Survival Tips for the Horticulturally Challenged W. W. Norton

From Orson Scott Card, the internationally bestselling author of Ender's Game, comes the first novel in the Pathfinder trilogy, the riveting story of Rigg, a teenager who possesses a special power that allows him to see the paths of people's pasts. A powerful secret. A dangerous path. Rigg is well trained at keeping secrets. Only his father knows the truth about Rigg's strange talent for seeing the paths of people's pasts. But when his father dies, Rigg is stunned to learn just how many secrets Father had kept from him—secrets about Rigg's own past, his identity, and his destiny. And when Rigg discovers that he has the power not only to see the past, but also to change it, his future suddenly becomes anything but certain. Rigg's birthright sets him on a path that leaves him caught between two factions, one that wants him crowned and one that wants him dead. He will be forced to question everything he thinks he knows, choose who to trust, and push the limits of his talent...or forfeit control of his destiny.

Monk's House in Sussex is the former home of Leonard and Virginia Woolf. It was bought by them in 1919 as a country retreat, somewhere they came to read, write and work in the garden. From the overgrown land behind the house they created a brilliant patchwork of garden rooms, linked by brick paths, secluded behind flint walls and yew hedges. The story of this magical garden is the subject of this book and the author has selected quotations from the writings of the Woolfs which reveal how important a role the garden played in their lives, as a source of both pleasure and inspiration.

Virginia wrote most of her major novels at Monk's House, at first in a converted tool shed, and later in her purpose-built wooden writing lodge tucked into a corner of the orchard. Caroline Zoob lived with her husband, Jonathan, at Monk's House for over a decade as tenants of the National Trust, and has an intimate knowledge of the garden they tended and planted. The photographer, Caroline Arber, was a frequent visitor to the house during their tenancy and her spectacular photographs, published here for the first time, often reveal the garden as it is never seen by the public: at dawn, in the depths of winter, at dusk. The photographs and text, enriched with rare archive images and embroidered garden plans, take the reader on a journey through the various garden "rooms", (including the Italian Garden, the Fishpond Garden, the Millstone Terrace and the Walled Garden). Each garden room is presented in the context of the lives of the Woolfs, with fascinating glimpses into their daily routines at Rodmell. This beautiful book is an absorbing account of the creation of a garden which will appeal equally to gardeners and those with an interest in Virginia and Leonard Woolf.

Indoor hanging baskets? Who needs them! Learn all about the Japanese art of creating pot-less suspended plants, known as kokedama, from New Zealand hanging plant extraordinaire and botanist, Coraleigh Parker. Coraleigh's moss ball creations, featuring orchids, air plants, cacti, succulents, flowering bulbs, tropical plants and even small trees and herbs, are suspended in mid-air and supported by nothing more than a series of strings, intricately wrapped, cocoon style, around a root ball. Kokedamas are very simple to make and have a magical quality; by suspending them in the air with string, with Coraleigh's help and 25 easy-to-follow projects, you can create a hanging garden inside your home in no time. Decorating with indoor plants has never been more popular and, following on from terrariums, concrete pot planting and the obsession with fern, cacti and succulents, contemporary kokedama is the next trend that's spreading fast. Kokedama is the ultimate botanical trend as it offers everything through a single, versatile and inexpensive craft: you can turn any of your favourite plants into a kokedama "on a string"!

"What would the world look like if girls grew up reading fairytales made from the magic they carry inside themselves? Breathtakingly beautiful, is what." —Lidia Yuknavich, national bestselling author In her debut children's book, Rebecca Solnit reimagines a classic fairytale with a fresh, feminist Cinderella and new plot twists that will inspire young readers to change the world, featuring gorgeous silhouettes from Arthur Rackham on each page. In this modern twist on the classic story, Cinderella, who would rather just be Ella, meets her fairy godmother, goes to a ball, and makes friends with a prince. But that is where the familiar story ends. Instead of waiting to be rescued, Cinderella learns that she can save herself and those around her by being true to herself and standing up for what she believes. "Being a princess is absolutely fine if that's what you choose. It's having those choices taken away from you that make for big problems. Cinderella in Solnit's book is given that choice. She's allowed to say what her dreams are, and then she goes out and attains them. And they're not huge ridiculous dreams but small, happy, manageable ones. Ultimately, that's the gift Ms. Solnit is giving kids with this book." —School Library Journal "This is a reminder of hope and possibility, of kindness and compassion, and—perhaps most salient—imagination and liberty. Through the imaginations of our childhoods, can we find our true selves liberated in adulthood?" —Chelsea Handler "This is, hands down, a wonderful book—one that even the jaded reader will clasp upon completion with a contented sigh." —The New York Times

Mathematical Analysis I Simon and Schuster

The purpose of the volume is to provide a support for a first course in Mathematics. The contents are organised to appeal especially to Engineering, Physics and Computer Science students, all areas in which mathematical tools play a crucial role. Basic notions and methods of differential and integral calculus for functions of one real variable are presented in a manner that elicits critical reading and

prompts a hands-on approach to concrete applications. The layout has a specifically-designed modular nature, allowing the instructor to make flexible didactical choices when planning an introductory lecture course. The book may in fact be employed at three levels of depth. At the elementary level the student is supposed to grasp the very essential ideas and familiarise with the corresponding key techniques. Proofs to the main results befit the intermediate level, together with several remarks and complementary notes enhancing the treatise. The last, and farthest-reaching, level requires the additional study of the material contained in the appendices, which enable the strongly motivated reader to explore further into the subject. Definitions and properties are furnished with substantial examples to stimulate the learning process. Over 350 solved exercises complete the text, at least half of which guide the reader to the solution. This new edition features additional material with the aim of matching the widest range of educational choices for a first course of Mathematics.

Thirty years ago, David Leavitt first appeared on the literary scene with a gutsy story collection that stunned readers and reviewers. Just twenty-three, he was hailed as a prodigy of sorts: “remarkably gifted” (The Washington Post), with “a genius for empathy” (The New York Times Book Review) and “a knowledge of others' lives . . . that a writer twice his age might envy” (USA Today). “Regardless of age,” wrote the New York Times, “few writers so effortlessly achieve the sense of maturity and earned compassion so evident in these pages.” In “Territory,” a well-intentioned, liberal mother, presiding over her local Parents of Lesbians and Gays chapter, finds her acceptance of her son's sexuality shaken when he arrives home with a lover. In the title story, a family extended through divorce and remarriage dances together at the end of a summer party-in the recognition that they are still bound by the very forces that split them apart. Tender and funny, these stories reveal the intricacies and subtleties of the dances in which we all engage.
