Maybe it was the recent Atari 2600 milestone anniversary that fueled nostalgia for the golden days of computer and console gaming. Every Game Boy must ponder his roots from time to time. But whatever is driving the current retro gaming craze, one thing is

certain: classic games are back for a big second act, and they're being played in both old and new ways. Whether you've just been attacked by Space Invaders for the first time or you've been a Pong junkie since puberty, Chris Kohler's Retro Gaming Hacks is the indispensable new guide to playing and hacking classic games. Kohler has compiled tons of how-to information on retro gaming that used to take days or weeks of web surfing to track down and sort through, and he presents it in the popular and highly readable Hacks style. Retro Gaming Hacks serves up 85 hard-nosed hacks for

reviving the classic games. Want to game on an original system? Kohler shows you how to hack ancient hardware, and includes a primer for home-brewing classic software. Rather adapt today's equipment to run retro games? Kohler provides emulation techniques, complete with instructions for hacking a classic joystick that's compatible with a contemporary computer. This book also teaches readers to revive old machines for the original gaming experience: hook up an Apple II or a Commodore 64, for example, and play it like you played before. A video game journalist and author of *Power Up: How Japanese Video Games Gave the World an Extra Life*, Kohler has taught the history of video games at Tufts University. In *Retro*

*Gaming Hacks*, he locates the convergence of classic games and contemporary software, revealing not only how to retrofit classic games for today's systems, but how to find the golden oldies hidden in contemporary programs as well. Whether you're looking to recreate the magic of a Robotron marathon or simply crave a little handheld Donkey Kong, *Retro Gaming Hacks* shows you how to set the way-back dial.

**Being Dragonborn** Dark Horse Comics  
Toward the end of the year 1920 the Government of the United States had practically completed the programme, adopted during the last months of President Winthrop's administration. The country was apparently tranquil. Everybody knows how the Tariff and Labour questions were settled. The war with Germany, incident on that country's seizure of the Samoan Islands, had left no visible scars upon the republic, and the temporary occupation of Norfolk by the invading army had been forgotten in the joy over repeated naval victories, and the subsequent ridiculous plight of General Von Gartenlaube's forces in the

State of New Jersey. The Cuban and Hawaiian investments had paid one hundred per cent and the territory of Samoa was well worth its cost as a coaling station. The country was in a superb state of defence. Every coast city had been well supplied with land fortifications; the army under the parental eye of the General Staff, organized according to the Prussian system, had been increased to 300,000 men, with a territorial reserve of a million; and six magnificent squadrons of cruisers and battle-ships patrolled the six stations of the navigable seas, leaving a steam reserve amply fitted to control home waters. The gentlemen from the West had at last been constrained to acknowledge that a college for the training of diplomats was

as necessary as law schools are for the training of barristers; consequently we were no longer represented abroad by incompetent patriots. The nation was prosperous; Chicago, for a moment paralyzed after a second great fire, had risen from its ruins, white and imperial, and more beautiful than the white city which had been built for its plaything in 1893. Everywhere good architecture was replacing bad, and even in New York, a sudden craving for decency had swept away a great portion of the existing horrors. Streets had been widened, properly paved and lighted, trees had been planted, squares laid out, elevated structures demolished and underground roads built to replace them. The new government buildings and barracks were fine bits of architecture, and the long

system of stone quays which completely surrounded the island had been turned into parks which proved a god-send to the population. The subsidizing of the state theatre and state opera brought its own reward. The United States National Academy of Design was much like European institutions of the same kind. Nobody envied the Secretary of Fine Arts, either his cabinet position or his portfolio. The Secretary of Forestry and Game Preservation had a much easier time, thanks to the new system of National Mounted Police. We had profited well by the latest treaties with France and England; the exclusion of foreign-born Jews as a measure of self-preservation, the settlement of the new independent negro state of Suanee, the checking of immigration, the new laws

concerning naturalization, and the gradual centralization of power in the executive all contributed to national calm and prosperity. When the Government solved the Indian problem and squadrons of Indian cavalry scouts in native costume were substituted for the pitiable organizations tacked on to the tail of skeletonized regiments by a former Secretary of War, the nation drew a long sigh of relief. When, after the colossal Congress of Religions, bigotry and intolerance were laid in their graves and kindness and charity began to draw warring sects together, many thought the millennium had arrived, at least in the new world which after all is a world by itself.

Original Copyright Owner. Elder Scrolls V Titan Books (US, CA) Why do we play games and why do we play them on computers? The contributors of »Games and Rules« take a closer look at the core of each game and the motivational system that is the game mechanics. Games are control circuits that organize the game world with their (joint) players and establish motivations in a dedicated space, a »Magic Circle«, whereas game mechanics are constructs of rules designed for interactions that provide gameplay. Those rules form the base for all the excitement and frustration we experience in games. This anthology contains individual essays by experts and authors with backgrounds in Game Design and Game Studies, who lead the

discourse to get to the bottom of game mechanics in video games and the real world - among them Miguel Sicart and Carlo Fabricatore.
