The Laws of Human Nature Mometrix Media LLC

The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

Why cutting up your credit cards won't make you rich A popular TV personality often says, "Take out your credit cards and cut them into pieces." While that is sound advice for people who are not financially responsible, it is inadequate advice for anyone who wants to become rich or financially free. In other words, just cutting up your credit cards will not make you rich. What does make you rich is financial education...unfortunately a type of education we do not receive in school. If a person has a solid financial education, they would know that there are two kinds of debt...good debt and bad debt. A person with a sound financial education would know how to use good debt to make them richer faster...much faster than a person who only saves money and has no debt. Rich Dad's Guide to Becoming Rich \* Are you in credit card debt? \* Is job security dead? \* Is your financial security threatened? \* Is a high-paying job the answer? \* Is your money

working for you? \* Do you have good debt or bad debt? We all need more financial education. We need to know how to have our money work hard for us so we don't have to spend our lives working for money. That is why we need more sophisticated financial education...not oversimplified and childish financial tips such as cut up your credit cards or save more money. If you are ready to increase your financial education and enjoy your credit cards, then this book is for you.

Start with Why Penguin

In difficult times, debt can be a matter of life and death, happiness and despair. Controlling your debt can bring order and calm. Mastering debt can bring wealth and success. As bestselling Rich Dad/Poor Dad author Robert Kiyosaki says, "Good debt makes you rich and bad debt makes you poor." The ABCs of Getting Out of Debt provides the necessary knowledge to navigate through a very challenging credit environment. A Rich Dad's Advisor and best selling author of numerous business books, Garrett Sutton, Esq. clearly writes on the key strategies readers must follow to get out of debt. Unlike other superficial offerings, Sutton explores the psychology and health effects of debt. From there, the reader learns how to beat the lenders at their own game, and how to understand and repair your own credit. Using real life illustrative stories, Sutton shares how to deal with debt collectors, avoid credit scams, and win with good credit.

"The reason Garrett Sutton's book is so important is that like it or not, debt is a powerful force in our world today. The financially intelligent are using debt to enrich themselves while the financially uneducated are using debt to destroy their lives."- Robert Kiyosaki The times call for a book that offers hope and education on mastering credit and getting out of debt.

#1 NEW YORK TIMES BESTSELLER • Discover the life-changing memoir that has inspired millions of readers through the Academy Award®-winning actor's unflinching honesty, unconventional wisdom, and lessons learned the hard way about living with greater satisfaction. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE GUARDIAN "McConaughey's book invites us to grapple with the lessons of his life as he did—and to see that the point was never to win, but to understand."—Mark Manson, author of *The Subtle Art of Not Giving a F\*ck* I've been in this life for fifty years, been trying to work out its riddle for forty-two, and been keeping diaries of clues to that riddle for the last thirty-five. Notes about successes and failures, joys and sorrows, things that made me marvel, and things that made me laugh out loud. How to be fair. How to have less stress. How to have fun. How to hurt people less. How to get hurt less. How to be a good man. How to have meaning in life. How to be more me. Recently, I worked up the courage to sit down with those diaries. I found stories I

experienced, lessons I learned and forgot, poems, prayers, prescriptions, beliefs about what matters, some great photographs, and a whole bunch of bumper stickers. I found a reliable theme, an approach to living that gave me more satisfaction, at the time, and still: If you know how, and when, to deal with life's challenges—how to get relative with the inevitable—you can enjoy a state of success I call "catching greenlights." So I took a one-way ticket to the desert and wrote this book: an album, a record, a story of my life so far. This is fifty years of my sights and seens, felts and figured-outs, cools and shamefuls. Graces, truths, and beauties of brutality. Getting away withs, getting caughts, and getting wets while trying to dance between the raindrops. Hopefully, it's medicine that tastes good, a couple of aspirin instead of the infirmary, a spaceship to Mars without needing your pilot's license, going to church without having to be born again, and laughing through the tears. It's a love letter. To life. It's also a guide to catching more greenlights—and to realizing that the yellows and reds eventually turn green too. Good luck.

What is there in developmental relationships beyond setting and striving to achieve goals? The presence of goals in coaching and mentoring programs has gone largely unquestioned, yet evidence is growing that the standard prescription of SMART, challenging goals is not always appropriate - and even potentially dangerous - in the context of a complex and rapidly changing world. Beyond Goals advances standard goal-setting theory by bringing together cutting-edge perspectives from leaders in coaching and mentoring. From psychology to neuroscience, from chaos theory to social network theory, the contributors offer diverse and compelling insights into both the advantages and limitations of goal pursuit. The result is a more nuanced understanding of goals, with the possibility for practitioners to bring greater impact and sophistication to their client engagements. The implications of this reassessment are substantial for all those practicing as coaches and mentors, or managing coaching or mentoring initiatives in organizations.

For years, Robert Kiyosaki has firmly believed that the best investment one can ever make is in taking the time to truly understand how one's finances work. Too many people are much more interested in the quick-hitting scheme, or trying to find a short-cut to real wealth. As Kiyosaki has preached over and over again, one has to truly understand the process of how money works before one can start out on trying to escape the daily financial Rat Race. Now, in this latest book in the popular Rich Dad Poor Dad series, Kiyosaki lays out his 5 key principles of Financial Intelligence for all to understand. In INCREASE YOUR FINANCIAL IQ, Kiyosaki provides real insights on these key steps to wealth: o How to increase your money -- how to assess what you're really worth now, what your prospects are, and how to start mapping out your financial future. o How to protect your money -- for better or for worse, taxes are a way of life. Kiyosaki shows you that "it's not what you make....it's what you keep." o How to budget your money -- everybody wants to live large, but you have to learn how to live within your budget. The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After

the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings? Penguin

Rich Dad's Guide to Investing is a guide to understanding the real earning power of money by learning some of the investing secrets of the wealthy.

#### **Good to Great** Harper Collins

The inspiring, life-changing bestseller by the author of LEADERS EAT LAST and TOGETHER IS BETTER. In 2009, Simon Sinek started a movement to help people become more inspired at work, and in turn inspire their colleagues and customers. Since then, millions have been touched by the power of his ideas, including more than 28 million who've watched his TED Talk based on START WITH WHY -- the third most popular TED video of all time. Sinek starts with a fundamental question: Why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. START WITH WHY shows that the leaders who've had the greatest influence in the world all think, act, and communicate the same way -- and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY. *Get Smarter with Your Money* AGUILAR
