Nicholas George
Malavis's well-reasoned
and sophisticated
study of the
development of
petroleum regulation
offers historical and

legal analysis of the
basic issues affecting
property rights and the
public interest and
traces the legal moves
that shaped a new
regulatory system
centered around the
Texas Railroad
Commission. It
provides a fascinating
view of the multiple
roles of lawyers in
putting the new system
in place as they
worked for a variety of
clients to resolve the
serious conflicts
plaguing the oil
industry in its efforts to
manage
overproduction in the
1920s and 1930s.
Access to the internal
records of Vinson and
Elkins has allowed
Malavis to provide
readers a rare view

inside the world of lawyer-client relations. He describes how prominent attorney James Elkins and others applied their legal talents, negotiating skills, and political influence to fight for solutions to the problems that would help define the parameters of the new prorating system. *Medical Times* John Wiley & Sons Oil & Gas Journal Data Book Iowa State Gazetteer and Business Directory The Chemical Trade Journal e-artnow George Rawlinson (1812 - 1902) was a 19th-century English scholar, historian, and Christian theologian.
