The Making of
the Modern

Indian Artist-

Craftsman is

intended to be

a biographical
and critical
insight into
the work of
the potter,
painter and
photographer
Devi Prasad.
Apart from the
making of his
personal
history and his
times, it leads

us to why the
act of making
(art) itself
takes on such
a fundamental
philosophical
significance in
his life. This,
the author
explains,
derives
directly from
his absorption

of Gandhi's philosophy that looked at the act of making or doing as an ethical ideal, and further back to the impact of the Arts and Crafts Movement on the ideology of 'Swadeshi' and on the milieu of Santiniketan. This book examines his art along with his role in political activism which, although garnered on Indian soil made him crisscross national borders and

assume an important role in the international arena of war resistance. Devi Prasad graduated from Tagore's Santiniketan in 1944 when he joined the Hindustani Talimi Sangh (which promulgated Nayee Taleem) at Gandhi's ashram Sevagram as Art 'Teacher'. His political consciousness saw him participate actively in the Quit India Movement in 1942, in Vinoba Bhave's

Bhoodan and later from 1962 onward as Secretary General (later Chairman) of the War Resisters' International, the oldest world pacifist organisation based in London. From there he was able to extend his Gandhian values internationally. All of this, while continuing with his life as a prolific artist. Rather than view them as separate worlds or professions, Devi harmonises

them within an ethical and conscionable whole. He has written widely on the inextricable link between peace and creativity, on child /basic education, Gandhi and Tagore, on politics and art, in English, Hindi and Bangla. In 2007 he was awarded the Lalit Kala Akademi Ratna and in 2008, the Desikottama by Visva Bharati University, Santiniketan. Techniques, Tips, and Tricks for

Drawing on

the collections of the British Museum, the contributors examine more than thirty pottery traditions, including those of ancient Egypt, Mesopotamia, prehistoric Japan, pre-Hispanic Peru, classical Greece, Ming China, and medieval and Renaissance Europe, as well as the ceramics of contemporary Africa and India. With an emphasis on the technological aspects of pottery production,

Pottery in the Making also addresses the broader environmental, political, and cultural contexts in which the potters worked. Discussing the role of tradition in modern studio pottery, this comprehensive volume illuminates the continuing link between potters past and present. *The Potter's Complete Studio Handbook* A&C Black A practical handbook for ceramic artists creating lights

and fountains, showing how to incorporate the necessary electrical and pump elements.

Printing has become a common part of the ceramic artist's practice and today there are more possibilities than ever before. From low-tech mono-prints to digital laser decal, it is now possible to employ a range of techniques to print on clay

and vitreous surfaces. With the ongoing advancement of new technologies and more developed studio-based transfer processes artists continue to push the boundaries of the medium. In this comprehensive update of his popular *Ceramics Handbook* title, Paul Scott explains the historical context for contemporary printed ceramics before explaining the principles of

core techniques and their application in the studio. He explores photographic processes, as well as the new opportunities presented by digital technology, including digital and 3D printing. Illustrated with brand new images of beautiful works by leading artists working in printed ceramics, *Ceramics and Print* is a must-read guide for artists and makers

interested in this ever-developing field.

Travel conducted by KTO. It reflects the attractions and locations that international tourists preferred or wanted to visit again. Like blacksmithing or hobby farming, pottery-making appeals to

individuals who like to be creative, work with their hands, and don't mind getting a little dirty.

However, it is a hobby that is largely underserved by the publishing industry, but difficult for someone to learn without a comprehensive guide because the tools and techniques are quite complicated. The Potter's Studio Handbook guides readers through the

process of setting up their own studio and teaching them how to master the techniques at home. Once techniques are mastered, The Potter's Studio Handbook will remain an invaluable resource to the clay artist when looking to create beautiful, yet functional projects, at home with nearly 25 projects that build upon previously learned skills.  A new pottery tradition has been developing along the border of northern Indiana and southern Michigan. Despite the fact that this region is not yet an established destination for pottery collectors, Michiana potters are committed to pursuing their craft thanks to

the presence of a community of like-minded artists. *The Michiana Potters*, an ethnographic exploration of the lives and art of these potters, examines the communal traditions and aesthetics that have developed in this region.
 Author Meredith A. E. McGriff identifies several shared methods and styles, such as a preference for wood-fired wares, glossy glaze surfaces, cooler colors,

the dripping or layering of glazes on ceramics that are not wood-fired, the handcrafting of useful wares as opposed to sculptural work, and a tendency to borrow forms and decorative effects from other regional artists. In addition to demonstrating a methodology that can be applied to studies of other emergent regional traditions, McGriff concludes that

these styles and methods form a communal bond that inextricably links the processes of creating and sharing pottery in Michiana.
