Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience,

with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

This book provides a philosophic framework for an ideal life and society in Canada. Today, civilized society in Canada appears to be in palliative care. We need to take urgent action to improve this society so we can all lead a free, peaceful, secure, healthy, safe, prosperous, and happy life. The book first provides an assessment of where

we are today, how we got here, and the current issues and challenges. It then describes the need to build a new political and socioeconomic system that provides true personal freedom, inclusive growth, and happiness yearned by the silent majority. The new system is presented as the Kiran Manifesto for Canada that will be a beacon of hope and road map for populist movements in Canada.

This deeply informed and clearly written text provides a comprehensive and comprehensible history of China from prehistory to the present. Now updated to include recent political events and scientific research, the book focuses on the interaction of humans and their environment. Tracing changes in the

physical and cultural world that is home to a fifth of humankind, Robert B. Marks illuminates the paradoxes inherent in China's environmental narrative, demonstrating how historically sustainable practices can, in fact, be profoundly ecologically unsound. The author also reevaluates China's traditional "heroic" storyline, highlighting the marginalization of nature and contacts with other peoples that followed the spread of Chinese civilization while examining the development of a distinctly Chinese way of relating to and altering the environment. Unmatched in his ability to synthesize a complex subject clearly and cogently, Marks has written an accessible yet nuanced history for any student interested in China, past or

present, or indeed in the world's environmental future.

Happiness in World History traces ideas and experiences of happiness from early stages in human history, to the maturation of agricultural societies and their religious and philosophical systems, to the changes and diversities in the approach to happiness in the modern societies that began to emerge in the 18th century. In this thorough overview, Peter N. Stearns explores the interaction between psychological and historical findings about happiness, the relationship between ideas and popular experience, and the opportunity to use historical analysis to assess strengths and weaknesses of dominant

contemporary notions of happiness. Starting with the advent of agriculture, the book assesses major transitions in history for patterns in happiness, including the impact of the great religions, the unprecedented Enlightenment interest in secular happiness and cheerfulness, and industrialization and imperialism. The final, contemporary section covers fascist and communist efforts to define alternatives to Western ideas of happiness, the increasing connections with consumerism, and growing global interests in defining and promoting well-being. Touching on the experiences in the major regions of Asia, Africa, Latin America, Europe, and North America, the text offers an expansive introduction to a new field of study. This book will be of

interest to students of world history and the history of emotions.

Perspectives On The Past AuthorHouse
Now in its fourth edition, this popular text offers a unique perspective on teaching and learning history in the elementary and middle grades. Through case studies of teachers and students in diverse classrooms and from diverse backgrounds, it shows children engaging in authentic historical investigations, often in the context of an integrated social studies curriculum. The central assumption is that children can engage in valid forms of historical inquiry—collecting and data analysis, examining the perspectives of people in the past, considering multiple interpretations, and creating evidence-based historical accounts. In each chapter, the authors

explain how the teaching demonstrated in the vignettes reflects basic principles of contemporary learning theory, thus providing specific examples of successful activities and placing them in a theoretical context that allows teachers to adapt and apply them in a wide variety of settings. New in the Fourth Edition Expanded coverage of world history in two new chapters Integration of new technologies to support history instruction Updated classroom examples, bibliographies, and references

The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and

case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities,

and policy makers looking to build better evidence around what works in development.

So far histories of historiography have concentrated almost exclusively on the West. This is the first book to offer a history of modern historiography from a global perspective. Tracing the transformation of historical writings over the past two and half centuries, the book portrays the transformation of historical writings under the effect of professionalization, which served as a model not only for Western but also for much of non-Western historical studies. At the same time it critically examines the reactions in post-modern and post-colonial thought to established

conceptions of scientific historiography. A main theme of the book is how historians in the non-Western world not only adopted or adapted Western ideas, but also explored different approaches rooted in their own cultures.

A 50-year retrospective World Bank Publications

This edited volume addresses the main lessons and legacies of the 1962 Cuban Missile Crisis from a global perspective. Despite the discoveries of recent research, there is still much more to be revealed about the handling of nuclear weapons before and during the Cuban Missile Crisis (CMC). Featuring contributions from a number of eminent

international scholars of nuclear history, intelligence, espionage, political science and Cold War studies, *An International History of the Cuban Missile Crisis* reviews and reflects on one of the critical moments of the Cold War, focussing on three key areas. First, the volume highlights the importance of memory as an essential foundation of historical understanding and demonstrates how events that rely only on historical records can provide misleading accounts. This focus on memory extends the scope of the existing literature by exploring hitherto neglected aspects of the CMC, including an analysis of the operational aspects of Bomber Command activity, explored through recollections of the aircrews that challenge accounts based on official

records. The editors then go on to explore aspects of intelligence whose achievements and failings have increasingly been recognised to be of central importance to the origins, dynamics and outcomes of the missile crisis. Studies of hitherto neglected organisations such as the US Defense Intelligence Agency (DIA) and the British Joint Intelligence Committee (JIC) both extend our understanding of British and American intelligence machinery in this period and enrich our understanding of key episodes and assessments in the missile crisis. Finally, the book explores the risk of nuclear war and looks at how close we came to nuclear conflict. The risk of inadvertent use of nuclear weapons is evaluated and a new proposed framework for the analysis of

nuclear risk put forward. This volume will be of much interest to students of intelligence studies, international history, foreign policy, security studies and IR in general.

Why Reform Is Needed and How It Could Be Designed Harcourt Brace

This book introduces trainees and newly qualified teachers to the teaching of history in primary schools, and covers key concepts, skills and knowledge for the history curriculum at Foundation Stage, KS1 and KS2. Contents include planning, teaching and learning strategies, assessment, reflection and evaluation, as well as a range of practical ideas for classroom activities and cross-curricular themes. Each chapter is underpinned by national and international research; also included are

links to important themes such as citizenship, out-of-school learning, sustainability, diversity and inclusive practice. Throughout, content is related to new initiatives such as Every Child Matters and Excellence and Enjoyment.

World History PURE SNOW PUBLISHING

The challenges of teaching history are acute where we consider the world history classroom. Generalized world history courses are a part of many, if not most, K-12 curricular frameworks in the

United States. While United States history tends to dominate the scholarship and conversation, there are an equally wide number of middle-level and secondary students and teachers engaged in the study of world history in our public schools. And the challenges are real. In the first place, if we are to mark content coverage as a curricular obstacle in the history classroom, generally, then we must underscore that concern in the world history classroom and for obvious reasons. The curricular terrain to choose from is immense and forever expanding, dealing with the development of numerous civilizations over millennia and across a wide geographic expanse. In addition to curricular concerns, world historical topics are inherently farther away from

most students' lives, not just temporally, but often geographically and culturally. Thus the rationale for the present text, *Hollywood or History? An Inquiry-Based Strategy for Using Film to Teach World History*. The reviews of the first volume *Hollywood or History? An Inquiry-Based Strategy for Using Film to Teach United States History* strategy have been overwhelmingly positive, especially as it pertains to the application of the strategy for practitioner. Classroom utility and teacher practice have remained our primary objectives in developing the *Hollywood or History?* strategy and we are encouraged by the possibilities of Volume II and the capacity of this most recent text to impact teaching and learning in world history. We believe that students'

connection to film, along with teachers' ability to use film in an effective manner, will help alleviate some of the challenges of teaching world history. The book provides 30 secondary lesson plans (grades 6-12) that address nine eras in world history.

A comprehensive review of the research literature on history education with contributions from international experts *The Wiley International Handbook of History Teaching and Learning* draws on contributions from an international panel of experts. Their writings explore the growth the field has experienced in the past three decades and offer observations on challenges and opportunities for the future. The

contributors represent a wide range of pioneering, established, and promising new scholars with diverse perspectives on history education. Comprehensive in scope, the contributions cover major themes and issues in history education including: policy, research, and societal contexts; conceptual constructs of history education; ideologies, identities, and group experiences in history education; practices and learning; historical literacies: texts, media, and social spaces; and consensus and dissent. This vital resource: Contains original writings by more than 40 scholars from seven countries Identifies major themes and issues shaping history education today Highlights history education as a distinct field of scholarly inquiry and academic practice Presents

an authoritative survey of where the field has been and offers a view of what the future may hold Written for scholars and students of education as well as history teachers with an interest in the current issues in their field, The Wiley International Handbook of History Teaching and Learning is a comprehensive handbook that explores the increasingly global field of history education as it has evolved to the present day.

Life Cycle Inventory (LCI) Analysis is the second phase in the Life Cycle Assessment (LCA) framework. Since the first attempts to formalize life cycle assessment in the early 1970, life cycle inventory analysis has been a central part. Chapter 1 “Introduction to Life

Cycle Inventory Analysis“ discusses the history of inventory analysis from the 1970s through SETAC and the ISO standard. In Chapter 2 “Principles of Life Cycle Inventory Modeling”, the general principles of setting up an LCI model and LCI analysis are described by introducing the core LCI model and extensions that allow addressing reality better. Chapter 3 “Development of Unit Process Datasets” shows that developing unit processes of high quality and transparency is not a trivial task, but is crucial for high-quality LCA studies. Chapter 4 “Multi-functionality in Life Cycle Inventory Analysis: Approaches and Solutions” describes how multi-functional processes can be identified. In Chapter 5 “Data Quality in Life Cycle Inventories”, the quality of data

gathered and used in LCI analysis is discussed. State-of-the-art indicators to assess data quality in LCA are described and the fitness for purpose concept is introduced. Chapter 6 “Life Cycle Inventory Data and Databases“ follows up on the topic of LCI data and provides a state-of-the-art description of LCI databases. It describes differences between foreground and background data, recommendations for starting a database, data exchange and quality assurance concepts for databases, as well as the scientific basis of LCI databases. Chapter 7 “Algorithms of Life Cycle Inventory Analysis“ provides the mathematical models underpinning the LCI. Since Heijungs and Suh (2002), this is the first time that this aspect of LCA has been fundamentally presented. In

Chapter 8 “Inventory Indicators in Life Cycle Assessment”, the use of LCI data to create aggregated environmental and resource indicators is described. Such indicators include the cumulative energy demand and various water use indicators. Chapter 9 “The Link Between Life Cycle Inventory Analysis and Life Cycle Impact Assessment” uses four examples to discuss the link between LCI analysis and LCIA. A clear and relevant link between these phases is crucial.

It presents a balanced picture of world history, with all respect for the richness and diversity of the tapestry of the human experience. The text covers individual civilizations such as China, India, and Europe, with due attention paid to the rise of the West, and

provides points of comparison between and among these civilizations.

An Introduction to Modern Political Theory Simon and Schuster

The influence of East on West - of Eastern ideas on Western thought - has become an increasingly vexed issue in recent times. Opinion is divided between two main schools: those who believe that Oriental ideas have exercised a considerable influence on Western thought, and those who, for a variety of reasons, believe that such influence has remained negligible. In this Reader A. L. Macfie suggests that the reality lies somewhere between these two extremes, and that the interest taken by Western thinkers in Eastern thought in the modern period has moved from one of passing interest, through serious

attention, to some level of assimilation and acceptance. Eastern Influences on Western Philosophy explores the extent of Oriental influence on European thought, primarily in the period of the Enlightenment and the nineteenth-century period of doubt and scepticism that followed it. As such it is the first Reader to bring together in one place a series of specific historical and textual studies of Oriental influence upon European thinkers. Starting with Malebranche and ending with Heidegger, other Western thinkers considered include Leibniz, Voltaire, Hume, Hegel, Schopenhauer, Emerson, Thoreau, Nietzsche, Jung and Buber. To

accompany the readings the editor's introduction explores the idea of influence in the context of the chosen readings, and at the same time raises the question of how far Edward Said's thesis regarding Orientalism actually applies to Western thought. Key Features: * Reflects increasing interest in relationship between Eastern and Western Philosophy * Covers major European figures from the 18th and 19th centuries and the way Eastern thought influenced them * Substantial editorial introduction places readings in context and explores the influence of the East on the West * Previous work by editor praised for its accessibility
