Install - Joomla 2.5. 1. Select Language. Joomla supports many language for ease of usage from users in different countries. Select the language that you prefer your site to be. Click on "Next" to proceed with the installation.

2. Pre-Installation check.

Joomla template quickstart installation documentation ...

Installing Joomla Manually. First, we'll cover the manual Joomla installation. To complete it, you'll need to get your hands dirty and do a little extra work. Overall, there are 5 simple steps that you'll need to follow:

1. Create a MySQL database and user
- How to Easily Install Joomla on Your Web Host (2 Methods ...

Anyways, facing this kind of issues I've planned to write a complete guide about "how to install Joomla templates" and "how to install Joomla extensions" step by step. It's not a complicated type of post that others posted. Yet, It's a very simple, straightforward, and user-focused guide.

How to Install Joomla Template & Extension (Step by Step ...)

Once you click on the Download button for the latest Joomla! version, the installation package will be saved to your hard disk. Locate the installation package (should be named Joomla\_X.X.X-Stable-Full\_Package.zip or similar) that you've just downloaded and extract it to a new folder. Upload the Joomla! Files to Your Server. Now, you need to upload the extracted files and folders to your web server.

How to Install Joomla! - SiteGround Knowledge Resources

Joomla! is offered by most hosting companies under "One Click Installs" (also called Auto Installers) for their customers. The "One Click Install" method offers an "instant" installation of Joomla! which is quick and easy. Follow the instructions your host provides. Use the conventional method of installation. This requires you to copy the Joomla! zip file to your hosting account, unzip, create a database, and then run the installation.

Portal:Beginners - Joomla! Documentation

Manual Installation. First, unzip all of the files in a local directory (for instance

com\_installer). Then transfer the directory (using FTP) to a folder under the install directory (for instance administrator/components), appropriate for the type of extension you are installing (visible in its xml file, a line like <extension type="component" ...). Then use the installer, but select "install from directory" indicating the correct folder name.

Installing an extension - Joomla! Documentation

An online collaborative community manual for Joomla! users, developers or anyone interested in learning more about Joomla! Currently, we have 9,329 articles written, maintained, and translated by our Joomla! community members.

Joomla! Documentation

Upgrade Packages Joomla! 3 - Upgrade packages. Download the package you need to update your Joomla! installation from Joomla! 2.5 and above. Please read the update instructions before updating your website.

Joomla! Downloads - Build your website with the CMS Joomla!

You will need to complete two tasks before you can install Joomla! on your server. First, you will need to download the Joomla! package files. Next, you will need to have a database for Joomla! use. Downloading and Uploading Joomla! Package Files. Download the current release of Joomla! 3.x; Move the downloaded Joomla! installation package to the server.

J3.x:Installing Joomla - Joomla! Documentation

Joomla is a great Content Management System with a lot of flexibility and with an easy-to-use user interface that a lot of people get intimidated about when they realize how many options and configurations are available. This manual is meant to serve as a guide to Joomla's basic features and help you install and start your first Joomla website.
