 'tamed' places as well as 'black holes' within and between which we all struggle to live." —Eyal Weizman, Director, Goldsmiths College Centre for Research Architecture *The Wolf at the Door* Penguin This edited volume uses a 'constructivist/reflexive' approach to address critical infrastructure protection (CIP), a central political practice associated with national security. The politics of CIP, and the construction of the threat they are meant to counter, effectively establish a powerful discursive connection between that the traditional and normal conditions for day-to-day politics and the exceptional dynamics of national security. Combining political theory and empirical case studies, this volume addresses key issues related to protection and the governance of insecurity in the contemporary world. The contributors track the transformation and evolution of critical infrastructures (and closely related issues of

homeland security) into a security problem, and analyze how practices associated with CIP constitute, and are an expression of, changing notions of security and insecurity. The book explores aspects of 'securitisation' as well as at practices, audiences, and contexts that enable and constrain the production of the specific form of governmentality that CIP exemplifies. It also explores the rationalities at play, the effects of these security practices, and the implications for our understanding of security and politics today.

### **Frontiers of Fear**

Psychology Press The act of violence of 9/11 changed the global security agenda, catapulting terrorism to the top of the agenda. Weapons of mass destruction grabbed public interest and controlling the free movement of people became a national security priority. In this volume, Jef Huysmans critically engages with theoretical developments in international relations and security studies to develop a conceptual framework for studying security. He argues that security policies and

responses do not appear out of the blue, but are part of a continuous and gradual process, pre-structured by previous developments. He examines this process of securitization and explores how an issue, on the basis of the distribution and administration of fear, becomes a security policy. Huysmans then applies

this theory to provide a detailed analysis of migration, asylum and refuge in the European Union. This theoretically sophisticated, yet accessible volume, makes an important contribution to the study of security, migration and European politics.
