Needles/Powers/Crosson's FINANCIAL AND MANAGERIAL ACCOUNTING continuously evolves to meet the needs of today's learner. This edition's new structure is based on research about how to deliver content to students and how to mirror the way instructors have told us they teach. The authors have organized this edition into a new three-section approach: 1. The CONCEPTS section focuses on the overarching accounting concepts that require consistent reiteration throughout the course. 2. The ACCOUNTING APPLICATIONS section helps students apply the accounting procedures with features such as Apply It! and a new transaction analysis model. 3. The

BUSINESS APPLICATIONS section illustrates how concepts and procedures are used to make real-world business decisions. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
