Water Quality

Management covers
the fundamentals of
water quality; water
quality modeling and
systems analysis of
streams, reservoirs,
and estuaries; and
practical water quality
topics and problems.
The book presents
topics on the legal
aspects; the physical,
chemical, and
biological dimensions
of water quality; and
water quality
requirements. The text
also describes the
pollution inputs from
both point and
nonpoint sources;
eutrophication; thermal

pollution; and
groundwater quality.
Detailed discussions on
water quality
parameters and
characteristics;
hydrologic and
hydraulic aspects of
water quality; mixing;
and simple and
complex water quality
models are also
included. The book
further tackles topics
on waste assimilative
capacity
determination, as well
as effluent outfall
design. Practicing
environmental
engineers and
professionals involved
in pollution abatement
programs,
environmental
students undertaking
studies in water quality
management, and
professionals involved
in water quality
management or water
resources problems will

find the text quite.

The Recipe for Living Without Disease

Pearson

This groundbreaking text provides background theory on the concept of sustainable development (environmental, social and economic aspects) and presents a series of practical case studies on such topics as waste water management, air quality, solid waste management and renewable energy.

TABANGUN ACEH - EDISI 48 UGM PRESS Momentum Ekonomi Islam Keputusan Rapat

Umum Pemegang Saham Luar Biasa (RUPSLB) PT Bank Aceh yang dipimpin oleh Gubernur Zaini Abdullah pada penghujung Mei lalu membawa angin segar bagi implementasi ekonomi syariah di Aceh. Keputusan RUPSLB ini dengan resmi menetapkan konversi Bank Aceh yang selama ini beroperasi secara konvensional menjadi bank berbasis pada sistem syariah. Ditargetkan keseluruhan proses konversi ini akan rampung dalam 1-2 tahun kedepan. Keputusan ini adalah wujud nyata dari komitmen pemerintah Aceh dalam mendukung terwujudnya nilai-nilai kehidupan Islami dalam berbagai sendi

kehidupan rakyat Aceh. Dengan konversi ini fungsi perbankan Bank Aceh akan dijalankan dengan sistem bagi hasil, tidak dengan sistem bunga yang masuk dalam kategori riba dan haram hukumnya dalam Islam. Dalam konteks yang lebih luas kebijakan Pemerintah Aceh ini sejalan dengan trend ekonomi Islam saat ini yang terus berkembang dengan pesat, ditandai dengan makin maraknya lembaga-lembaga perekonomian baik bisnis maupun keuangan yang melaksanakan usahanya dengan berdasarkan pada sistem syariah, seperti bank syariah, asuransi, hotel syariah, dll. Kedepan pemerintah Aceh tentu akan terus berupaya untuk

meningkatkan peran Bank Aceh dalam mendorong dan memberikan kontribusi positif bagi pembangunan perekonomian Aceh hingga bisa menjadi contoh secara nasional bagi implementasi perbankan syariah di Indonesia. Untuk mencapai target ini, salah satu syarat utama yang menentukan kesiapan agenda ini adalah kesiapan SDM. Oleh karena itu sejalan dengan penekanan Gubernur Zaini Abdullah, Pemerintah Aceh selaku pemilik saham mayoritas akan membentuk Tim Internal Pemerintah Aceh yang diisi oleh para profesional yang loyal, berintegritas, dan memiliki disiplin profesi yang tinggi. Insya Allah dengan kebijakan

konversi dan penguatan aspek SDM ini Bank Aceh, Bank kebanggaan Pemerintah Aceh ke depan dalam menjalankan perannya secara maksimal sebagai bank pembangunan daerah dan memberi kontribusi positif dalam mendongkrak perekonomian Aceh dengan bernafaskan pada nilai-nilai Islami. abubakar karim The Last Stand of the Orangutan UNEP/Earthprint In the study of civil society and social movements, most cases are based in Western Europe and North America. These two areas of the world have similar histories and political ideals and structures in common which in turn, affect the structure of its civil

society. In studying civil society in Asia, a different understanding of history, politics, and society is needed. The region's long traditions of centralized, authoritarian states buttressed by Confucian and in some cases Communist ideologies may render this concept irrelevant. The chapters in this international volume cover most of the areas and countries traditionally defined as belonging to East Asia: Japan, Taiwan, South Korea, Hong Kong, Singapore and China. The case studies included in this volume confront the utility of using the Western concept of civil society, represented in its most active form - social movements - to think about East Asia popular politics. Along

with providing an array of important case studies of social movements in East Asia, the introduction, chapters and conclusion in the book take up three major theoretical questions: the effect of the East Asian cultural, social and institutional context upon the mobilization, activities and outcomes of social movements in that region, the role of social movements in larger transformative processes, utility of Western social movement concepts in explaining social movements in East Asia. This book will be of interest to two major groups of readers, those who study East Asia and those who pursue social movements and civil society, as well as

politics more generally. Trends and Implications for Local Communities and Indigenous Peoples John Wiley & Sons Investigative reporting of the unsolved murder case of Indonesian slain journalist Fuad Muhammad Syafruddin, 1964-1996, believed to have been killed for his investigations into corruption of the district head of Bantul, Yogyakarta.

Water Quality Management Analisis Mengenai Dampak Lingkungan dalam Pembangunan Berbagai Sektor Analisis Mengenai Dampak Lingkungan dalam Pembangunan Berbagai Sektor UGM PRESS

Indonesia di Panyingkul! CIFOR Di Indonesia, fenomena

Daerah Aliran Sungai (DAS) kritis merupakan masalah lingkungan yang cukup serius. Ini dapat dilihat dari data di mana DAS kritis di Indonesia mengalami peningkatan jumlah dari tahun ke tahun. Pada 1984 tercatat ada 22 DAS berstatus kritis. Pada 1992, DAS kritis meningkat menjadi 39 dan pada 1998 menjadi 42. Sementara itu, pada 2000 meningkat menjadi 59 dan pada 2002 naik menjadi 60. Pada 2005 jumlah DAS kritis di Indonesia mencapai 62 DAS dan pada 2008 meningkat menjadi 291. Terjadinya peningkatan DAS kritis ini disebabkan oleh pelbagai faktor, di antaranya penggunaan lahan yang masif untuk berbagai kepentingan, seperti lahan pertanian, perkebunan,

pertambangan, dan permukiman. Kondisi DAS yang semakin kritis dan luas membutuhkan perhatian yang serius dari berbagai pihak. Buku ini hadir meletakkan pengelolaan DAS dalam paradigma pembangunan yang berkelanjutan. Dalam paradigma ini, pengelolaan DAS tidak dilihat semata dari segi kepentingan ekonomi, akan tetapi juga dilihat dari kepentingan ekologi dan sosial. Di samping itu, dalam paradigma ini, pengelolaan DAS bukan hanya diarahkan pada pemenuhan kebutuhan generasi sekarang atas sumber daya air, melainkan juga diorientasikan untuk ketersediaan sumber daya air bagi generasi mendatang.

Buku ini sangat cocok bagi mahasiswa, dosen, pegiat lingkungan, dan perwakilan pemerintah yang memiliki keterkaitan dengan pengelolaan DAS maupun sumberdaya alam lainnya.

Citizen and City in the Year 2000 John

Wiley & Sons

The second Sustainability Report of the Asian Development Bank (ADB) offers easily accessible information on ADB's policies, programs, and practices as they relate to the social and environmental sustainability of development in Asia and the Pacific, and on changes in this work that have occurred since ADB published its first Sustainability Report, in 2007. The report also documents

ADB's continuing efforts to minimize its corporate environmental impact, especially at its Manila headquarters. For comparability, ADB's current Sustainability Report is structured similarly to its first. Both reports respond to the latest guidelines of the Global Reporting Initiative while adapting to the particular characteristics of ADB's work and the many different audiences interested in the information presented.

Performance Improvement

Planning Carnelian Bay Castle Press, LLC

This is a study of the management problems experienced by selected metropolitan cities in South and East Asia and of the

approaches adopted in resolving them. Although the region contains many of the world's developing countries, it is not an exception to the universal trends in urbanization, which have had a massive impact on its metropolitan cities. Apart from Tokyo, the cities concerned tend to dominate the economic and political scene in their respective countries, but for the purposes of this discussion it is not inappropriate to refer to them and the problems they face as being broadly metropolitan. Urban geographers and planners now tend to use the term 'metropolitan' to refer to a large identifiable area of continuous urbanization consisting

of several administrative jurisdictions. Demographers today often classify cities with populations of more than one million people as metropolitan, and in common usage the term is widely employed to symbolize social, economic, and political status. All of these characteristics apply to the cities studied here.

The Microbiology of Anaerobic Digesters
John Wiley & Sons

This country profile reviews the drivers of deforestation and forest degradation in Indonesia, sets out the institutional, political and economic environment within which REDD+ is being implemented in Indonesia, and documents the process

of national REDD+ policy development during the period 2007 – early 2012. While Indonesia is committed at the national and international level to addressing climate change through the forestry sector, there are clearly contextual challenges that need to be addressed to create the enabling conditions for REDD+. Some of the major issues include inconsistent legal frameworks, sectoral focus, unclear tenure, consequences of decentralisation, and weak local governance. Despite these challenges, however, REDD+ opens up an opportunity for improvements in forest governance and, more broadly, in land use governance. More democratic political-economic processes in

general, greater freedom of civil society and the press, and heightened awareness of environmental issues can help build support and solidify policies in this direction.

 Analisis Mengenai Dampak Lingkungan adalah proses yang menghasilkan dokumen yang dibutuhkan dalam kegiatan pembangunan. Dokumen ini berisi kajian dampak lingkungan yang memenuhi dua aspek, yaitu aspek regulatif dan aspek ilmiah. Sebagai suatu dokumen yang berlandaskan regulasi dapat dipergunakan untuk mempertimbangkan kebijakan pembangunan. Sementara sebagai suatu dokumen ilmiah, substansinya bersifat objektif, logis, dan universal serta memenuhi kaidah

epistemologi, ontologi dan aksiologi. Dalam buku ini, diberikan landasan kebijakan berupa berbagai regulasi yang terkait dengan pembangunan sektoral. Pembangunan sektoral mempunyai macam kegiatan yang sangat banyak. Di samping itu, ada yang paling sederhana tetapi ada juga yang paling kompleks. AMDAL yang paling sederhana hingga yang paling kompleks, yaitu AMDAL tipe Tunggal, Kawasan, dan AMDAL Terpadu yang paling rumit. Ketiganya diuraikan landasannya dan berbagai contoh aplikasinya. Proyek pembangunan di Indonesia sangat beraneka ragam macam dan lokasinya. Oleh karenanya contoh yang diberikan hanya bersifat umum

sehingga untuk rencana pembangunan dengan ekosistem, biosistem dan sosiosistem yang berbeda harus dilakukan penyesuaian. Menyadari akan banyaknya metodologi ANDAL maka dalam buku ini diberikan contoh metode yang paling sederhana dan mudah diikuti. Metode yang paling sederhana dan mudah yaitu metode Matriks Interaksi. Semoga bermanfaat. [UGM Press, UGM, Gadjah Mada University Press] *Maqasid Al-shariah as Philosophy of Islamic Law* International Institute of Islamic Thought (IIIT) In this path breaking study, Jasser Auda presents a systems approach to the philosophy and juridical theory of

Islamic law based on its purposes, intents, and higher objectives (maqasid). For Islamic rulings to fulfill their original purposes of justice, freedom, rights, common good, and tolerance in today's context, Auda presents maqasid as the heart and the very philosophy of Islamic law. He also introduces a novel method for analysis and critique, one that utilizes relevant features from systems theory, such as, wholeness, multidimensionality, openness, and especially, purposefulness of systems. This book will benefit all those interested in the relationship between Islam and a wide variety of subjects, such as philosophy of law, morality, human

rights, interfaith commonality, civil society, integration, development, feminism, modernism, postmodernism, systems theory, and culture.

Anaerobic digestion is a biochemical degradation process that converts complex organic material, such as animal manure, into methane and other byproducts. Part of the author's Wastewater Microbiology series, Microbiology of Anaerobic Digesters eschews technical jargon to deliver a practical, how-to guide for wastewater plant operators.

Mimbar Jatim Springer

Science & Business Media

This publication has been carried out on behalf of the Great Ape Survival Partnership (GRASP), established by UNEP and UNESCO in collaboration with a wide range of non-governmental organisations in response to growing concern over the plight of the orangutan, the chimpanzee, the bonobo and the gorilla. The report used the latest satellite imagery and data from the Government of Indonesia to assess changes in the forests of one part of south-east Asia. The results indicate that illegal logging, fires and the plantation of crops such as palm oil are intruding extensively into Indonesia's national parks, the last

safehold of the orangutan. The orangutans share this habitat with a wild range of other threatened and

ecologically important species including the Sumatran tiger, Sumatran rhinoceros and Asian elephant.
