The legal situation of
associations and
foundations in the

countries of central and eastern Europe, their terms of creation and operation, their objectives and their fiscal status were examined on the occasion of the multilateral meeting in Strasbourg from 27 to 29 November 1996, organised by the Council of Europe.

The Leap of Faith

Marsvenus
Despite dramatic increases in poverty, unemployment, and social inequalities, the Central and Eastern European transitions from communism to market democracy in the 1990s have been remarkably peaceful. This book proposes a new explanation for this unexpected political quiescence. It shows how reforming governments in Poland, Hungary and the Czech

Republic have been able to prevent massive waves of strikes and protests by the strategic use of welfare state programs such as pensions and unemployment benefits. Divide and Pacify explains how social policies were used to prevent massive job losses with softening labor market policies, or to split up highly aggrieved groups of workers in precarious jobs by sending some of them onto unemployment benefits and many others onto early retirement and disability pensions. From a narrow economic viewpoint, these policies often appeared to be immensely costly or irresponsibly populist. Yet a more inclusive social-scientific

perspective can shed new light on these seemingly irrational policies by pointing to deeper political motives and wider sociological consequences. *Divide and Pacify* contains a provocative thesis about the manner in which political strategy was used to consolidate democracy in post-communist Hungary, Poland, and the Czech Republic. Pieter Vanhuyse develops a tight argument emphasizing the strategic use of welfare and unemployment compensation policies by a government to nip potential collective action against it in the bud. By breaking up social networks that might otherwise facilitate protest, through unemployment

and induced early retirement, governments were able to survive otherwise difficult economic circumstances. This novel argument linking economics, politics, sociology, and demography should stimulate wide-ranging debate about the strategic uses of social policy.

Nationalism and the Economy UN

Designed for both practitioners and academics, this work seeks to inform the reader about the practice of competency management services in the public sector. It throws light on the origins and meanings of the concept and traces the competency movement from the 1980s in the UK and USA.

Clean Energy for

Sustainable Development Springer
Nature
Managing Public Expenditure presents a comprehensive and in-depth analysis of all aspects of public expenditure management from the preparation of the budget to the execution, control and audit stages.

The Metamorphosis of the European Economic Constitution Scholar's Choice

To defeat the forces of evil which threaten his world, young Amos Daragon, aided by mythical animal friends, sets out on a journey to find four masks that harness the forces of nature and sixteen powerful stones that give the masks their magic.
Palgrave Macmillan

"Papers presented at the fourth annual conference of CeRP, 'Is mandatory retirement an outdated feature of pension systems?' held on 16 September 2003 in Turin"--

Extended Working Life Policies Springer
Nature

This book adopts novel theoretical approaches to study the diverse welfare pathways that

have been evolving across Central and Eastern Europe. Beyond existing path dependency and neo-institutionalist explanations, it highlights the role of explanatory factors such as micro-causal mechanisms, power politics, path departure, and elite strategies.

The Emergence of a New European Welfare Regime OECD

Publishing

This book is the first attempt to bridge the current divide between studies addressing "economic nationalism" as a deliberate ideology and movement of economic 'nation-building', and the literature concerned with more diffuse expressions of economic "nationness"—from

national economic symbols and memories, to the "banal" world of product communication. The editors seeks to highlight the importance of economic issues for the study of nations and nationalism, and its findings point to the need to give economic phenomena a more prominent place in the field of nationalism studies. The authors of the essays come from disciplines as diverse as economic and cultural history, political science, business studies, as well as sociology and anthropology. Their chapters address the nationalism-economy nexus in a variety of realms, including trade, foreign investment, and

national control over resources, as well as consumption, migration, and welfare state policies. Some of the case studies have a historical focus on nation-building in the nineteenth and early twentieth centuries, while others are concerned with contemporary developments. Several contributions provide in-depth analyses of single cases while others employ a comparative method. The geographical focus of the contributions vary widely, although, on balance, the majority of our authors deal with European countries.

Claiming Social Rights Beyond Borders
Extended Working Life Policies
International Gender and Health Perspectives

This first open access book in a series of three volumes provides an in-depth analysis of social protection policies that EU Member States make accessible to resident nationals, non-resident nationals and non-national residents. In doing so, it discusses different scenarios in which the interplay between nationality and residence could lead to inequalities of access to welfare. Each chapter maps the eligibility conditions for accessing social benefits, by paying particular attention to the social entitlements that migrants can claim in host countries and/or export from home countries. The book also identifies and compares recent trends of access to welfare entitlements

across five policy areas: health care, unemployment, family benefits, pensions, and guaranteed minimum resources. As such this book is a valuable read to researchers, policy makers, government employees and NGO's. Theorizing Social Policy Transformations in Central and Eastern Europe LIT Verlag Münster
 Social Policy and International Interventions in South East Europe proves a comprehensive, dense, and thought provoking read, particularly successful in framing both the historical and institutional contexts of the countries examined, as well as literary debates on the subject and is thus a precious resource. . . Irene Dioli, Journal of Southeastern Europe

The questions broached by the volume are of interest to all who are concerned with development and politics. Experts will find the data and is presentation quite useful; others will benefit from the background information presented in each chapter. . . . Social Policy and International Interventions in South East Europe is an excellent addition to the academic literature and will serve all those who are trying to keep pace with fluid developments in the transitional states of south east Europe. Richard P. Farkas, Slavic Review This is a remarkably rich and thought-provoking collection. Its substantial case

studies make it a vital resource for studying social policy in South East Europe. Its focus on the flows of international actors, agencies, ideas and resources poses critical questions about how the emergence of social policy, the emergence of new forms of governance and the creation of new spaces of welfare are connected. The implications of this concern with emergent forms and directions reach far beyond the region itself. John Clarke, The Open University, UK A brilliant book that shows conclusively that transnational actors have taken their place alongside states in setting social policy in Europe. Through careful and comprehensive case

studies of a wide range of South East European countries, this volume systematically presents a wealth of new data on transnational actor interventions. It helps to shape an emerging debate on the relative power of transnational and domestic actors and makes a unique empirical contribution to the discussion. The authors have done an amazing job of coordinated digging and produced some impressive results. Mitchell Orenstein, Johns Hopkins University, US This comprehensive and engaging book investigates the role of international actors in the making of social policy in South East Europe. Introductory chapters on transnationalism and Europeanization are

followed by a series of nine linked case studies depicting research undertaken within this region. The book charts the variable influence that international actors such as formal organizations, non-governmental organizations, consulting companies and individual transnational policy entrepreneurs have on key policy issues, including pensions, social protection, labour markets and health. The authors conclude that welfare settlements are a complex product of historical and institutional legacies, the neo-liberal interventions of the World Bank, the emerging impact of the EU, and the crowded international arena

resulting from war and post-war reconstruction agendas. Written by leading researchers in the field, Social Policy and International Interventions in South East Europe will be of great interest to researchers and students of social policy, policy studies and regional studies, as well as policymakers within international and governmental organizations.

Pension Systems

Central European
University Press

This open access book addresses the current debate on extended working life policy by considering the influence of gender and health on the experiences of older workers. Bringing together an international team of

scholars, it tackles issues as gender, health status and job/occupational characteristics that structure the capacity and outcomes associated with working longer. The volume starts with an overview of the empirical and policy literature; continues with a discussion of the relevant theoretical perspectives; includes a section on available data and indicators; followed by 25 very concise and unique country reports that highlight the main extended working life (EWL) research findings and policy trajectories at the national level. It identifies future directions for research and addresses issues associated with effective policy-

making. This volume fills an important gap in the knowledge of the consequences of EWL and it will be an invaluable source for both researchers and policy makers.

Fundamentals of Computer-Aided Engineering, Second Edition Bluefire

This report is the ninth in the world migration report series which is designed as a substantive contribution to increasing the understanding of current and strategic migration issues throughout the world. It presents key data and information on migration as well as thematic chapters on highly topical migration issues. It is structured to focus on two key contributions for readers: Part I: key

information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues. The two parts are intended to provide both overview information that helps to explain migration patterns and processes globally and regionally, as well as insights and recommendations on major issues that policymakers are - or soon - will be grappling with.

Empirical Evidence from Central and Eastern European Countries Simon and Schuster

A comprehensive survey of the region. Presents recent economic and political developments and

includes authoritative analysis, statistics, directory material and biographical details of leading political figures.

Leadership and Training for the Fight Academic Press

Ideal for fans of Dave Grossman, Paul Howe, George Thompson, and other authors of police books A brilliant military intelligence book that shares leadership and training for the fight Includes riveting stories of military operations In Leadership and Training for the Fight, MSG Paul R. Howe, U.S. Army Retired, shares his thoughts on leadership that he has developed through extensive combat experience. Howe analyzes leadership concepts. He also provides advice on how

to understand students and to change your teaching methods. This military and leadership training book is based on Howe's unique insight as a Special Operations soldier. *Leadership and Training for the Fight* is the perfect guide for anyone interested in improving their leadership skills, whether in military or civilian situations. *International Gender and Health Perspectives* Springer Nature

The growing scale of international migration has reshaped the debate on the social rights and social protection available to people outside their countries of origin. This book uses conceptual frameworks, policy analysis and empirical studies of migrants to

explore international migrants' needs for and access to social protection across the world.

Europe 2030 Council of Europe

Leading Gracefully is a must-read for women who want to get to the next level in their career. Through personal stories, interviews of female executives as well as the latest neuroscience research, you will learn how to successfully use 'feminine' strengths combined with traditional traits to breakthrough gender bias to lead with confidence.

Brookings Institution Press

Computers are ubiquitous throughout all life-cycle stages of engineering, from conceptual design to

manufacturing maintenance, repair and replacement. It is essential for all engineers to be aware of the knowledge behind computer-based tools and techniques they are likely to encounter. The computational technology, which allows engineers to carry out design, modelling, visualisation, manufacturing, construction and management of products and infrastructure is known as Computer-Aided Engineering (CAE). Engineering Informatics: Fundamentals of Computer-Aided Engineering, 2nd Edition provides the foundation knowledge of computing that is essential for all

engineers. This knowledge is independent of hardware and software characteristics and thus, it is expected to remain valid throughout an engineering career. This Second Edition is enhanced with treatment of new areas such as network science and the computational complexity of distributed systems. Key features: Provides extensive coverage of almost all aspects of Computer-Aided Engineering, outlining general concepts such as fundamental logic, definition of engineering tasks and computational complexity. Every chapter revised and expanded following more than ten years of experience teaching

courses on the basis of the first edition. Covers numerous representation frameworks and reasoning strategies. Considers the benefits of increased computational power, parallel computing and cloud computing. Offers many practical engineering examples and exercises, with lecture notes available for many of the topics/chapters from the ASCE Technical Council on Computing and Information Technology, Global Centre of Excellence in Computing (www.asceglobalcenter.org), providing a valuable resource for lecturers.

Accompanied by a website hosting updates and solutions. Engineering Informatics: Fundamentals of Computer-Aided Engineering, 2nd Edition provides essential knowledge on computing theory in engineering contexts for students, researchers and practising engineers. *A Reference Book for Transition Countries* John Wiley & Sons. *Life Lessons for Mastering the Law of Attraction* teaches you what you need to know about living the Law of Attraction and how to create your own personal success through its concepts.
