 From 1900 to 1930, Edward S. Curtis created a massive  
 photographic and ethnographic record of 80 American Indian  
 tribes. This collection of 240 sepia-tone images presents the best  
 and most striking pictures from Curtis's documentation of a  
 traditional culture on the verge of extinction. Photographs include  
 striking portraits of Geronimo, Chief Joseph, Red Cloud, and other  
 prominent individuals.

 "This book is a selection of historic photographs of American  
 Indians by Edward Sheriff Curtis, with each photograph  
 accompanied by an appropriate verse, poem, song, or prose from  
 the associated tribe. There are ten tribes featured in the book.  
 While there were many photographs taken of American Indians  
 beginning in the 1860s, very few match Curtis's quality and  
 beauty. Between 1900 and 1927, Curtis would visit eighty  
 different tribes, travelling from the U.S.-Mexico border to the  
 Arctic Circle, from the Great Plains to the Pacific Coast. He would  
 take over 40,000 photographs, record songs and stories,  
 interview famous tribal leaders, and produce a full-length silent  
 film of the Kwakiutl people. The interviews Curtis conducted with  
 individuals give incredible insight into their lives. His biographical  
 sketches and personal observations of ceremonies and daily life  
 of American Indians are unequalled. While the photographs are  
 beautiful and works of art, they also serve a greater purpose.  
 They allow American Indians of today to look back on a way of life  
 their ancestors experienced, as well as give some of them the

ability to see pictures of their relatives that would have been  
 nonexistent if not for Edward S. Curtis. The beautiful words  
 accompanying the photos are the prayers, songs, and wisdom of  
 the American Indian tribes included in this book. They give voice  
 to the artistic photographs. Wisdom comes from teachings  
 through stories and instruction. From father to son, mother to  
 daughter, and grandparents to grandchildren, ancient stories are  
 handed down through generations. The words in this collection  
 give the reader a respect and understanding for the philosophy  
 and ideals of these tribal cultures and an appreciation for their  
 love of the natural world"--

 In 1906 J.P. Morgan commissioned Edward S. Curtis to produce a  
 series of books depicting Native American life. Curtis' goal was to  
 not just photograph but to document as much of traditional  
 Native life as possible before it disappeared. During his project,  
 Curtis made over 10,000 wax cylinder recordings of Native  
 languages and music, and took over 40,000 photographs of  
 peoples from over eighty tribes. He recorded tribal lore and  
 history, and he described traditional foods, housing, garments,  
 recreation, ceremonies, and funeral customs. He wrote  
 biographical sketches of tribal leaders, and his material, in most  
 cases, is the only recorded history of these amazing peoples.  
 Curtis had a remarkable knack for portraiture. His skill at  
 capturing the intensity of his subjects, the grim reality of their  
 surroundings, and the unquenchable spirit of the people was  
 second to none. From Alaska to Mexico, Edward S. Curtis  
 Portraits: The Many Face of the Native American features over  
 250 portraits in a compact volume.

 Bold, sometimes abrasive, forever passionate, Edward Curtis was  
 the quintessential romantic visionary. Curtis struggled through an  
 impoverished boyhood in Minnesota to become a successful  
 society photographer in Seattle. But he soon moved far beyond  
 weddings and studio portraits to his lifes work a multi-volume  
 photographic and ethnographic work on the vanishing world of  
 the North American Indian. Initially, Teddy Roosevelt and J.P.  
 Morgan backed the ambitious project. But as the work stretched  
 over years, Curtis found himself alone with his vision, struggling  
 to finance himself and his crews. The 20-volume North American  
 Indians, finally completed in 1930, cost Curtis his marriage, his  
 friendships, his home, and his health. By the time he died in 1952,  
 he and his monumental work had lapsed into obscurity. In this  
 richly designed book, Anne Makepeace, creator of an award-  
 winning documentary on Curtiss life, reexamines the lasting  
 impact of his work. Curtiss photographs, once ignored, now serve  
 as a link between the romantic past and contemporary Native  
 American communities, who have used his images to reclaim and

resurrect their traditions.

Legendary for his massive photographic undertaking *The North American Indian*, Edward Sheriff Curtis (1868-1952) recorded much more than portraits of Native American tribespeople. Among his huge body of work are numerous images of all manner of native dwellings: tipis, hogans, huts, cliff houses, adobes, and many more that are far less familiar to the public eye. Though people are largely absent from these photographs, each image speaks volumes about the lives and lifestyles of the tribes to which they belonged. Other structures such as tombs, religious buildings, granaries, and totem poles are also featured prominently, further glimpses into ways of life that were in the process of disappearing. Taken from the Dan and Mary Solomon collection, *Sites & Structures: The Architectural Photographs of Edward S. Curtis* is the first book of Curtis photographs to explore these dwellings and structures, faithfully reproduced from the original prints and gravures. Curator and photography historian Rod Slemmons puts these photographs in context among Curtis's more familiar portraits and considers their anthropological and artistic importance. Reproduced in large, splendid tritones, *Sites & Structures* is one of the finest monographs of this American photographic master.

The traditional cultures of the Indians of the Great Plains?Lakotas,

Cheyennes, Wichitas, Arikaras, Crows, Osages, Assiniboins, Comanches, Crees, and Mandans, among others?are recalled in stunning detail in this collection of photographs by Edward S. Curtis (1868?1952). Curtis is the best-known photographer of Native Americans because of his monumental work, *The North American Indian* (1907?1930), which consists of twenty portfolios of large photogravures and twenty volumes of text on more than eighty Indian groups in the West. He took pictures of Plains Indians for over twenty years, and his photographs reflect both prevailing attitudes about Indians and Curtis's own vision of differences among the Native peoples whom he photographed. ø Curtis's photographs have exerted an enduring influence?both positive and negative?on mainstream American culture. They have inspired countless books, articles, and photographic exhibitions, and they continue to appear on posters, postcards, and other souvenirs. Accompanying the remarkable array of images in this book are essays by leading scholars that place the photographs within their proper critical, cultural, and historical contexts. The scholars contributing to this work are Martha H. Kennedy, Martha A. Sandweiss, Mick Gidley, and Duane Niatum. *Native Voices Illuminated by Edward S. Curtis* Univ of California Press

Edward S. Curtis's *The North American Indian* is the most ambitious photographic and ethnographic record of Native American cultures ever produced. Published between 1907 and 1930 as a series of twenty volumes and portfolios, the work contains more than two thousand photographs intended to document the traditional culture of every Native American tribe

west of the Mississippi. Many critics have claimed that Curtis's images present Native peoples as a "vanishing race," hiding both their engagement with modernity and the history of colonial violence. But in this major reappraisal of Curtis's work, Shamoon Zamir argues instead that Curtis's photography engages meaningfully with the crisis of culture and selfhood brought on by the dramatic transformations of Native societies. This crisis is captured profoundly, and with remarkable empathy, in Curtis's images of the human face. Zamir also contends that we can fully understand this achievement only if we think of Curtis's Native subjects as coauthors of his project. This radical reassessment is presented as a series of close readings that explore the relationship of aesthetics and ethics in photography. Zamir's richly illustrated study resituates Curtis's work in Native American studies and in the histories of photography and visual anthropology.

*Historic Emergence of 100 unpublished Edward S. Curtis photographs and personal journal from Alaska!* Join Edward Curtis on his harrowing journey on the Bering Sea in the summer of 1927. His first-hand accounts, as written in his personal journal, bring to life his final field season to complete *The North American Indian* project. This Alaska voyage is truly an example of the tenacity it took for Curtis to complete his grand opus. Between the towering gale-driven seas breaking over the deck, the blizzard snow conditions, the falling barometers, and the hole in the boat, it is a miracle he and his crew lived to tell this story. Included with Curtis' historic journal are 100 previously unpublished photographs. Occasionally unseen Curtis prints surface, but never 100 at once. Be the first to experience these images and make this book a part of your personal library. "How I managed to keep that log during all the stress is beyond my present understanding, yet on reading it twenty years after it was written, it brought the day by day incidents, locations and storm conditions vividly to mind. Frankly, it's reading gave me the shivers, and I constantly marveled that at any time in my life I had the strength and endurance to do such a season's work." ~ Edward Curtis

1930 - With almost no fanfare Curtis published the final two volumes of "The North American Indian." It has been estimated that during the project Curtis took over 40,000 photographs and made 10,000 wax cylinder sound recordings of Indian speech and music. About 200 sets of the works were printed and Curtis delivered 25 sets to J.P. Morgan as promised for partially financing the project. The Morgan Company later sold 19 of those sets. The Library of Congress has a set. October 19, 1952 - Edward Sheriff Curtis died of a heart attack at the age of 84, in the home of his daughter Beth. A seventy-six word obituary in the *New York Times* mentions simply that Curtis had been an authority on Indian history and that he had also been known as a photographer.
