story of the third great Moghul emperor, Akbar, leader of a triumphant dynasty that contained the seeds of its own destruction. Akbar, ruler of a sixth of the world's people, colossally rich and utterly ruthless, was a contemporary of Elizabeth I, but infinitely more powerful. He extended his empire over much of Asia, skillfully commanding tens of thousands of men, elephants, and innovative technology. And despite the unimaginable bloodshed that resulted from it, his rule was based on universal religious tolerance. However, Akbar's home life was more complicated. He defied family, nobles, and mullahs to marry a

beautiful Rajput princess, whose people he had conquered; but she hated Akbar and turned Salim, his eldest son, against him. What's more, as any Moghul prince could inherit his father's crown and become emperor, his sons were brought up to be intensely competitive and suspicious of each other: to see each other as rivals for the greatest prize of all. And, as Salim grew to manhood, the relationship between father and son became tainted by rebellion and competition to be the greatest Moghul of them all.

This book argues that the periodic ceremonial intrusion into the everyday lives of people across the Ottoman Empire, which the annual royal birthday and accession-day celebrations constituted, had multiple, far-reaching and largely unexplored consequences. On the one hand, it brought ordinary subjects into symbolic contact with the monarch and forged lasting vertical ties of loyalty to him, irrespective of language, location, creed or class. On the other hand, the rounds of royal celebration played a key role in the creation of new types

of horizontal ties and ethnic group consciousness that crystallized into national movements and, after the empire's demise, national monarchies.

Moctezuma: Aztec Ruler Harper Collins

In *The Rule of Empires*, Timothy Parsons gives a sweeping account of the evolution of empire from its origins in ancient Rome to its most recent twentieth-century embodiment. He explains what constitutes an empire and offers suggestions about what empires of the past can tell us about our own historical moment. Parsons uses imperial examples that stretch from ancient Rome, to Britain's "new" imperialism in Kenya, to the Third Reich to parse the features

common to all empires, their evolutions and self-justifying myths, and the reasons for their inevitable decline. Parsons argues that far from confirming some sort of Darwinian hierarchy of advanced and primitive societies, conquests were simply the products of a temporary advantage in military technology, wealth, and political will. Beneath the self-justifying rhetoric of benevolent paternalism and cultural superiority lay economic exploitation and the desire for power. Yet imperial ambitions still appear viable in the twenty-first century, Parsons shows, because their defenders and detractors alike employ abstract and romanticized perspectives that fail

to grasp the historical reality of subjugation. Writing from the perspective of the common subject rather than that of the imperial conquerors, Parsons offers a historically grounded cautionary tale rich with accounts of subjugated peoples throwing off the yoke of empire time and time again. In providing an accurate picture of what it is like to live as a subject, *The Rule of Empires* lays bare the rationalizations of imperial conquerors and their apologists and exposes the true limits of hard power. **100 Great Kings, Queens and Rulers of the World Empire of the Moghul** "Existing from the early third century BC to 63 BC, the Mithridatic

kingdom of Pontus was one of the most powerful entities in the Mediterranean world. Under a series of vigorous kings and queens, it expanded from a fortress in the mountainous territory of northern Asia Minor to rule almost all the Black Sea perimeter. This is the first study in English of this kingdom in its entirety, from its origins under King Mithridates I around 280 BC until its last and greatest king, the erudite and cultured Mithridates VI the Great, fell victim to the expanding ambitions of the Roman Republic in 63 BC. Through a series of astute marriage alliances (one of which produced the ancestors of Cleopatra of Egypt), political acumen, and military ability, the Pontic

rulers (most of whom were named Mithridates) dominated the culture and politics of the Black Sea region for over 200 years. There is a thorough exploration of the internal dynamics of the kingdom as well as its relations with the rest of the Mediterranean world, especially the ever-expanding Roman Republic"--

 By delving into the complex, cross-generational exchanges that characterize any political project as rampant as empire, this thought-provoking study focuses on children and their ambivalent, intimate relationships with maps and practices of mapping at the dawn of the "American

Century." Considering children as students, map and puzzle makers, letter writers, and playmates, Mahshid Mayar interrogates the ways turn-of-the-century American children encountered, made sense of, and produced spatial narratives and cognitive maps of the United States and the world. Mayar further probes how children's diverse patterns of consuming, relating to, and appropriating the "truths" that maps represent turned cartography into a site of personal and political contention. To investigate where in the world the United States imagined itself at the end of the nineteenth century, this book calls for new modes of mapping the United States as it

studies the nation on regional, hemispheric, and global scales. By examining the multilayered liaison between imperial pedagogy and geopolitical literacy across a wide range of archival evidence, Mayar delivers a careful microhistorical study of U.S. empire.

We live in the 'urban century'. Cities all over the world - in both developing and developed countries - display complex evolutionary patterns. *Urban Empires* charts the backgrounds, mechanisms, drivers, and consequences of these radical changes in our contemporary systems from a global perspective and analyses the dominant position of modern cities in the 'New Urban World'. This volume views the

drastic change cities have undergone internationally through a broad perspective and considers their emerging roles in our global network society. Chapters from renowned scholars provide advanced analytical contributions, scaling applied and theoretical perspectives on the competitive profile of urban agglomerations in a globalizing world. Together, the volume traces and investigates the economic and political drivers of network cities in a global context and explores the challenges over governance that are presented by megacities. It also identifies and maps out the new geography of the emergent 'urban century'. With

contributions from well-known and influential scholars from around the world, Urban Empires serves as a touchstone for students and researchers keen to explore the scientific and policy needs of cities as they become our age's global power centers.

The late antique and early medieval Mediterranean was characterized by wide-ranging cultural and linguistic diversity. Yet, under the influence of Christianity, communities in the Mediterranean world were bound together by common concepts of good rulership, which were also shaped by Greco-Roman, Persian,

Caucasian, and other traditions. This collection of essays examines ideas of good Christian rulership and the debates surrounding them in diverse cultures and linguistic communities. It grants special attention to communities on the periphery, such as the Caucasus and Nubia, and some essays examine non-Christian concepts of good rulership to offer a comparative perspective. As a whole, the studies in this volume reveal not only the entanglement and affinity of communities around the Mediterranean but also areas of conflict among Christians and between Christians and other cultural traditions. By gathering various specialized

studies on the overarching question of good rulership, this volume highlights the possibilities of placing research on classical antiquity and early medieval Europe into conversation with the study of eastern Christianity.

Fifteen thousand years ago, in the period between the glacial eras, a great war broke out. The mentalities that lived at that time were divided into groups and fought against each other with the aim of defending their ideologies, using armies of zombies, golems the size of skyscrapers and erupting volcanoes as well as the sea itself to

achieve it as they divided the whole world into three gigantic empires, the empires of lightning, fire and water. Thus becoming its rulers. How could a family have been dysfunctional enough to generate such chaos? And what about lovers, rivals, brothers and friends? If you had been one of them for what reason would you have chosen your side? Because he was the one who defended the ideas you believed in or because he was the one where the people you loved were? It is in the middle of this context that Laura and the fire family raised up as an important military clan and after the agreement they made with the white demon, they become the most powerful

between all clans having kept "the peace" within their world for more than two thousand years now, but nothing lasts forever and there are olds and news enemies now in the frontiers of the fire empire, disposed to turn over their game.

The Fall of an Empire and the Fate of America

Four centuries ago, a Muslim woman ruled an empire. When it came to hunting, she was a master shot. As a dress designer, few could compare. An ingenious architect, she innovated the use of marble in her parents' mausoleum on the banks of the

Yamuna River that inspired her stepson's Taj Mahal. And she was both celebrated and reviled for her political acumen and diplomatic skill, which rivaled those of her female counterparts in Europe and beyond. In 1611, thirty-four-year-old Nur Jahan, daughter of a Persian noble and widow of a subversive official, became the twentieth and most cherished wife of the Emperor Jahangir. While other wives were secluded behind walls, Nur ruled the vast Mughal Empire alongside her husband, and governed in his stead as his health failed and his attentions wandered from matters of state. An astute politician and devoted partner, Nur led troops into battle to free Jahangir when he

was imprisoned by one of his own officers. She signed and issued imperial orders, and coins of the realm bore her name. Acclaimed historian Ruby Lal uncovers the rich life and world of Nur Jahan, rescuing this dazzling figure from patriarchal and Orientalist clichés of romance and intrigue, and giving new insight into the lives of women and girls in the Mughal Empire, even where scholars claim there are no sources. Nur's confident assertion of authority and talent is revelatory. In *Empress*, she finally receives her due in a deeply researched and evocative biography that awakens us to a fascinating history.

Revelations

Routledge

The first book in the

Empire of the Moghul series: chronicling the rise and fall of the Moghul rulers of India, beginning with Babur who swept in from Central Asia to found one of the most powerful dynasties in history. 1494, and the new ruler of Ferghana, twelve-year-old Babur, faces a seemingly impossible challenge. Babur is determined to equal his great ancestor, Tamburlaine, whose conquests stretched from Delhi to the Mediterranean, from wealthy Persia to the wild Volga. But he is dangerously young to inherit a crown and treasonous plots, tribal rivalries, rampaging armies and ruthlessly ambitious enemies will threaten his destiny, his kingdom, even his survival.

The First World Empire, Battle for the West

Some of the most fascinating human epochs lie in the borderlands between history and mystery. So it is with the life of Cyrus the Great, founder of the Persian Empire in the sixth century bce. By conquest or gentler means, he brought under his rule a dominion stretching from the Aegean Sea to the Hindu Kush and encompassing some tens of millions of people. All across this immense imperium, he earned support and stability by respecting local customs and religions, avoiding the brutal ways of tyranny,

and efficiently administering the realm through provincial governors. The empire would last another two centuries, leaving an indelible Persian imprint on much of the ancient world. The Greek chronicler Xenophon, looking back from a distance of several generations, wrote: "Cyrus did indeed eclipse all other monarchs, before or since." The vision of the biblical prophet known as Second Isaiah anticipates Cyrus' repatriation of Jews living in exile in Babylon with these words of the Lord: "He is my shepherd and will accomplish all that I please." Despite what he achieved and bequeathed, much about Cyrus remains uncertain. Persians of

his era had no great respect for the written word and kept no annals. The most complete accounts of his life were composed by Greeks. More fragmentary or tangential evidence takes many forms - among them, archaeological remains, administrative records in subject lands, and the always tricky stuff of legend. Given these challenges, *Discovering Cyrus: The Persian Conqueror Astride the Ancient World* is a remarkable feat of portraiture. In his vast sweep, Reza Zarghamee draws on sources of every kind, painstakingly assembling detail, and always weighing evidence carefully where contradictions arise. He describes the

background of the Persian people, the turbulence of the times, and the roots of Cyrus' policies. His account of the imperial era itself delves into religion, military methods, commerce, court life, and much else besides. The result is a living, breathing Cyrus standing atop a distant world that played a key role in shaping our own.

intrigue and magical, martial-arts action. For a thousand years the ash fell and no flowers bloomed. For a thousand years the Skaa slaved in misery and lived in fear. For a thousand years the Lord Ruler, the "Sliver of Infinity," reigned with absolute power and ultimate terror, divinely invincible. Then, when hope was so long lost that not even its memory remained, a terribly scarred, heart-broken half-Skaa rediscovered it in the depths of the Lord Ruler's most hellish prison. Kelsier "snapped" and found in himself the powers of a Mistborn. A brilliant thief and natural leader, he turned his talents to the ultimate caper, with the Lord Ruler himself as the mark. Kelsier recruited

the underworld's elite, the smartest and most trustworthy allomancers, each of whom shares one of his many powers, and all of whom relish a high-stakes challenge. Only then does he reveal his ultimate dream, not just the greatest heist in history, but the downfall of the divine despot. But even with the best criminal crew ever assembled, Kel's plan looks more like the ultimate long shot, until luck brings a ragged girl named Vin into his life. Like him, she's a half-Skaa orphan, but she's lived a much harsher life. Vin has learned to expect betrayal from everyone she meets, and gotten it. She will have to learn to trust, if Kel is to help her master powers of which she never
