SUSAN HOLT

Tunisia in the Kitab-i Bahriye by Piri Reis Springer Science & Business Media

Lists significant international films, with brief plot summaries, critical analyses, and listings of producers, directors, and actors

Art and Gentrification in the Changing Neoliberal Landscape John Wiley & Sons

4. Auflage dieses Klassikers und führenden Referenzwerks aus dem Bereich Sport-, Bewegungs- und Leistungspsychologie Die vollständige neue Ausgabe des Handbook of Sports Psychology, jetzt in 2 Bänden und mit unzähligen neuen Kapitel renommierter Wissenschaftler des Fachgebiets, greift auf eine Riege von Experten und Wissenschaftlern zurück, die ihr Wissen nach dem neuesten Forschungsstand in diesem gründlichen und zugänglichen Referenzwerk zusammenfassen. Die Publikation wird auch von der International Society of Sport Psychology unterstützt und ist eine unschätzbare Quelle für theoretische und praktische Informationen, mit denen sich die Rolle der Psychologie im Zusammenhang mit Sport, Bewegung und Leistung besser verstehen lässt und die zeigen, wie dieses Verständnis für die Ergebnisverbesserung in der Praxis Anwendung findet. Die 4. Auflage des Handbook of Sports Psychology präsentiert in acht Abschnitten neue Informationen zu neuen Gebieten, wie Achtsamkeit, Hirnaktivierung, Selbstbewusstsein, mentale Stärke, und behandelt Spezialthemen wie Geschlecht, kulturelle Diversität, Sportler mit Behinderungen, Alkohol und Drogen im Sport. Darüber hinaus werden klassische Themen erörtert, z. B. Motivationsauslöser für sportliche Leistungen, Druck als Ansporn, Topathleten und ihr Umgang mit Führungsrollen, Bedeutung von mentalem Training, Umgang mit Verletzungen u.v.m. - 4. Auflage diese einflussreichen Referenzwerks der Sportpsychologie. - Neue Inhalte, u. a. Achtsamkeit in der Sport- und Bewegungspsychologie, Ethik, mentale Stärke, Sportsozialisierung, Einsatz von Brain-Technologien in der Praxis. - Unterstützt von der International Society of Sport Psychology (ISSP). Die 4. Auflage des Handbook of Sports Psychology ist ein Muss für Studenten und Praktiker, die sich für Sportpsychologie interessieren.

Le Secret Des Compagnons Cordonniers Dévoilé Edward Elgar Publishing

Apart from considering classical theories of justice from Aristotle, Plato, Saint Thomas Aquinas, the Bible, and the Quran, the aim of Justice and Law is to focus on the contemporary vista, reviewing some of the modern ideas of justice advanced by legal philosophers of our time, such as John Rawls, Jürgen Habermas, Ronald Dworkin, Robert Nozick, Richard A. Posner, Wojciech Sadurski, Marxism, or Feminist Theories. In the second part of the work, María José Falcón y Tella deals with some of the principal themes relating to justice, such as punishment, civil disobedience, conscientious objection, just war, conflict of duties, and tolerance.

Critical Dictionary of Marxism BRILL

As the first volume in the Johannine Monograph Series, The Gospel of John: A Commentary by Rudolf Bultmann well deserves this place of pride. Indeed, this provocative commentary is arguably the

most important New Testament monograph in the twentieth century, perhaps second only to The Quest of the Historical Jesus by Albert Schweitzer. In contrasting Bultmann's and Schweitzer's paradigms, however, we find that Bultmann's is far more technically argued and original, commanding hegemony among other early-Christianity paradigms. Ernst Haenchen has described Bultmann's commentary as a giant oak tree in whose shade nothing could grow, and indeed, this reference accurately describes its dominance among Continental Protestant scholarship over the course of several decades.

Virtue and Ethics in the Twelfth Century Univ of California Press

The European Union has evolved from a purely economic organisation to a multi-faceted entity with political, social and human rights dimensions. This has created an environment in which the concept of solidarity is gaining a more substantial role in shaping the EU legal order. This book provides both a retrospective assessment and an outlook on the future possibilities of solidarity's practical and theoretical meaning and legal enforcement in the ever-changing Union.

Medical Image Computing and Computer-Assisted Intervention -- MICCAI 2012 Amer Society for Microbiology

Art and Gentrification in the Changing Neoliberal Landscape brings together various disciplinary perspectives and diverse theories on art's dialectical and evolving relationship with urban regeneration processes. It engages in the accumulated discussions on art's role in gentrification, yet changes the focus to the growing phenomenon of artistic protests and resistance in the gentrified neighborhoods. Since the 1980s, art and artists' roles in gentrification have been at the forefront of urban geography research in the subjects of housing, regeneration, displacement and new urban planning. In these accounts the artists have been noted to contribute at all stages of gentrification, from triggering it to eventually being displaced by it themselves. The current presence of art in our neoliberal urban spaces illustrates the constant negotiation between power and resistance. And there is a growing need to recognize art's shifting and conflicting relationship with gentrification. The chapters presented here share a common thesis that the aesthetic reconfiguration of the neoliberal city does not only allow uneven and exclusionary urban redevelopment strategies but also facilitates the growth of anti-gentrification resistance. The book will be of interest to scholars working in art history, urban cultures, cultural geography and urban studies as well as contemporary art practitioners and policymakers.

Parasitic Diseases Sixth Edition Martinus Nijhoff Publishers

Worldwide, the numbers of people suffering and dying from parasitic diseases are overwhelming, with more than 100 million cases and 1 million deaths each year from malaria alone. Despite the magnitude of the problem and the importance of the parasites that cause opportunistic infections among persons with HIV/AIDS, medical schools in the United States, Canada, and other developed countries consistently reduce the amount of time spent on parasitic diseases in the curriculum. As a result most medical students receive limited information about these diseases, and are inadequately prepared to diagnose or treat them as physicians. This problem is too large to be resolved within the

time available for parasitology in the medical school curriculum; at most, students can be acquainted with the salient features of the medically important parasites. Likewise, the traditional isolation of parasitology from the rest of the curriculum (consistent with its exclusion from most microbiology texts) is another unresolved problem. In my opinion, this is why most physicians are unable to think about the differential diagnosis of parasitic diseases in the same way that they routinely balance the probabilities of malignancy, cardiovascular, renal, and pulmonary disease vs other infectious diseases. To resolve these problems, relevant paradigms from parasitology must be used in the teaching of cell biology, molecular biology, genetics, and immunology.

The Anarchists DigiCat

Remarkable achievements in parasitic disease research, both basic and translational, have occurred over the last ten years, and we have incorporated the majority of these into the 6th edition of *Parasitic Diseases*. We have added over 1,000 new references to document these advances. Innovative work in the laboratory has provided the clinician/research scientist with a much clearer understanding of the mechanisms of pathogenesis. The number of recently discovered interleukins and their cellular networks has completely re-ordered our comprehension of how parasites and our defense system works to produce protection against infection/reinfection, or in some cases, how it becomes subverted by the offending pathogen to enable it to endure inside us for long periods of time. A plethora of molecular-based diagnostic tests have found their way into the routine of the parasitology diagnostic laboratory, improving the ease at which the offending pathogen can be rapidly identified. Newer drugs, many with less harmful side-effects than the ones they replaced, have come on the market that make controlling parasite populations at the community level possible without the risk of harming the very ones we wish to help.

The Living Text of the Gospels FIAF

Originally published in 1985, this book argues forcefully and practically for new relationship between science and the small farmer. It advocates scientific research seeking out changes which are already taking place within the smallholder farming sector and building on local initiatives. Drawing on his experience of West Africa, the author demonstrates that many of the most successful innovations in food-crop production during the 20th century have indigenous roots and that there should therefore be less emphasis on 'teaching' farmers how to farm and more emphasis on how to foster and support local adaptation and inventiveness. This book will be of interest to students of agriculture, environmental studies and rural development as well as those working with relief and development agencies.

Hybrid Vehicles Humanities Press International

The fast growth in world population and the associated energy requirements, the announced depletion of fossil fuel resources, the continuing rise in greenhouse gas (GHG) emissions with the induced climatic changes represent some of the major challenges to be taken up in the coming years and decades. Hybridization therefore typically represents a transition technology which can significantly improve the energy and environmental performance of current vehicles, without radically changing their use typologies, while opening the way to new propulsion modes for the longer term. It is nevertheless a complex subject requiring a multidisciplinary approach. This book, which is intended to be exhaustive, considers the vehicle, its components, their association and their

control, as well as the global balances determined over the vehicle lifetime. It starts with a general presentation of the various conditions of use of vehicles, to give readers an understanding of the stakes related to the development of hybrid vehicles and the methods used to compare the performance of the various solutions. The principles and the various types of internal combustion engine and electrical drives, onboard energy storage systems, principles, architectures, specific components and operation of hybrid drivetrains, as well as the energy management in these vehicles, are developed. A global analysis of the various drivetrains life cycle assessment (LCA), total costs and availability of sensitive materials is also provided. This book is intended for everyone involved in the design, manufacture and implementation of hybrid drive vehicles and their components. It will also be of interest to students, teachers and researchers wishing to acquire or further their knowledge in all fields impacted by drivetrain electrification. More globally, after consulting this book, readers will be in a position to evaluate the technologies related to the concept of drivetrain hybridization, their implementation, balances and generalization conditions. This book is available in French Under the title "Véhicules hybrides". Contents : 1. Vehicle use. 2. Internal combustion engines. 3. Electric drivetrain. 4. On-board energy storage systems. 5. Hybridization. 6. Control of hybrid vehicles. 7. Comparative study of hybrid vehicles: greenhouse gas emissions, energy consumption, and cost. Appendixes.

Italian Gelato Project. Ediz. Illustrata Cambridge University Press

This book represents an important departure in Gospel studies and textual criticism, providing an innovative introduction to the discipline.

Melodious Accord Routledge

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

The Rhind Mathematical Papyrus Editions TECHNIP

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a

rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

Solidarity in EU Law Oxford University Press, USA

Abstract: A collection of 23 papers concerning interrelationships of nutrition, physical status, and health are presented under 4 major categories by a range of experts for nutritionists, food scientists, and other health professionals. The number of papers are roughly balanced between the topics of: metabolic aspects of performance capability (considering food, energy, fluids, and nutrient intakes and body metabolic function); interactions between nutritional needs and various sports (young athletes, Polish physical education students, professional weightlifters); nutritional needs with respect to occupational activities in developing and developed countries; and nutrition, exercise, and health in situations of weight reducing programs, sedentary work conditions, and cardiovascular disorders. (wz).

Cinema All the Time University of Illinois Press

This book concerns an insufficiently recognized form of organized crime : crime-enterprises operating on the legitimate market under the veil of respectable companies. The volume concentrates on the situation in the European Union.

Organised Crime in Europe Franklin Classics Trade Press

DigiCat Publishing presents to you this special edition of "Travels through the Empire of Morocco" by John Buffa. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

Gabriel IndyPublish.com

Presents a people-centred approach to development.

Organized Crime in Europe Wipf and Stock Publishers

Until recently, collaborative authorship has barely been considered by scholars; when it has, the focus has been on discovering who contributed what and who dominated whom in the relationship and in the writing. In *Women Coauthors*, Holly Laird reads coauthored texts as the realization of new kinds of relationship. Through close scrutiny of literary collaborations in which women writers have played central roles, *Women Coauthors* shows how partnerships in writing - between two women or between a woman and a man - provide a paradigm of literary creativity that complicates traditional

views of both author and text and makes us revise old habits of thinking about writing. Focusing on the social dynamics of literary production, including the conversations that precede and surround collaborative writing, *Women Coauthors* treats its coauthored texts as representations as well as acts of collaboration. Holly A. Laird discusses a wide array of partial and full coauthorships to reveal how these texts blur or remap often uncanny boundaries of self, status, race, reason, and culture. that of the Delany sisters and Amy Hill Hearth on *Having Our Say*; lesbian couples whose lives and writings were intertwined, including Katherine Bradley and Edith Cooper (Michael Field) and Gertrude Stein and Alice B. Toklas; and the Native American wife-and-husband authors Louise Erdrich and Michael Dorris. Framed in time by the feminist and abolitionist movements of the mid-nineteenth century and the ongoing social struggles surrounding gender, race, and sexuality in the late twentieth century, the partnerships and texts observed in *Women Coauthors* explore collaboration as a path toward equity, both socioliterary and erotic. For the authors here who collaborate most fully with each other, two are much better than one.

Nutrition, Physical Fitness, and Health Berkeley : University of California Press

This volume analyses the renewal of Western moral thought in the twelfth century. This renewal was marked by a burgeoning of increasingly systematized texts, a lively reception of ancient moral philosophy and a greater emphasis on the psychology of the moral agent. Five contributions are devoted to monastic morality (Anselm of Canterbury, Bernard of Clairvaux, Hugh of Folieto, Hugh of Saint Victor, Peter Abelard); another five to (proto-)scholastic thought (John of Salisbury, Peter Abelard, Stephen Langton, the idea of natural virtue, the justification of lying); three discuss moral issues in a wider social context (liberality vs. avarice, royal justice in England, the cardinal virtues and the French monarchy). The two remaining contributions explore ethical traditions in Islamic and Jewish philosophy. With contributions by István P. Bejczy, Céline Billot-Vilandreau, Marcia L. Colish, Jeroen Laemers, John Kitchen, Cary J. Nederman, Richard G. Newhauser, Willemien Otten, Burcht Pranger, Riccardo Quinto, Ineke van 't Spijker, Arjo Vanderjagt, Björn Weiler and George Wilkes.

Indigenous Agricultural Revolution French & European Publications

The three-volume set LNCS 7510, 7511, and 7512 constitutes the refereed proceedings of the 15th International Conference on Medical Image Computing and Computer-Assisted Intervention, MICCAI 2012, held in Nice, France, in October 2012. Based on rigorous peer reviews, the program committee carefully selected 252 revised papers from 781 submissions for presentation in three volumes. The third volume includes 79 papers organized in topical sections on diffusion imaging: from acquisition to tractography; image acquisition, segmentation and recognition; image registration; neuroimage analysis; analysis of microscopic and optical images; image segmentation; diffusion weighted imaging; computer-aided diagnosis and planning; and microscopic image analysis.
