Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasts, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

Federal Register Plunkett Research, Ltd. Im Jahr 2010 wurden weltweit rund 78 Mio. Kraftfahrzeuge produziert, die Gesamtproduktion von Kraftfahrzeugen in Deutschland belief sich auf fast 6 Mio. Einheiten. Damit beträgt der Anteil der

Automobilindustrie am Gesamtumsatz der Industrie in Deutschland etwa 21%. Circa 750.000 Personen sind derzeit direkt in der Automobilbranche beschäftigt. Insgesamt betrachtet, hängen sogar rund 5,3 Mio. Arbeitsplätze in Deutschland in irgendeiner Form vom Automobil ab. Diese Zahlen belegen die wirtschaftliche Bedeutung der Automobilindustrie und damit wird klar, dass unternehmerische Fehlentscheidungen in diesem Industriezweig weitreichende Folgen haben können. Vor allem die Möglichkeit, die Flop-Risiken in der Automobilindustrie sehr praxisnah untersuchen zu können, brachte mich zu der Wahl dieses Untersuchungsthemas. *Foreign Service Journal* Haynes Manuals N. Manners for Today HarperCollins Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and

supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.
