 Introduction to Maternity and Pediatric Nursing - E-Book National Academies Press  
 Part of the popular LPN Threads series, Introduction to Maternity ; Pediatric Nursing provides a solid foundation in obstetrics and pediatric nursing. An easy-to-follow organization by developmental stages, discussion of disorders by body system from simple-to-complex and health-to-illness, and a focus on family health make it a complete guide to caring for maternity and pediatric patients. Written in a clear, concise style by Gloria Leifer, MA, RN, this edition reflects the current NCLEX test plan with additional material on safety, health promotion, nutrition, and related psychosocial care. "... provides clinical information and insights in a concise, structured and

informative way that encourages critical thinking." Reviewed by Kim Shrieves on behalf of Nursing Times, April 2015 Concise, yet comprehensive, content is presented within the scope of practice for the LVN/LPN, but with sufficient depth to facilitate students in a ladder program allowing them to be successful with the ADN program requirements for the specialties. Step-by-step procedure lists throughout the text help you master important maternity and pediatric nursing processes with Skills Performance Checklists available on the Evolve website. Nursing Care Plans with Critical Thinking Questions reinforce the nursing process and strengthen problem-solving skills as applied to maternity nursing. Logical organization of content from simple-to-complex and health-to-illness makes locating and accessing information easy. Key terms with phonetic pronunciations and text page references help improve terminology and language skills of English-as-a-Second-Language (ESL) students and students with limited proficiency in English, before they enter clinical practice. Health Promotion boxes emphasize the importance of family-centered care, health promotion and illness prevention, women's health issues, and growth and development of child and parent to help you understand and teach wellness and disease prevention to patients in your care. Nutrition content highlights the importance of proper nutrition for women before, during, and after pregnancy (for those who are breastfeeding), as well as critical information about the nutrition needs and problems of newborns, infants, and children. Nursing Tips throughout provide pertinent information applicable in the clinical setting that reinforces what you have just learned while building on previously learned information. NEW! Unfolding case studies with illustrations follow first-time parents Tess and Luis throughout the stages of pregnancy and birth of their twins, with a series of critical thinking questions. NEW! Updated NCLEX exam-style review questions have been revised to a higher cognitive level to better reflect the NCLEX examination. NEW! Expanded coverage of bioterrorism and natural disasters better reflects the evolving role of the nurse in disaster situations. NEW! Enhanced appendix includes Pediatric Lab Values for quick and easy reference.

The Department of Defense (DOD) spends over \$300 billion each year to develop, produce, field and sustain weapons systems (the U.S. Air Force over \$100 billion per year). DOD and Air Force acquisitions programs often experience large cost overruns and schedule delays leading to a loss in confidence in the defense acquisition system and the people who work in it. Part of the DOD and Air Force response to these problems has been to increase the number of program and technical reviews that acquisition programs must undergo. This book looks specifically at the reviews that U.S. Air Force acquisition programs are required to undergo and poses a key question: Can changes in the number, content, or sequence of reviews help Air Force program managers more successfully execute their programs? This book concludes that, unless they do it better than they are now, Air Force and DOD attempts to address poor acquisition program performance with additional reviews will fail. This book makes five recommendations that together form a gold standard for conduct of reviews and if implemented and rigorously managed by Air Force and DOD acquisition executives can increase review effectiveness and efficiency. The bottom line is to help program managers successfully execute their programs.
