Not every victim is found  
to be innocent ... Frank  
Delaney, investigative  
journalist and sometime  
spy, is on assignment in  
Phuket, Thailand, in the  
aftermath of the tsunami  
that killed thousands of  
people, foreigners and  
locals alike. Disaster  
victim identification teams  
from police forces across  
the globe have descended  
on this idyllic holiday  
location to carry out their  
gruesome work. Delaney  
discovers that, against all  
logic, someone is trying to  
prevent identification of  
one of the bodies lying in  
makeshift beachside  
morgues. His search for  
the reason follows a trail  
through Thailand's seedy  
child sex trade to an  
elaborate cover-up in  
Germany and France,

where those with everything to lose use increasingly desperate measures to stop him dead. The Tsunami File was shortlisted for the Arthur Ellis Award for Best Crime Novel, 2008.

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.
