À peine amorcée, l'histoire d'amour entre Arielle et Emmanuel subit l'épreuve de l'absence. Tandis qu'elle doit poursuivre ses études dans un collège de Montréal, lui entreprend un voyage qui doit le conduire plus loin que l'équateur, pour retrouver son âme mystérieusement égarée dans un proche passé. En soi, l'espace qui s'étire entre eux suffirait à faire de la place au doute. Lorsque des révélations insoutenables s'ajoutent à l'éloignement, la perplexité se mue en ambivalence, même en colère. Puis surgit dans la vie d'Arielle le jeune Thomas, beau comme un dieu, qui ne tarde pas à brûler de passion pour elle. Pour rester fidèle à la promesse qu'elle a faite à Emmanuel, Arielle devra contenir ses sentiments dans les limites de l'amitié. Réussira-t-elle à garder la tête froide ?

This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. Jews on trial concentrates on Inquisitorial activity during the period which historians have argued was the most active in the Inquisition's history: the first forty years of the tribunal in

Modena, from 1598 to 1638, the year of the Jews' enclosure in the ghetto. Scholars have in the past tended to group trials of Jews and conversos in Italy together. This book emphasises the fundamental disparity in Inquisitorial procedure, as well as the evidence examined, and argues that this was especially true in Modena where the secular authority did not have the power during the period in question to reject, or even significantly monitor, Inquisitorial trial procedure. It draws upon the detailed testimony to be found in trial transcripts to analyse Jewish interaction with Christian society in an early modern community. This book will appeal to scholars of inquisitorial studies, social and cultural interaction in early modern Europe, Jewish Italian social history and anti-Semitism.

C'est une vie par procuration, que celle d'Arielle, une vie où elle endosse les personnalités et éprouve les émois de ses héros, ceux qu'elle côtoie dans les films, mais surtout dans les livres dont elle est boulimique. Alors qu'elle termine son examen final de maths de cinquième secondaire, un garçon attire son attention. Mais qui est-il donc? Pâle aux yeux noirs, cet Emmanuel semble tout droit sorti du livre de vampires qu'elle dévore en ce moment. Et voilà qu'il lui fait perdre sa page, qu'il la dérange. Sans qu'elle puisse s'expliquer pourquoi, lorsqu'il la regarde, il la prive de tous ses moyens. Un après-midi sur la plage, un bal des finissants tout empreint de magie, une nuit sur un voilier, et les voilà qui entreprennent ensemble la plus merveilleuse des aventures...

Elites and Challengers in the Postwar Era Routledge

Ethics, Politics and Justice in Dante presents new research by international scholars on the themes of ethics, politics and justice in the works of Dante Alighieri, including chapters on Dante's modern 'afterlife'. Together the chapters explore how Dante's writings engage with the contemporary culture of medieval Florence and Italy, and how and why his political and moral thought still speaks compellingly to modern readers. The collection's contributors range across different disciplines and scholarly traditions - history, philology, classical reception, philosophy, theology - to scrutinise Dante's Divine Comedy and his other works in Italian and Latin, offering a multi-faceted approach to the evolution of Dante's political, ethical and legal thought throughout his writing career. Certain chapters focus on his early philosophical Convivio and on the accomplished Latin Eclogues of his final years, while others tackle knotty themes relating to judgement, justice, rhetoric and literary ethics in his Divine Comedy, from hell to paradise. The closing chapters discuss different modalities of the public reception and use of Dante's work in both Italy and Britain, bringing the volume's emphasis on morality, political philosophy, and social justice into the modern age of the nineteenth, twentieth, and twenty-first centuries.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Portland, Oregon. Sustainability might not seem glamorous, but Portland is making a name for itself as one of the most sustainable cities in the world. Whether you've heard about the farmers' markets, the cycle-friendly streets or the ongoing efforts to balance livability and equity, Portland is leading the way in urban sustainability: this book helps us understand how it achieves this. A critical component of Portland's success is collaboration between different communities and institutions; the Sustainable Solutions series examines higher education's role in these partnerships. In exploring how best to "let knowledge serve the city", Portland State University translates its founding motto from mere words to applied research and action. This first volume examines different approaches to collaborative work that PSU has taken, both within the university and with community partners: how have barriers been overcome between different areas of study, between academia and the public, and why is bridging these divides so important? It also introduces the themes of the engaged university, social justice, climate change and sustainable economic development, which shape PSU's work. Let Knowledge Serve the City is ideal for anyone seeking best practice in connecting students and universities with the needs of local communities. From public interest design and student leadership, to food justice and age-friendly development, authors combine academically rigorous theories of sustainability and community-university partnerships with lessons learned on how to realize ideals of sustainable development.

This spirited volume explores the history and diversity of improvisation in the cinema, including works by Jean Renoir, Jean-Luc Godard, and Nobuhiro Suwa. Gilles Mouëllic examines improvisational practices that can be specifically attributed to the cinema and argues in favor of their powers as instigators of unprecedented forms of expression. Improvising Cinema reflects both on the permanence of attempting improvisation and the relationship between technology and aesthetics. Mouëllic concludes preservation becomes even more invaluable in the case of improvisation, as the creative act exists only within the brief time span of the performance.

A roadmap for how we can rebuild America's working class by transforming workforce education and training. The American dream promised that if you worked hard, you could move up, with well-paying working-class jobs providing a gateway to an ever-growing middle class. Today, however, we have increasing inequality, not economic convergence. Technological advances are putting quality jobs out of reach for workers who lack the proper skills and training. In Workforce Education, William Bonvillian and Sanjay Sarma offer a roadmap for rebuilding America's working class. They argue that we need to train more workers more quickly, and they describe innovative methods of workforce education that are being developed across the country.

Building on the concept of depoliticization, this book provides a first systematic analysis of International Organizations (IO) apolitical claims. It shows that depoliticization sustains IO everyday activities while allowing them to remain engaged in politics, even when they pretend not to.

Delving into the inner dynamics of global governance, this book develops an analytical framework

on why IOs "hate" politics by bringing together practices and logics of depoliticization in a wide variety of historical, geographic and organizational contexts. With multiple case studies in the fields of labor rights and economic regulation, environmental protection, development and humanitarian aid, peacekeeping, among others this book shows that depoliticization is enacted in a series of overlapping, sometimes mundane, practices resulting from the complex interaction between professional habits, organizational cultures and individual tactics. By approaching the consequences of these practices in terms of logics, the book addresses the instrumental dimension of depoliticization without assuming that IO actors necessarily intend to depoliticize their action or global problems. For IO scholars and students, this book sheds new light on IO politics by clarifying one often taken-for-granted dimension of their everyday activities, precisely that of depoliticization. It will also be of interest to other researchers working in the fields of political science, international relations, international political sociology, international political economy, international public administration, history, law, sociology, anthropology and geography as well as IO practitioners.

Why International Organizations Hate Politics Éditions Michel Quintin

Named a Best Book of the Year by NPR and LitHub A fascinating and provocative new way of looking at the things we use and the spaces we inhabit, and a call to imagine a better-designed world for us all. Furniture and tools, kitchens and campuses and city streets—nearly everything human beings make and use is assistive technology, meant to bridge the gap between body and world. Yet unless, or until, a misfit between our own body and the world is acute enough to be understood as disability, we may never stop to consider—or reconsider—the hidden assumptions on which our everyday environment is built. In a series of vivid stories drawn from the lived experience of disability and the ideas and innovations that have emerged from it—from cyborg arms to customizable cardboard chairs to deaf architecture—Sara Hendren invites us to rethink the things and settings we live with. What might assistance based on the body's stunning capacity for adaptation—rather than a rigid insistence on "normalcy"—look like? Can we foster interdependent, not just independent, living? How do we creatively engineer public spaces that allow us all to navigate our common terrain? By rendering familiar objects and environments newly strange and wondrous, *What Can a Body Do?* helps us imagine a future that will better meet the extraordinary range of our collective needs and desires.
