 The first book of its kind, How to Rebuild the Honda B-Series Engine shows exactly how to rebuild the ever-popular Honda B-series engine. The book explains variations between the different B-series designations and elaborates upon the features that make this engine family such a tremendous and reliable design. Honda B-series engines are some of the most popular for enthusiasts to swap, and they came in many popular Honda and Acura models over the years, including the Civic, Integra, Accord, Prelude, CRX, del Sol, and even the CR-V. In this special Workbench book, author Jason Siu uses more than 600 photos, charts, and illustrations to give simple step-by-step instructions on disassembly, cleaning, machining tips, pre-assembly fitting, and final assembly. This book gives considerations for both stock and performance rebuilds. It also guides you through both the easy and tricky procedures, showing you how to rebuild your engine and ensure it is working perfectly. Dealing with considerations for all B-series engines-foreign and domestic, VTEC and non-VTEC-the book also illustrates many of the wildly vast performance components, accessories, and upgrades available for B-series engines. As with all Workbench titles, this book details and highlights special components, tools, chemicals, and other accessories needed to get the job done right, the first time. Appendices are packed full of valuable reference information, and the book includes a Work-Along-Sheet to help you record vital statistics and measurements along the way. You'll even find tips that will help you save money without compromising top-notch results.

Perhaps the most charismatic automobile ever, the Volkswagen Beetle was the longest-running, most-manufactured automobile on a single platform of all time. From 1938 to 2003, more than 21.5 million "Bugs" were assembled, distributed, and sold on nearly every continent in the world.

Throughout the Beetle's successful run, many of these cars have been relegated to project car status due to their age or condition. Airkooled Kustoms, a VW restoration shop in Hazel Green, Alabama, brings its expertise in restoring these cars to book form with this all-encompassing compilation. Restoring your Beetle is covered through step-by-step sequences from unbolting that first nut through polishing the paint on your freshly restored Bug. The specialists at Airkooled Kustoms walk you through the proper disassembly methods, restoring versus replacing components, and reassembling your restored Bug, covering everything related to the body, undercarriage, and interior along the way. It's about time a thorough, hands-on restoration book has been authored by authorities who know the Beetle like the back of their hands. With this book, you will have everything you need to bring your old or new VW Beetle project back to life. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial; color: #000000}

As the world of work and jobs is more uncertain than ever because of various trends impacting it, including the rise of robotics and the gig economy, *Cooperatives and the World of Work* furthers the debate on the future of work, sustainable development, and the social and solidarity economy of which cooperatives are a fundamental component. Throughout the book, the authors, who are experts in their respective fields, do not limit themselves to praising the advantages of the cooperative model. Rather, they challenge the narrow understanding of cooperatives as a mere business model and raise debate on the more fundamental role that cooperatives play in responding to social changes and in changing society itself. The book is unique in tracing the historical connection between cooperatives and the world of work since the end of the First World War and the recent shifts and restructuring in enterprise and the workplace. It presents a redefinition of the very concept of work, focusing on organizational innovation. This book is published in recognition of 100 years of the International Labour Organization, and gathers together research from leading experts who were brought together at an event co-hosted by the International Co-operative Alliance (ICA) and the International Labour Organization (ILO).
