Researchers recognize that theoretical frameworks and models of child development and family dynamics have historically overlooked the ways in which developmental processes are shaped by socio-cultural contexts.

Ecological and acculturation frameworks are especially central to understanding the experiences of immigrant populations, and current research has yielded new conceptual and methodological tools for documenting the cultural and developmental processes of children and their families. Within this broad arena, a question of central importance is on how gender roles in immigrant families play out in the lives of children and families. Gender Roles in Immigrant Families places gender at

the forefront of the research by investigating how it interplays with parental roles, parent-child relationships, and child outcomes.

Do you have to read texts in English as part of your studies? Then you need Skills in English Reading. This course builds the skills that help you do reading research in English. At Level 2, you learn how to: skim for the main idea; skim for the topic of paragraphs; read for an established purpose; understand non-text markers; distinguish fact from opinion; make
