RAYMOND WENDY

Songs of Kabir Hachette India
 Autobiographical novel of a Hindi author.
Repertoires and Choices in African Languages MIT Press
 With a trail of stiff and thugs behind him, Hari Majestic traverses the megacity of Bengaluru trying to right many wrongs. A foreign tourist, a girl originally adopted from India, has come back to pursue a career in cinema - only to vanish off the face of the earth. Mr Majestic, a tout and petty conman by profession, is asked to track her down and must use all his scamster skills and street smartness to pull it off. Little does he know the lethal dangers he will have to face - armed torpedoes, monsoon floods, crazy riots and

his own existential fears of possibly being reborn as a dog.

Mr Majestic - The Tout of Bengaluru

Rajkamal Prakashan

In the idyllic university town, young women daydreamed as they lay on the grass and gazed up at the clouds. Young men took morning walks at Alfred Park. Hot summer afternoons were for drinking sherbet and eating watermelons, and evenings were meant for reading poetry. It was also a time of stifling social mores, and love was an unattainable ideal seldom realized. Allahabad of the 1940s is the serene backdrop to the turbulence of Chander's love for his professor's daughter Sudha. Driven by his passionate belief in the transcending purity of their love, Chander persuades Sudha to marry another man, to devastating consequences. Unhinged by his separation

from Sudha and consumed by a restless desire to make sense of love—Is it really about sex? Is the purity of love a lie?—Chander spirals into a destructive affair with the seductive Pammi. Immensely popular since its publication more half a century ago, Chander & Sudha continues to seduce readers with its potent mix of tender passion and heartbreaking tragedy.

Chander and Sudha Penguin UK

The sacred city of Banāras on the River Ganges is one of the oldest living cities in the world—as old as Jerusalem, Athens, and Peking. It is the place where Shiva, the Lord of All, is said to have made his permanent home since the dawn of creation. There are few cities in India as traditionally Hindu and as symbolic of the whole of Hindu culture as Banāras. In this eloquent, finely observed study, Diana Eck

shows how the city over the centuries has become a lens through which the Hindu vision of the world is precisely focused. She reveals the spiritual and historical resonance of this holy place where great sages such as the Buddha and Shankara were taught, where ashrams, palaces, and universities were built, where God has been imagined and imagined in a thousand ways. She describes the rites of its temples, the busy life of its riverfront, and the exuberance of its festivals. She tells how people travel from all over India to Banāras for the privilege of dying a good death here, for they believe that on the banks of the River Ganges where “the atmosphere of devotion is improbable in its strength,” it is possible to be released from the earthly round forever. In her account of the sacred history, geography, and art of the city, its elaborate and thriving rituals, its myths and literature, and its importance to pilgrims and seekers, Diana Eck uses her wealth of scholarship to make the Hindu tradition come powerfully alive so that we come to understand the meaning of this sacred city to the millions of believers who have been coming here for over 2,500 years.

Kashi Ka Aasi Cambridge University Press
Fictional biography of the sixteenth century poet Tulsidas, who is revered as the greatest of the Indian poets.

Of Love and Politics Walter de Gruyter
Narrating the making of the Hindus' most sacred and heritage city of India (Banaras) this book will serve as lead reference and insightful reading for understanding the cultural complexities, archetypal connotations, rituals, and vivid heritagescapes that maintain India's pride of history and culture.

Banaras Springer Nature

What does the Biblical story of Nathan and David say about effective communication skills? How do you identify the Raja Bhoj, the Gangu Teli and the Shekchilli in your office? What is the corporate equivalent of an Ashwamedha yajna? Drawing from sources as diverse as the Mahabharata and the Bible, the Vikram-Betal stories, the Iliad and the Odyssey, Islamic tenets, the tales of rishis and kings, and fables from around the world, Devdutt Pattanaik, India's leading mythologist, provides a fascinating account of what leadership entails. How to choose the right leader, effectively communicate with a boss, maintain the right balance between discipline and leniency? In these and other workplace situations, Pattanaik shows what leaders of today can learn about the art of leadership from stories written thousands of years ago, things no management course can teach. Leader: 50

Insights from Mythology uses myths and legends to arrive at wisdom that is both time-worn and refreshingly new, on what makes a good leader.

Kashi the City Illustrious, Or Benares Pan Macmillan

On the history and religious importance of the city of Varanasi.

Pita, Putra ReadHowYouWant.com

This open access book takes a multidisciplinary approach to provide a holistic understanding of late old age, and situates the aged person within the context of family, caregivers, clinical and other institutions. All through the book, the author discusses preparedness for an aging individual as well as the society in the Indian context. The book highlights inevitable but mostly neglected health issues like depression, dementia, fall, and frailty and provides detailed analyses of solutions that are practicable in low resource settings. It also brings up intergenerational differences and harmony in the context of holistic care of older Indians. Alongside clinical perspectives, the book uses narratives of elderly patients to dwell on the myriad of problems and issues that constitute old age healthcare. Demonstrating cases that range from the most influential to the most underprivileged elderly in India, the book enlightens multiple caregivers—doctors, nurses, and professional caregivers as well as family members—about the dynamic approach required in dealing with complex issues related to late old age. The narratives make the book relatable and interesting to non-academic readers, with important lessons for gerontological and geriatric caregiving. It is also of use to older adults in preparing for active aging.

Development of Biopharmaceutical Drug-Device Products Open Road Media

Story of Hori, a poor peasant who yearns to own a cow and to make the pious Hindu's traditional gift to a Brahmin when he dies. Through Premchand's vivid character portrayals we witness the efforts of Hori's family to survive the conflicts of village politics and the webs spun by colonial landownership patterns.

Counterposed to the culture of rural connectedness but also constriction is the isolation but also freedom of the city. Here the rigors of industrialization and empty materialism only can be offset by the promise of Gandhian idealism.

Tamas Rupa Publications

'I will never forget my first sight of the river in Varanasi, from the narrowness and constriction of the alleys, thronged with activity, to the sudden release of the waterfront, the labyrinth's end . . . It

seems that all of life has its assigned place on the stone steps leading down to the Ganges. Some are used for bathing, others for laundry, washing buffalo, puja (worship, ceremonial offering), and this one for the business of death. The smells are of wood smoke, buffalo dung, urine and jasmine flowers. The sounds are of rustling kites and lowing cattle, crackling wood and prayer. . . Piers Moore Ede first fell in love with Varanasi when he passed through it on his way to Nepal in search of wild honey hunters. In the decade that followed it continued to exert its pull on him, and so he returned to live there, to press his ear to its heartbeat and to discover what it is that makes the spiritual capital of India so unique. In this intoxicating 'city of 10,000 widows', where funeral pyres smoulder beside the river in which thousands of pilgrims bathe, and holiness and corruption walk side by side, Piers encounters sweet-makers and sadhus, mischievous boatmen and weary bureaucrats, silk weavers and musicians and discovers a remarkable interplay between death and life, light and dark.

Health and Wellbeing in Late Life

Routledge

An introduction to a broad range of topics in deep learning, covering mathematical and conceptual background, deep learning techniques used in industry, and research perspectives. “Written by three experts in the field, Deep Learning is the only comprehensive book on the subject.” —Elon Musk, cochair of OpenAI; cofounder and CEO of Tesla and SpaceX
Deep learning is a form of machine learning that enables computers to learn from experience and understand the world in terms of a hierarchy of concepts. Because the computer gathers knowledge from experience, there is no need for a human computer operator to formally specify all the knowledge that the computer needs. The hierarchy of concepts allows the computer to learn complicated concepts by building them out of simpler ones; a graph of these hierarchies would be many layers deep. This book introduces a broad range of topics in deep learning. The text offers mathematical and conceptual background, covering relevant concepts in linear algebra, probability theory and information theory, numerical computation, and machine learning. It describes deep learning techniques used by practitioners in industry, including deep feedforward networks, regularization, optimization algorithms, convolutional networks, sequence modeling, and practical methodology; and it surveys such applications as natural language processing, speech recognition, computer

vision, online recommendation systems, bioinformatics, and videogames. Finally, the book offers research perspectives, covering such theoretical topics as linear factor models, autoencoders, representation learning, structured probabilistic models, Monte Carlo methods, the partition function, approximate inference, and deep generative models. Deep Learning can be used by undergraduate or graduate students planning careers in either industry or research, and by software engineers who want to begin using deep learning in their products or platforms. A website offers supplementary material for both readers and instructors.

Nonsense Novels Bloomsbury Publishing
Most African languages are spoken by communities as one of several languages present on a daily basis. The persistence of multilingualism and the linguistic creativity manifest in the playful use of different languages are striking, especially against the backdrop of language death and expanding monolingualism elsewhere in the world. The effortless mastery of several languages is disturbing, however, for those who take essentialist perspectives that see it as a problem rather than a resource, and for the dominating, conflictual, sociolinguistic model of multilingualism. This volume investigates African minority languages in the context of changing patterns of multilingualism, and also assesses the status of African languages in terms of existing influential vitality scales. An important aspect of multilingual praxis is the speakers' agency in making choices, their repertoires of registers and the multiplicity of language ideology associated with different ways of speaking. The volume represents a new and original contribution to the ethnography of speaking of multilingual practices and the cultural ideas associated with them.

Japanese Conversation-grammar

London : Allen & Unwin

"Set in Aligarh in the early 1960s, after the dust of Partition has ostensibly settled, Topi Shukla is a story of two friends - one Hindu and the other Muslim." "Through the characters of people like Topi and Iffan, the novel looks at the lives of ordinary people trying to survive in a society that insists on a brutal conformity of behaviour. It is about individuals whose spirits are paralysed because they cannot conform, and about history's inability to teach mankind any worthwhile lessons."

"Language plays an important part in this narrative, operating almost as a character in its own right. Topi, as a Hindi bull in the Urdu china shop, invokes the historical

stand-off between the two languages. The novel also explores the culture and psyche of Uttar Pradesh with its very Muslim Aligarh, its very Hindu Benares, and their exotic confluence in Lucknow."--BOOK JACKET.

Introduction to Information Retrieval Springer

It is the sunset of the Mughal Empire. The splendour of imperial Delhi flares one last time. The young daughter of a craftsman in the city elopes with an officer of the East India Company. And so we are drawn into the story of Wazir Khanam: a dazzlingly beautiful and fiercely independent woman who takes a series of lovers, including a Navab and a Mughal prince—and whom history remembers as the mother of the famous poet Dagh. But it is not just one life that this novel sets out to capture: it paints in rapturous detail an entire civilization. Beginning with the story of an enigmatic and gifted painter in a village near Kishangarh, *The Mirror of Beauty* embarks on an epic journey that sweeps through the death-giving deserts of Rajputana, the verdant valley of Kashmir and the glorious cosmopolis of Delhi, the craft of miniature painting and the art of carpet designing, scintillating musical performances and recurring paintings of mysterious, alluring women. Its scope breathtaking, its language beguiling, and its style sumptuous, this is a work of profound beauty, depth and power.

Thousands of miles apart, a man and a woman dream of each other, unaware that they're bound together by an otherworldly evil that will threaten everyone they love. Tamara Whelan and her sullen adolescent daughter have just arrived in the isolated Wyoming mining town of Iron Mountain. The financially strapped single mother has accepted a teaching job, replacing someone who died under suspicious circumstances. As Tamara struggles to adjust to life among superstitious neighbors in an unforgiving place, she's plagued by horrifying night visions of a strange man and an unfamiliar beach that glistens in the moonlight. Unbeknownst to her, the man, Thad Alexander, is real. He lives in Belize and has been dreaming about her as well. These two strangers find their lives increasingly intertwined as mysterious and menacing extraterrestrial technology allows them to read each other's minds and become intimately familiar with each other's worlds. Amid natural disasters and inexplicable vanishings, Thad and Tamara find themselves at the tumultuous center of a

titanic battle between love and destruction, waged by forces beyond their control. A novel that expands the boundaries of the paranormal, *Nightmare Country* tackles weighty issues of time, love, loss, and the impermanence of life. [Inventory of Sanskrit Scholars](#) Penguin Books India

The biotechnology/biopharmaceutical sector has tremendously grown which led to the invention of engineered antibodies such as Antibody Drug Conjugates (ADCs), Bispecific T-cell engager (BITES), Dual Variable Domain (DVD) antibodies, and fusion proteins that are currently being used as therapeutic agents for immunology, oncology and other disease conditions. Regulatory agencies have raised the bar for the development and manufacture of antibody-based products, expecting to see the use of Quality by Design (QbD) elements demonstrating an in-depth understanding of product and process based on sound science. Drug delivery systems have become an increasingly important part of the therapy and most biopharmaceuticals for self-administration are being marketed as combination products. A survey of the market indicates that there is a strong need for a new book that will provide "one stop shopping" for the latest information and knowledge of the scientific and engineering advances made over the last few years in the area of biopharmaceutical product development. The new book entitled *Development of Biopharmaceutical Drug Device Products* is a reference text for scientists and engineers in the biopharmaceutical industry, academia or regulatory agencies. With insightful chapters from experts in the field, this new book reviews first principles, covers recent technological advancements and provides case studies and regulatory strategies relating to the development and manufacture of antibody-based products. It covers topics such as the importance of early preformulation studies during drug discovery to influence molecular selection for development, formulation strategies for new modalities, and the analytical techniques used to characterize them. It also addresses important considerations for later stage development such as the development of robust formulations and processes, including process engineering and modeling of manufacturing unit operations, the design of analytical comparability studies, and characterization of primary containers (pre-filled syringes and vials). Finally, the latter half of the book reviews key considerations to ensure the development

and approval of a patient-centered delivery system design. This involves the evolving regulatory framework with perspectives from both the US and EU industry experts, the role of international standards, design control/risk management, human factors and its importance in the product development and regulatory approval process, as well as review of the risk-based approach to bridging between devices used in clinical trials and the to-be-marketed device. Finally, case studies are provided throughout. The typical readership would have biology and/or engineering degrees and would include researchers, scientific leaders, industry specialists and technology developers working in the biopharmaceutical field.

The Gift of a Cow Cambridge Scholars Publishing

Deep Learning Tranquebar

From the opening sequence, in which mid-nineteenth-century Indian fishermen hear the possibility of redemption in an old

woman's madness, *No Aging in India* captures the reader with its interplay of story and analysis. Drawing on more than a decade of ethnographic work, Lawrence Cohen links a detailed investigation of mind and body in old age in four neighborhoods of the Indian city of Varanasi (Banaras) with events and processes around India and around the world. This compelling exploration of senility—encompassing not only the aging body but also larger cultural anxieties—combines insights from medical anthropology, psychoanalysis, and postcolonial studies. Bridging literary genres as well as geographic spaces, Cohen responds to what he sees as the impoverishment of both North American and Indian gerontologies—the one mired in ambivalence toward demented old bodies, the other insistent on a dubious morality tale of modern families breaking up and abandoning their elderly. He shifts our attention irresistibly toward how old age comes to matter in the constitution of societies and their narratives of identity

and history.

Varanasi Down the Ages Penguin Books India

Songs of Kabir Rabindranath Tagore -

Kabir lived in the 15th Century (1440-1518); born to Mohammadan parents; he came under the influence of the famous Hindu saint; Sri Ramananda and delved deep into the mysteries of Hindu mysticism. A true worshipper of God; he emphasized the purity of mind and selfless devotion to God. He openly opposed the weaknesses of both Hinduism and Islam. During his life time he composed many poems. They are usually two line couplets; known as dohas; recited by many scholars even today to denote some deep philosophical truths. All these songs of Kabir were translated into English by none other than Rabindranath Tagore; the mystic poet and the Noble Laureate; the first edition; published by The Macmillan Company; 1915; New York. This book shall prove to be an asset for the Kabir lovers who can't enjoy his writings in Hindi.
