**The Protection Book. A Guide to Asset Protection** Robert J Mintz

"I've set up my corporation. Now what do I do?" All too often business owners and real estate investors are asking this question. They have formed their protective entity - be it a corporation, LLC or LP - and don't know what to do next. "Run Your Own Corporation" provides the solution to this very common dilemma. Breaking down the requirements chronologically (ie the first day, first quarter, first year) the book sets forth all the tax and corporate and legal matters new business owners must comply with. Written by Rich Dad's Advisor Garrett Sutton, Esq., who also authored the companion edition "Start Your Own Corporation", the book clearly identifies what must be done to properly maintain and operate your corporation entity. From the first day, when employer identification numbers must be obtained in order to open up a bank account, to the fifth year when trademark renewals must be filed, and

all the requirements in between, "Run Your Own Corporation" is a unique resource that all business owners and investors must have. Rich Dad/Poor Dad author Robert Kiyosaki states, "Run Your Own Corporation is the missing link for most entrepreneurs. They've set up their entity, but don't know the next steps. Garrett Sutton's book provides valuable information needed at the crucial start up phase of operations. It is highly recommended reading." When "Start Your Own Corporation" is combined with "Run Your Own Corporation" readers have a two book set that offers the complete corporate picture.

Successful Real Estate Investors Think Like Business Owners, Not Like Hobbyists AND THAT'S THE KEY TO BUILDING A PASSIVE-INCOME "EMPIRE" Lots of people dabble in real estate. Some own a few rental units; some flip one or two houses a year; others slowly build a real estate portfolio so that by the time they retire they own a dozen properties. And then there are those real estate "unicorns" who somehow manage to acquire thirty or forty properties after

only three years in the game-- and who go on to build legacy-level wealth. What's their secret? What do they do differently? It's all in their mindset. These successful people think like business owners, not part-time hobbyists. They are growth oriented from day one. They invest in their businesses, they pursue opportunities aggressively, and they use leverage to increase their buying power. They also understand the importance of asset protection and good tax planning. But they pursue these strategies in ways that empower their business rather than limit it. They use smartly designed entity structures that provide them with privacy, risk mitigation, security, and tax benefits but that don't hold them back when it comes time to grow the business. That's next level asset protection, and that's what this book is all about.
