1.8 and 1.4 are two different engines. The 1.8 is harder to make power with because it's n/a. The turbo is able to make way more power due to fact it's forced induction. Other differences are 1.8 is a timing belt. 1.4 is a timing chain. 1.4 will

also generally get better mpg over the 1.8

Difference between 1.8l and 1.4l turbo - Chevy Sonic ...The Ecotec engine typically has problems with its timing chain, which frequently slips and wears down after long periods of use. The tensor in the engine also suffers from damage sometimes, and the cylinders may not fire as they are supposed to, resulting in decreased engine efficiency.
