THIS is the story of my life in Christ. Now, what does living in Christ mean? It means that one is FOR Christ, that one not only accepts Him, but that one lives in Him. Living in Christ has little relationship to the more commonly accepted situation of living as a Christian, or living a Christian life. Living AS a Christian means that one has accepted the tokens of Christianity, that one agrees in the divinity of Christ, that one is a member of a Christian congregation, in a largely Christian community, in a Christian nation. Thus, one can lead a Christian life without knowing Christ and without changing one's existence in the slightest degree. If

a person leads a Christian life, and it does not transform one's existence, then one can be sure that he does not KNOW Christ. Knowing Christ is the only manner in which one can go beyond oneself, and the only manner in which one can go beyond one's world. In knowing Christ, one is immediately lifted out of the mechanical life of the human existence, one transcends the common existence. One is no longer a human machine, leading a hopeless, mechanical life, repeating the same meaningless motions like a robot throughout the years of one's earthly existence. What was Christ's admonition? "Take up the Cross, and follow Me." But, in explication of this admonition, the New Testament contains many significant references to the condition of sleep, and Christ's

exhortations to mankind to awaken. Now, what does this mean? It means that Christ did not wish to be followed by robots and sleepwalkers, He desired man to awaken, and to attain the full use of his earthly powers. Not only are mechanical men of no use to Christ, but they are quite dangerous, they present endless difficulties in the establishment of Christ's Kingdom on earth. The Art and Science of Project Management Fulton Books, Inc. Successful businessman, philanthropist, and motivational speaker Rich DeVos has learned the value of maintaining a positive attitude and offering encouragement to others. Simply by adding these phrases into your daily conversations you can help motivate achievement, instill confidence, and change attitudes in your work and family life. Beyond these practical but profound phrases, DeVos delivers an inspiring message of building hope that resonates in the heart of every human being. Your decision to live with a positive attitude can change your life, your community, even the world. Start today with one small phrase: You can do it.

FORENSIC INVESTIGATOR Geoff

Bernasconi had always been passionate about his job as a policeman in rural New South Wales and, from the earliest days

of his career, went the extra mile, both for victims of crime and for their families. But one night in 1984, he was called to investigate the scene of an horrific car accident in which an entire family had been wiped out – and which it was impossible for him to forget. Geoff's day-to-day working life became a catalogue of tragedies, some of which involved people close to him, and he found himself spiralling downwards in the grip of post-traumatic stress disorder. When Esther McKay, fellow forensic investigator and author of the best-selling *Crime Scene*, heard that Geoff has been awarded maximum compensation for his suffering, she knew immediately this was a story that needed to be told. This is a harrowing account of what it is like to work on the

front-line of crime and tragedy as a forensic investigator. But it is also the inspiring story of someone who has been exposed to sights and experiences many of us can hardly even imagine, yet has emerged from the darkness to begin his journey to recovery.

The notion of the author as the creator and therefore the first owner of a work is deeply rooted both in our economic system and in our concept of the individual. But this concept of authorship is modern. Mark Rose traces the

Andrew Piper grew up liking books and loving computers. While occasionally burying his nose in books, he was going to computer camp, programming his Radio Shack TRS-80, and playing Pong.

His eventual love of reading made him a historian of the book and a connoisseur of print, but as a card-carrying member of the first digital generation—and the father of two digital natives—he understands that we live in electronic times. *Book Was There* is Piper's surprising and always entertaining essay on reading in an e-reader world. Much ink has been spilled lamenting or championing the decline of printed books, but Piper shows that the rich history of reading itself offers unexpected clues to what lies in store for books, print or digital. From medieval manuscript books to today's playable media and interactive urban fictions, Piper explores the manifold ways that physical media have shaped how we read, while also observing his own

children as they face the struggles and triumphs of learning to read. In doing so, he uncovers the intimate connections we develop with our reading materials—how we hold them, look at them, share them, play with them, and even where we read them—and shows how reading is interwoven with our experiences in life. Piper reveals that reading's many identities, past and present, on page and on screen, are the key to helping us understand the kind of reading we care about and how new technologies will—and will not—change old habits. Contending that our experience of reading belies naive generalizations about the future of books, *Book Was There* is an elegantly argued and thoroughly up-to-date tribute to the endurance of books in our ever-evolving

digital world.

This volume of Albi Rosenthal's work was originally conceived as a small selection in celebration of his 85th birthday. It rapidly expanded to a larger volume as the range and depth of his scholarship, and the fascination of his material, became apparent. This more comprehensive collection is presented here in the belief that it will now also be of interest to a much wider audience. *Obiter Scripta* spans the author's output of over sixty years, touching on many subjects on which he is an expert. There are specific studies on Mozart--the field in which he is pre-eminent--and on Monteverdi, Paganini, Haydn, Liszt, and Kodály. He also writes on music collecting and bibliography, fakes and

frauds, discoveries, the perils of auctions, the earliest depiction of a musical instrument in a printed book, and anecdotes and coincidences. He is a Trustee of the Paul Sacher Foundation in Basel and describes how many of the Foundation's major acquisitions were secured. There is a section of tributes, and a number of articles arising from his lifelong interest in Nietzsche. Finally, there are some interviews in which, among other things, Albi talks about himself, his family, and his life in Oxford. Forced by the political situation to leave Germany, Albi Rosenthal had to abandon his hopes of an academic career. He has combined a lifetime of study and business, and in the course of doing so, has become the foremost authority in the field of music manuscripts while

simultaneously pursuing academic work-

hectic environment of an international
