 Una serie de investigadores de vanguardia de varias universidades mundiales han recibido el encargo de analizar el EEES. Así, se han recopilado sus investigaciones y reflexiones en torno a los nuevos contenidos en el área de comunicación a partir de las reformas que ha supuesto el Espacio Europeo de Enseñanza Superior (EEES o Plan Bolonia) como reto innovador en las aulas en tanto en cuanto contenidos y fórmulas. Esta aportación intelectual a las nuevas corrientes docentes se ha

plasmado en un trabajo, multidisciplinar y variado, que se presenta en formato de libro, patrocinado por el Fórum Internacional de Comunicación y Relaciones Públicas (Fórum XXI), la Sociedad Española de Estudios de la Comunicación Iberoamericana (SEECI) y el Grupo de Investigación Validado Complutense Concilium. En estas páginas el lector podrá hallar un selecto grupo de trabajos encargados a unos autores comprometidos con las reformas educativas, quienes conforman la vanguardia actual en el campo de la Comunicación, para la confección de un estudio prospectivístico sobre las directrices por las que se encaminan los referentes en la nueva Universidad derivada del EEES. A través de los títulos recogidos en la colección Nuevo Impulso Educativo se pueden atisbar las líneas que marcarán el futuro de la realidad universitaria en los campos docentes e investigadores sobre contenidos y formas durante el próximo lustro.

Enrollments in international education programs are projected to

grow exponentially as students, parents, and university personnel seek to prepare future leaders who can live and work effectively in a global environment. What do we know about the outcomes of such programs, and how can educators become more intentional about designing, and assessing, the impact of such courses? How can we help students achieve the intercultural growth and transformation that they may envision as they set forth on their international sojourn? International education provides opportunities for students to grow personally, and to learn in a rich and intense educational environment. The outcomes of such opportunities emphasize not only traditional academic competence, but also changes in motivations, attitudes, self-identity, and values. It is these latter, co-academic, concepts that are the focus of this book. Its goal is to give solid substance to the growth and transformation approach to study abroad. It defines the central concept of intercultural competence, sets it within the framework of transformative learning theory, and offers ideas and strategies for facilitating its development. In doing so, it goes far beyond traditional emphases on the achievement of such formal skills as foreign language acquisition or specific knowledge of course content in national literatures, arts, or history. This book provides study abroad educators with a theoretical framework and examples of practice to craft more meaningful activities that will make a long-term difference in the quality of student experiences, and set the stage for transformative change. If we plan to send a million students a year to study abroad within the decade, we need approaches to maximize student growth outcomes in an efficient and effective way. It is also relevant for anyone engaged in courses in adult education, college student services, comparative and international education, international business, intercultural relations, and service learning that involve study abroad, and that raise corresponding issues of curriculum design.

This book reports on the reconnaissance and survey of the prehistoric settlement site at the modern fishing town of Puerto López, Canton Jipijapa, in the southern Manabí province of Ecuador. The earliest recorded occupation of the prehistoric site of López Viejo pertains to the Early Formative period Valdivia culture (c. 3500 BC-1500 BC). Subsequent settlement pertains to the Engoroy Culture, the Bahía and Guangala Cultures (c 300 BC-AD 800) and the Manteno Culture (AD 800- AD 1532).

Subsequent chapters discuss the archaeological excavations with a preliminary summary of occupation, and analysis of the finds.

Multiword expressions (MWEs) are a challenge for both the natural language applications and the linguistic theory because they often defy the application of the machinery developed for free combinations where the default is that the meaning of an utterance can be predicted from its structure. There is a rich body of primarily descriptive work on MWEs for many European languages but comparative work is little. The volume brings together MWE experts to explore the benefits of a multilingual perspective on MWEs. The ten contributions in this volume look at MWEs in Bulgarian, English, French, German, Maori, Modern Greek, Romanian, Serbian, and Spanish. They discuss prominent issues in MWE research such as classification of MWEs, their formal grammatical modeling, and the description of individual MWE types from the point of view of different theoretical frameworks, such as Dependency Grammar, Generative Grammar, Head-driven Phrase Structure Grammar, Lexical Functional Grammar, Lexicon Grammar.

Take Your Church's Pulse presents ten vital signs of a healthy church--five key commitments and five key functions. It then introduce you to a church-health diagnostic tool you can apply to your setting. Thousands of pastors and leaders around the world have found this paradigm helpful in organizing the ministry and mission of the local church. This book and the free diagnostic tool it presents are most useful if accompanied by a healthy process of conversations. With such a process, led by the Spirit, this book can help you discern a preferred future for your community of faith. Koster and Wagenveld write: "A healthy community of faith is rooted first of all in the character and nature of God. It understands its mission and purpose in the world and organizes its life and work to be faithful and effective in its context. None of these vital signs stands alone. It is a combination of factors that together make up a faithful and fruitful organism, the living Church of our Lord Jesus Christ. There is no magic in the number ten, but for the teaching purposes it has worked quite well in different cultural contexts in providing ideas and a language for discussing important issues in congregational life and mission." The intended audience for this book is any pastor, leader, or church member who is interest in having healthy conversations with others to strengthen the local church.

Albert Ellis founded and has spent a lifetime practising and teaching rational emotive behaviour therapy. REBT (previously RET) is important not only in its own terms as an effective therapeutic approach to emotional disturbance, but also as the precursor of the cognitive-behavioural therapy movement which now exerts such an influence on the mental health field. Joseph Yankura and Windy Dryden present a lucid overview of the life and contributions of Albert Ellis. Using excerpts from Ellis's own writings to clarify the discussion, they look in particular at the famous ABC analysis which enables people to understand and deal with their problems, the key concepts of ego disturbance and discomfort disturbance, and Ellis's view

In 1996 Joseph LeDoux's The Emotional Brain presented a revelatory examination of the biological bases of our emotions and memories. Now, the world-renowned expert on the brain has produced with a groundbreaking work that tells a more profound story: how the little spaces between the neurons—the brain's synapses—are the channels through which we think, act, imagine, feel, and remember. Synapses encode the essence of personality, enabling each of us to function as a distinctive, integrated individual from moment to moment. Exploring the functioning of memory, the synaptic basis of mental illness and

drug addiction, and the mechanism of self-awareness, *Synaptic Self* is a provocative and mind-expanding work that is destined to become a classic.

The central figure of this novel is a young man whose parents were executed for conspiring to steal atomic secrets for Russia. His name is Daniel Isaacson, and as the story opens, his parents have been dead for many years. He has had a long time to adjust to their deaths. He has not adjusted. Out of the shambles of his childhood, he has constructed a new life—marriage to an adoring girl who gives him a son of his own, and a career in scholarship. It is a life that enrages him. In the silence of the library at Columbia University, where he is supposedly writing a Ph.D. dissertation, Daniel composes something quite different. It is a confession of his most intimate relationships—with his wife, his foster parents, and his kid sister Susan, whose own radicalism so reproaches him. It is a book of memories: riding a bus with his parents to the ill-fated Paul Robeson concert in Peekskill; watching the FBI take his father away; appearing with Susan at rallies protesting their parents' innocence; visiting his mother and father in the Death House. It is a book of investigation: transcribing Daniel's interviews with people who knew his parents, or who knew about them; and logging his strange researches and discoveries in the library stacks. It is a book of judgments of everyone involved in the case—lawyers, police, informers, friends, and the Isaacson family itself. It is a book rich in characters, from elderly grandmothers of immigrant culture, to covert radicals of the McCarthy era, to hippie marchers on the Pen-tagon. It is a book that spans the quarter-century of American life since World War II. It is a book about the nature of Left politics in this country—its sacrificial rites, its peculiar cruelties, its humility, its bitterness. It is a book about some of the beautiful and terrible feelings of childhood. It is about the nature of guilt and innocence, and about the relations of people to nations. It is *The Book of Daniel*.
