When magic and superpowers emerge in the masses, Wendy Deere is contracted by the government to bag and snag supervillains in Hugo Award-winning author Charles Stross' *Dead Lies Dreaming: A Laundry Files Novel*. As Wendy hunts down Imp—the cyberpunk head of a band calling themselves “The Lost Boys”— she is dragged into the schemes of louche billionaire Rupert de

Montfort Bigge. Rupert has discovered that the sole surviving copy of the long-lost concordance to the one true Necronomicon is up for underground auction in London. He hires Imp's sister, Eve, to procure it by any means necessary, and in the process, he encounters Wendy Deere. A new collection of stories by Alice Munro is always a major event. This new collection — her most personal to date — is no exception. Alice Munro's stories are

always wonderful and so ingrained with truths about life that readers always want to know where they came from. In this book, Alice Munro tells us. In her Foreword (an unusual feature in itself), she explains how she, born Alice Laidlaw in Ontario, in recent years became interested in the history of her Laidlaw ancestors. Starting in the wilds of the Scottish Borders, she learned a great deal about a famous ancestor, born around 1700, who, as his tombstone records, “for feats of frolic, agility and strength, had no equal in his day.” She traced the family’s history with the help of that man’s nephew, the famous writer James Hogg, finding to her delight that each generation of the family had produced a writer who wanted to record what had befallen them. In this way, she

was able to follow the family’s voyage to Canada in 1818, and their hard times as pioneers — once a father dies on the same day that a daughter is born in the same frontier cabin. “I put all this material together over the years,” Alice tells us, “and almost without my noticing what was happening, it began to shape itself, here and there, into something almost like stories. Some of the characters gave themselves to me in their own words, others rose out of their situations.” As the book goes down through the generations, we come to Robert Laidlaw, Alice’s father, and then, at the book’s heart, the stories become first-person stories, set during her lifetime. So is this a memoir? No. She drew on personal experiences, “but then I did anything I wanted to with this

material, because the chief thing I was doing was making a story.” The resulting collection of stories range from the title story — where through a haze of whiskey Alice’s ancestors gaze north from Edinburgh Castle at the Fife coast, believing that it is North America — all the way to the final story, where we travel with “Alice Munro” today. In the author’s words, these stories “pay more attention to the truth of a life than fiction usually does. But not enough to swear on.” All of them are Alice Munro stories. There could be no higher praise.

Her job is busy, resettling climate refugees from the coastal cities. Then she gets a call. She has family she never knew about. And they want something from her she doesn't want to give. Lily is one of the young, reliant on artificial intelligence and facing an uncertain future. David Moreland was a bigwig during the world’s golden age. He is old and almost forgotten...until he is drawn into the realm of the Climate Court. Now a whole generation seeks to condemn him. When Lily meets David, she is forced to

confront events from her past that she would prefer to forget. Feeling trapped, she hires a young lawyer. Is it to defend David, or to deny the past? In a world that seems comfortably like the present, hints of sinister differences begin to emerge, and the stakes are raised beyond David's fate.

In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney

brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles

encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

For years, Derrick Jensen has asked his audiences, "Do you think this culture will undergo a voluntary transformation to a sane and sustainable way of life?" No one ever says yes. Deep Green Resistance starts where the environmental movement leaves off: industrial civilization is incompatible with life. Technology can't fix it, and shopping—no matter how green—won't stop it. To save this planet, we need a serious resistance movement that can bring down the industrial economy. Deep Green Resistance evaluates strategic options for resistance, from nonviolence

to guerrilla warfare, and the conditions required for those options to be successful. It provides an exploration of organizational structures, recruitment, security, and target selection for both aboveground and underground action. Deep Green Resistance also discusses a culture of resistance and the crucial support role that it can play. Deep Green Resistance is a plan of action for anyone determined to fight for this planet—and win.

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around

us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected

on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

*Paper Towns* RAND

Now a major motion picture directed by Clint Eastwood, in theaters February 2018. An ISIS terrorist planned to kill more than 500 people. He would have succeeded except for three American friends who refused to give in to fear. On August 21, 2015, Ayoub El-Khazzani

boarded train #9364 in Brussels, bound for Paris. There could be no doubt about his mission: he had an AK-47, a pistol, a box cutter, and enough ammunition to obliterate every passenger on board. Slipping into the bathroom in secret, he armed his weapons. Another major ISIS attack was about to begin. Khazzani wasn't expecting Anthony Sadler, Alek Skarlatos, and Spencer Stone. Stone was a martial arts enthusiast and airman first class in the US Air Force, Skarlatos was a member of the Oregon National Guard, and all three were fearless. But their decision-to charge the gunman, then overpower him even as he turned first his gun, then his knife, on Stone- depended on a lifetime of loyalty, support, and faith. Their friendship was forged as they came of age together in

California: going to church, playing paintball, teaching each other to swear, and sticking together when they got in trouble at school. Years later, that friendship would give all of them the courage to stand in the path of one of the world's deadliest terrorist organizations. The 15:17 to Paris is an amazing true story of friendship and bravery, of near tragedy averted by three young men who found the heroic unity and strength inside themselves at the moment when they, and 500 other innocent travelers, needed it most. *I Am a Strange Loop* Douglas Gibson Books
