Help students unlock the meaning of the words they encounter in the classroom and beyond with a systematic approach to learning vocabulary and word families using Greek and Latin roots. This full-color Building Vocabulary workbook guides students toward independent skills application with daily practice activities. Second grade students will begin by learning to divide and conquer words by separating onsets from the most common rimes or word families. Students transition to Latin-Greek morphemes, learning to decode and understand a multitude of words.

Building Vocabulary provides a systematic approach to teaching vocabulary using Greek and Latin prefixes, bases, and suffixes. Over 90% of English words of two or more syllables are of Greek or Latin origin. Instead of learning words and definitions in isolation, students learn key roots and strategies for deciphering words and their meanings across all content areas. Building Vocabulary: Foundations for grades 1-2, empowers beginning readers to learn words by identifying word parts or word families that share common sounds. Students will build vocabulary through the use of poetry, word endings, and simple roots. Building Vocabulary: Foundations: Level 2 kit includes: Teacher's Guide; Student Guided Practice Book (Each kit includes a single copy; additional copies may be ordered in quantities of 10 or more); Assessments to support data-driven instruction; and Digital resources including modeled lessons, 50 bonus activities, and more.

Choosing appropriate words to express an idea is important to improve students' reading comprehension and writing composition skills. Vocabulary Ladders: Understanding Words Nuances provides second grade students with fun and engaging vocabulary activities to support word knowledge within reading and writing skills. This resource provides a framework to teach related words using a cluster approach that helps students learn many semantically related words at once. With this series, students will discuss differences between themed words, order words and explain

their thinking, use words in context, and use words in writing.

This book introduces an innovative collection of easy-to-use computer programs that have been developed to measure and model vocabulary knowledge. The book aims to help researchers discover new instruments for lexical analysis, and provides a theoretical framework in which studies

with such tools could be conducted. Each of the programs comes with a short manual explaining how to use the program, an example of a published paper that uses the program and a set of questions that readers can develop into proper projects. The programs can be used in real research projects and have the potential to break new ground for research in L2 vocabulary acquisition. The book will be of great use to final year undergraduates and masters students in applied linguistics, second language acquisition, psycholinguistics and language testing and to PhD students doing research methods courses.
