Adequate human resources, sustainable financing, comprehensive information systems, and coordinated healthcare partners

and institutions are key components to ensure uninterrupted availability and accessibility of essential medicines. WHO | Medicines Supply - World Health Organization Essential Medicines and Health Supplies List 2016 - Ministry of Health | Government of Uganda. It is the hope of the Ministry of Health that the updated essential medicines and health supplies list will be used by providers in both the public and private sectors, to assure the availability and use of quality, safe, efficacious and cost- effective medicines, health and laboratory supplies in Uganda. Essential Medicines and Health Supplies List 2016

...Our vision is that people everywhere have access to the essential medicines and health products they need; that the medicines and health products are safe, effective and of assured quality; and that medicines are prescribed and used rationally and that medical devices are used and managed effectively. WHO | Medicines and health products Essential Medicines Lists. Essential medicines are intended to be available within the context of functioning health systems at all times in adequate amounts, in the appropriate dosage forms, with assured quality, and at a price the individual and the community can afford. The Model List is a

guide for the development of national and institutional essential medicine lists. It was not designed as a global standard. WHO | Essential medicines In 2004, WHO stated that the lack of access to essential medicines remains one of the most serious global public health problems and identified the “careful selection of essential medicine [as] the first step in ensuring access.” 24 The importance of essential medicines lists will probably grow as countries move towards universal health coverage, as a part of achieving the sustainable ... WHO | Comparison of essential medicines lists in 137 countries Medicines are vital components of

patient care all over the world. World Health Organization (WHO) define essential medicines (EMs) as products that satisfy the priority healthcare needs of the population which should be available in the health facilities at all times in adequate amounts with affordable price by the community [1]. Ethiopia has a national drug policy aimed to ensure adequate supply ...Availability of essential medicines and pharmaceutical ...Essential Medical Supplies provides specialist care and residential home equipment in the North London, Herts, Beds Bucks and Essex region 01727 790675 • sales@essentialmedicalsupplies.co.uk HomeEssential Medical

Supplies care and residential home equipmentWHO Model Lists of Essential Medicines. The WHO Model Lists of Essential Medicines has been updated every two years since 1977. The current versions are the 21 st WHO Essential Medicines List (EML) and the 7 th WHO Essential Medicines List for Children (EMLc) updated in June 2019.. The 2019 Expert Committee on the Selection and Use of Essential MedicinesWHO | WHO Model Lists of Essential MedicinesThe essential medicines concept is a public health principle that promotes efficient use of resources by establishing and using a limited list of carefully selected medicines. By selecting

a few key medicines, better therapy, and easier supply, storage, and distribution, can be assured and medicines obtained at a lower cost.

**MANAGEMENT OF MEDICINES AND HEALTH SUPPLIES MANUAL**

Although most medicines are delivered via this route, provinces are increasingly relying on direct delivery of medicines from contracted suppliers to health facilities, which shortens the supply chain and removes risks and costs associated with warehousing . Buy-outs can however occur and this process is used by hospitals to purchase medicines appearing on the EML but not on tender. Medicine shortages and challenges with the

procurement

...Essential medicines are those that satisfy the priority health care needs of the population. They are selected with due regard to public health relevance, evidence on efficacy and safety, and comparative cost-effectiveness. Essential medicines are intended to be available within the context of functioning health systems at all times in adequate amounts, in the appropriate dosage forms, with assured quality and adequate information, and at a price the individual and the community can afford.
