The truck's role in American society changed dramatically from the 1960s through the 1980s, with the rise of off-roaders, the van craze of the 1970s and minivan revolution of the 1980s, the popularization of the SUV as family car and the diversification of the pickup truck into multiple forms and sizes. This comprehensive reference book follows the form of the author's popular volumes on American cars. For each year, it provides an industry overview and, for each manufacturer, an update on new models and other news, followed by a wealth of data: available powertrains, popular options, paint colors and more. Finally, each truck is detailed fully with specifications and measurements, prices, production figures, standard equipment and more.

Abraham Lincoln is the most revered president in American history, but the woman at the center of his life—his wife, Mary—has remained a historical enigma. One of the most tragic and mysterious of nineteenth-century figures, Mary Lincoln and her story symbolize the pain and loss of Civil War America. Authoritative and utterly engrossing, Mrs. Lincoln is the long-awaited portrait of the woman who so richly contributed to Lincoln's life and legacy.

For all being interested in astronautics, this translation of Hermann Oberth's classic work is a truly historic event. Readers will be impressed with this extraordinary pioneer and his incredible achievement. In a relatively short work of 1923, Hermann Oberth laid down the mathematical laws governing rocketry and spaceflight, and he offered practical design considerations based on those laws.
