Spanning the nineteenth and twentieth
centuries, this fascinating history explores
the lives and achievements of great
women in science across the globe. Ten

Women Who Changed Science and the
World tells the stories of trailblazing
women who made a historic impact on
physics, biology, chemistry, astronomy,
and medicine. Included in this volume are
famous figures, such as two-time Nobel
Prize winner Marie Curie, as well as
individuals whose names will be new to
many, though their breakthroughs were no
less remarkable. These women overcame

significant obstacles, discrimination, and personal tragedies in their pursuit of scientific advancement. They persevered in their research, whether creating life-saving drugs or expanding our knowledge of the cosmos. By daring to ask 'How?' and 'Why?', each of these women made a positive impact on the world we live in today. In this book, you will learn about: Astronomy Henrietta Leavitt (United States, 1868–1921) discovered the period-luminosity relationship for Cepheid variable stars, which enabled us to measure the size of our galaxy and the universe. Physics Lise Meitner (Austria, 1878–1968) fled Nazi Germany in 1938, taking with her the experimental results which showed that she and Otto Hahn had split the nucleus and discovered nuclear fission. Chien-Shiung Wu (United States, 1912–1997) demonstrated that the widely accepted 'law of parity', which stated that left-spinning and right-spinning subatomic particles would behave identically, was wrong. Chemistry Marie Curie (France, 1867–1934) became the only person in history to have won Nobel prizes in two different fields of science. Dorothy Crowfoot Hodgkin (United Kingdom,

1910–1994) won the Nobel Prize for Chemistry in 1964 and pioneered the X-ray study of large molecules of biochemical importance. Medicine Virginia Apgar (United States, 1909–1974) invented the Apgar score, used to quickly assess the health of newborn babies. Gertrude Elion (United States, 1918–1999) won the Nobel Prize for Physiology or Medicine in 1988 for her advances in drug development. Biology Rita Levi-Montalcini (Italy, 1909–2012) won the Nobel Prize for Physiology or Medicine in 1986 for her co-discovery in 1954 of Nerve Growth Factor (NGF). Elsie Widdowson (United Kingdom, 1906–2000) pioneered the science of nutrition and helped devise the World War II food-rationing program. Rachel Carson (United States, 1907–1964) forged the environmental movement, most famously with her influential book *Silent Spring*. Commerce Business Daily Rowman & Littlefield UNDERBELLY HOOPS covers Carson Cunningham's final season in the storied and now defunct Continental Basketball Association (CBA). In the process, it takes a sober look at minor league professional basketball, as Cunningham tries to

navigate a poor relationship with his coach and yet finish his career on his own terms by playing a final season and winning a championship. As UNDERBELLY HOOPS shows, the CBA was a realm where hopeful players desperately hung on and crusty motels might very well have no clocks. It was a place where a trainer could be ordered to fill the visiting team's cooler with warm shower water and a coach might tell a player (namely, Cunningham) that he was focusing too much on his marriage and child rather than basketball. It was also a place where entire hotel wings could become saturated with the pungent smell of marijuana. And yet, even as it chipped away at your dignity and made little economic sense to remain, the CBA drew you in with the allure of action and the prospect of an NBA call-up. And it could inspire, like when you and your teammates caught a rhythm that made you remember why basketball is such a beautiful game, or when you saw guys continue to strive, to persevere, even if their dreams weren't fully realized. "The hoops answer to Ball Four. By turns funny and poignant—and always self aware—this book allows fans into the locker room and

huddle, yes, but also into the cortex of a professional basketball player. If Carson Cunningham could have jumped, run and created his shot off the dribble as masterfully as he writes and observes, he'd be starring in the NBA." —L. Jon Wertheim, Senior Writer for SPORTS ILLUSTRATED

Dancing with Death Diversion Books

This true crime saga reveals the case of a missing Nashville woman, a husband on the run, and a rare cold case murder conviction. Janet March had it all: a corporate lawyer husband, two beautiful children, a promising career as an artist, and a dream house she designed herself. But behind closed doors, her husband led a destructive double life. On August 16, 1996, Janet had an appointment to finally file for divorce. But she never arrived. On the night of August 15, she vanished. Janet's disappearance incited a massive search and media frenzy that revealed her husband Perry's seedy dealings. When he absconded with his children to a new life in Mexico, Janet's parents began a decade-long, international custody battle that culminated in Perry's dramatic extradition to Tennessee. Meanwhile, the Nashville

Police Department never found Janet's body. In spite of overwhelming odds, cold case detectives and prosecutors were determined to get justice—and with the help of a shocking surprise witness, they did.

Postharvest losses of fresh produce have always been an obstacle in agriculture. About one third of global fresh fruits and vegetables are lost because their quality has dropped below an acceptance limit. The postharvest quality and shelf life of fresh produce are also determined before harvest. However, postharvest quality is also affected by many practices during and after harvest such as temperature management, controlled and modified atmosphere, coatings, physical treatments, biocontrol, and more. This Special Issue on "Postharvest Disease Development: Pre and/or Postharvest Practices" gathers papers that deal with preharvest and postharvest factors that affect and maintain fresh produce quality after harvest.

A Baseball Journey from Cuba to the Big

Leagues and Back Diversion Books

Uno de los trabajos selvícolas más ampliamente utilizados para manejar la espesura de los montes españoles son las denominadas limpias, que hacen referencia al cuidado cultural o tratamiento parcial consistente en reducir la presencia de la vegetación accesoria. Cuando se actúa sobre el estrato arbustivo, la limpia se denomina desbroce. A lo largo del primer capítulo del libro se recoge una clasificación de los diferentes tipos de desbroces, así como de la variedad de máquinas que los operarios forestales pueden emplear para llevar a cabo esta labor, tratando especialmente las denominadas motodesbrozadoras. El estudio se centrará fundamentalmente en la amplia variedad de útiles de corte que estas máquinas pueden portar. En el segundo se describen todas aquellas labores y tareas que el operario debe realizar para el cuidado, mantenimiento y puesta a punto de la motodesbrozadora. De igual forma se explica cómo llevar a cabo el montaje de ciertos componentes de la máquina y se ofrecen a modo orientativo algunos consejos acerca del control del desgaste y daños de la

máquina. Las técnicas de manejo de la motodesbrozadora, de acuerdo al tipo de vegetación a eliminar se exponen en el capítulo tercero. En esta misma sección del libro se muestran las limitaciones que presentan los distintos útiles de corte que puede portar esta máquina. El último capítulo se ha dedicado a la reflexión de los riesgos y peligros que aparecen cuando se maneja una motodesbrozadora, y a las medidas que se deberían adoptar para prevenirlos. También se aborda la normativa medioambiental que regula la gestión del principal residuo que generan estas máquinas esto es, el aceite de motor usado. Finalmente se expone cómo llevar a cabo el tratamiento adecuado de los restos forestales en aras de cumplir con una buena conducta medioambiental. Esta Unidad Formativa UF1043: Operaciones de desbroce, es TRANSVERSAL y está incluida en el Módulo Formativo MF1293_1: Operaciones auxiliares de repoblación, corrección hidrológica, y de construcción y mantenimiento de infraestructuras forestales y MF1294_1: Operaciones auxiliares en tratamientos silvícolas, correspondiente al Certificado de profesionalidad: Actividades auxiliares en

conservación y mejora de Montes (AGAR0309), regulado por el RD 682/2011, de 13 de mayo, de la familia profesional Agraria. Según este Real Decreto los contenidos que en esta obra se recogen se corresponden con una duración de 40 horas. Tanto la estructura como el desarrollo del libro se ajustan al citado Real Decreto y más concretamente a los contenidos de la Unidad Formativa Operaciones de desbroce. Javier Gutiérrez Velayos es Dr. Ingeniero de Montes por la Universidad de Valladolid. Ha sido profesor de la Universidad Católica de Ávila donde ha impartido, entre otras, la asignatura de Aprovechamientos y Certificación Forestal. Ha compaginado dicha labor docente con la actividad investigadora, especialmente en el área de la Xilotecnología y en el campo de la Planificación del paisaje y la conservación de la biodiversidad. *Referativnyĭ zhurnal* Diversion Books On the 50th anniversary of America's deadliest prison riot comes a prison-guard daughter's quest to uncover the truth about her father's murder during the uprising—a story of crossing racial divides, befriending inmates and correctional officers alike, and challenging the state to

reveal and pay for its malfeasance. Deanne Quinn Miller was five years old when her father—William “Billy” Quinn—was murdered in the first minutes of the Attica Prison Riot, the only corrections officer to die at the hands of inmates. But how did he die? Who were the killers? Those questions haunted Dee and wreaked havoc on her psyche for thirty years. Finally, when she joined the Forgotten Victims of Attica, she began to find answers. This began the process of bringing closure not only for herself but for the other victims' families, the former prisoners she met, and all of those who perished on September 13, 1971—the day of the “retaking,” when New York State troopers and corrections officers at the Attica Correctional facility slaughtered twenty-nine rioting prisoners and ten hostages in a hail of gunfire. In *The Prison Guard's Daughter*, Dee brings readers in on her lifelong mission for the truth and justice for the Attica survivors and the families of the men who lost their lives. But the real win was the journey that crossed racial and criminal-justice divides: befriending infamous Attica prisoner Frank “Big Black” Smith, meeting Richard Clark

and other inmates who tried to carry her father to safety after his beating, and learning what life was like for all of the people—prisoners and prison employees alike—inside Attica. As Miller lays bare the truth about her father’s death, the world inside Attica, and the state’s reckless raid and coverup, she conveys a narrative of compassionate humanity and a call for prison reform.

A former stripper turned suburban housewife is exposed as a brutal killer in this shocking true crime tale of a loving husband beheaded in Phoenix. Phoenix, Arizona, 2004. Marjorie Orbin filed a missing person’s report on her husband, Jay. She claimed that the successful art dealer had left town on business after celebrating their son’s birthday more than a month before. But no one believed that Jay would abandon the family he loved. Authorities suspected foul play . . . As the search for Jay made local headlines, Marjorie’s story starting coming apart. Why did she wait so long before going to police? If Jay was away on business, why

were there charges made to his credit card in Phoenix? Then, the unthinkable happened. Jay’s headless, limbless torso was discovered on the outskirts of the Phoenix desert—and all evidence pointed to Marjorie as the killer. The investigation revealed surprising details about her life—six previous marriages, an ongoing affair with a man from her gym, and alleged ties to the New York mafia.

A memoir by the mustachioed baseball pitcher who went playing rocky, trash-ridden fields in Castro’s Cuba to becoming a Boston Red Sox legend. Luis Tiant is one of the most charismatic and accomplished players in Boston Red Sox and Major League Baseball history. With a barrel-chested physique and a Fu Manchu mustache, Tiant may not have looked like the lean, sculpted aces he usually played against, but nobody was a tougher competitor on the diamond, and few were as successful. There may be no more qualified twentieth-century pitcher not yet enshrined in the National Baseball Hall of Fame. His big-league dreams came at a

price: racism in the Deep South and the Boston suburbs, and nearly fifteen years separated from a family held captive in Castro’s Cuba. But baseball also delivered World Series stardom and a heroic return to his island home after close to a half-century of forced exile. The man whose name—“El Tiante” —became a Fenway Park battle cry has never fully shared his tale in his own words, until now. In *Son of Havana*, Tiant puts his heart on his sleeve and describes his road from torn-up fields in Havana to the pristine lawns of major league ballparks. Readers will share Tiant’s pride when appeals by a pair of US senators to baseball-fanatic Castro secure freedom for Luis’s parents to fly to Boston and witness the 1975 World Series glory of their child. And readers will join the big-league ballplayers for their spring 2016 exhibition game in Havana, when Tiant—a living link to the earliest, scariest days of the Castro regime—threw out the first pitch.

"With wit and sharp insight, the authors of *THE TRADE OFF* provide a behind-the-scenes peek at the Machiavellian world of

a luxury Manhattan store, its executives, designers, clerks—and demanding socialite customers. Told in the knowing voice of the store’s ambitious shopping salon director, *THE TRADE OFF* is a fast-paced, entertaining read.” —Dr. Joyce Brown, President of Fashion Institute of Technology Go behind the window displays. Behind the racks. Two personal shoppers for Manhattan’s biggest department stores have written a wildly dishy novel that goes behind the dressing rooms of New York’s fashion elite. At Frankel’s New York, the wives of billionaires and Hollywood celebrities sip champagne while stylists and tailors cater to every whim. And one person has made it her career to help these Amex-wielding shoppers create the perfect look. Bonnie Salerno Madden knows all of her client’s preferences, whims, and fantasies. She knows the price they paid to gain access to the salon where having Bonnie as their private shopper is a first-class ticket to being the toast of the New York high-fashion social scene. But while Bonnie is all elegance on the outside, she’s barely keeping it together on the inside. A single mom to a special needs child, she needs

her high-pressure job to care for her family. And when that job is put in jeopardy, Bonnie will need to make some of the riskiest choices of her life to guarantee a better future for her son, and for herself. With the opportunity to live in her own fairy tale, will Bonnie have what it takes to make the trade off? “*THE TRADE OFF* is a riveting page-turner even for a non-shopper like me. The ultimate tale of New York life.”—David Patrick Columbia, newyorksocialediary.com

Random House

Completely revised and updated with a focus on civility and inclusion, the 19th edition of Emily Post’s *Etiquette* is the most trusted resource for navigating life’s every situation From social networking to social graces, Emily Post is the definitive source on etiquette for generations of Americans. That tradition continues with the fully revised and updated 19th edition of *Etiquette*. Authored by etiquette experts Lizzie Post and Daniel Post Senning—Emily Post’s great-great grandchildren—this edition tackles classic etiquette and manners advice with an eye toward diversity and the contemporary sensibility

that etiquette is defined by consideration, respect, and honesty. As our personal and professional networks grow, our lives become more intertwined. This 19th edition offers insight and wisdom with a fresh approach that directly reflects today’s social landscape. Emily Post’s *Etiquette* incorporates an even broader spectrum of issues while still addressing the traditions that Americans appreciate, including: Weddings Invitations Loss, grieving, and condolences Entertaining at home and planning celebrations Table manners Greetings and introductions Social media and personal branding Political conversations Living with neighbors Digital networking and job seeking The workplace Sports, gaming, and recreation Emily Post’s *Etiquette* also includes advice on names and titles—including Mx.—dress codes, invitations and gift-giving, thank-you notes and common courtesies, tipping and dining out, dating, and life milestones. It is the ultimate guide for anyone concerned with civility, inclusion, and kindness. Though times change, the principles of good etiquette remain the same. Above all, manners are a sensitive awareness of

the needs of others—sincerity and good intentions always matter more than knowing which fork to use. The Emily Post Institute, Inc., is one of America’s most unique family businesses. In addition to authoring books, the Institute provides business etiquette seminars and e-learning courses worldwide, hosts the weekly Q&A podcast *Awesome Etiquette* and trains those interested in teaching *Emily Post Etiquette*.

Emily Post's Etiquette, 19th Edition
 Diversion Publishing Corp.

The first, and only, inside story of one of the greatest bands in rock history—Dire Straits—as told by founder member and bassist John Illsley. One of the most successful music acts of all time, Dire Straits filled stadiums around the world. Their album sold hundreds of millions of copies and their music—classics like “Sultans of Swing,” “Romeo and Juliet,” “Money for Nothing,” and “Brothers in Arms”—is still played on every continent today. There was, quite simply, no bigger band on the planet throughout the eighties. In this powerful and entertaining memoir, founding member John Illsley gives the inside track on the most

successful rock band of their time. From playing gigs in the spit-and-sawdust pubs of south London, to hanging out with Bob Dylan in LA, Illsley tells the story of the band with searching honesty, soulful reflection, and wry humor. Starting with his own unlikely beginnings in Middle England, he recounts the band’s rise from humble origins to the best-known venues in the world, the working man’s clubs to Madison Square Garden, sharing gigs with wild punk bands to rocking the Live Aid stage at Wembley. And woven throughout is an intimate portrait and tribute to his great friend Mark Knopfler, the band’s lead singer, songwriter, and remarkable guitarist. Tracing an idea that created a phenomenal musical legacy, an extraordinary journey of joy and pain, companionship and surprises, this is John Illsley’s life in Dire Straits.

Side and Screw Diversion Books

Legendary football coach and Super Bowl champion with the Denver Broncos, Wade Phillips, recalls his life in football and memories of his father, NFL head coach Bum Phillips, in a book perfect for a Father’s Day gift. “Having played for and against Wade Phillips, the first word that

comes to my mind is respect. SON OF BUM is a great read about the Xs and Os from one of the greatest coaches in the league, as well as a loving tribute to the influence of family.”—Peyton Manning In his memoir *Son of Bum*, decorated NFL coach Wade Phillips shows that the roots of his knowledge come from his father, Bum Phillips. A beloved character in NFL history, Bum taught Wade from the beginning that “coaching isn’t bitching,” as well as how to have perspective on the game during tough times. These are lessons that apply both on the field and off, and Wade has passed this wisdom down to his son, Wes Phillips, an NFL coach himself. Known for his homespun, plain-talking ways, Wade is a groundbreaking coach who has long believed in using support and camaraderie—instead of punishment and anger—to inspire his players to be winners on and off the field. And though his defensive concepts are revolutionary, he would say they begin with common sense. *Son of Bum* is more than one man’s memoir—it’s a story of family and football and a father who inspired his son.

Nurse Genene Jones and the Texas

Baby Murders JHU Press

**** COMPELLING - The Sunday Telegraph
 CONTROVERSIAL ... Sounes' book pushes the standard Reed narrative - The New York Times Lou Reed, who died in 2013, was best known to the general public as the grumpy New Yorker in black who sang 'Walk on the Wild Side'. To his dedicated admirers, however, he was one of the most innovative and intelligent American songwriters of modern times, a natural outsider who lived a tumultuous and tortured life. In this in-depth, meticulously researched and very entertaining biography, respected biographer Howard Sounes examines the life and work of this fascinating man, from birth to death, including his time as the leader of The Velvet Underground - one of the most important bands in rock'n'roll. Written with a deep knowledge and understanding of the music, Sounes also sheds entirely new light on the artist's creative process, his mental health problems, his bisexuality, his three marriages, and his addictions to drugs and alcohol. In the course of his research, Sounes has interviewed over 140 people from every part of Lou Reed's life - some of whom have not spoken

publicly about him before - including music industry figures, band members, fellow celebrities, family members, former wives and lovers. This book brings Lou Reed and his world alive.

The true story of a killer nurse whose crimes were hidden by a hospital for years. It's 1980, and Genene Jones is working the 3 to 11 PM shift in the pediatric ICU in San Antonio's county hospital. As the weeks go by, infants under her care begin experiencing unexpected complications—and dying—in alarming numbers, prompting rumors that there is a murderer among the staff. Her eight-hour shift would come to be called “the death shift.” This strange epidemic would continue unabated for more than a year, before Jones is quietly sent off—with a good recommendation—to a rural pediatric clinic. There, eight children under her care mysteriously stopped breathing—and a 15-month-old baby girl died. In May 1984, Jones was finally arrested, leading to a trial that revealed not only her deeply disturbed mind and a willingness to kill, but a desire to play

“God” with the lives of the children under her care. More shocking still was that the hospital had shredded records and remained silent about Jones’ horrific deeds, obscuring the full extent of her spree and prompting grieving parents to ask: Why? Elkind chronicles Jones’ rampage, her trials, and the chilling aftermath of one of the most horrific crimes in America, and turns his piercing gaze onto those responsible for its cover-up. It is a tale with special relevance today, as prosecutors, distraught parents, and victims’ advocates struggle to keep Jones behind bars. “A horrifying true-life medical thriller...”—Publishers Weekly
 “Gripping...A remarkable journalistic achievement!”—Newsweek
 “Murder, madness, and medicine...superb!”—Library Journal
 “Shocking...true crime reporting at its most compelling.”—Booklist

As climate change continues to wreak havoc on the environment, devastating wildfires, both natural and manmade, are increasing. The figure for average acres burned has increased from almost 2 million acres in 1992 to nearly 7 million in 2012, which set a new record with an average of 165 acres burned per fire. Things are heating up, but global warming isn't the only problem. Budgets for fire suppression have been slashed severely. The number of air tankers has decreased from 44 in 2002 to just 9 in 2012, which means fast attacks on fledgling fires will grow more difficult in the future. If you live in a wildland-urban interface, the zone between unoccupied and developed land, sooner or later fire will happen. Fortunately you can prepare for the worst, and it doesn't have to cost a fortune. This highly detailed and practical reference guide will help you live more safely in the red zone and save you time and money along the way, providing multiple methods of risk mitigation along with the financial level of each action. Effectively prepping your land can even enhance the scenery and increase the value of your home. Learn how wildfires begin and behave,

how to evaluate your property, what essential tools you'll need and what they will cost, how to prepare your land and home—including tips on how to avoid insurance nightmares—when to stay and fight, when it's time to evacuate, how to clean up after a fire event, and more. Even if you live in the middle of a suburb, the information on how fires start and spread and how to deal with insurance claims will prove enlightening and helpful. No one can guarantee that your house or land will survive if a major conflagration erupts, but you can greatly improve your odds with this book and a little preparation.

Women Who Love Men Who Kill Diversion Books

The Intergovernmental Panel on Climate Change (IPCC) has recently summarized the state of the art in research on climate change (Climate Change 1995). The most up to date research findings have been divided into three volumes: • the Science of Climate Change (working group I), • the Impacts, Adaptation and Mitigation of Climate Change (working group II), and • the Economic and Social Dimensions of Climate Change (working group III) There is a general consensus that a serious

change in climate can only be avoided if the future emissions of greenhouse gases are reduced considerably from the business as usual projection and if at the same time the natural sinks for greenhouse gases, in particular that of CO₂, are maintained at the present level or 2 preferably increased. Forests, forestry and forestry industry are important parts of the global carbon cycle and therefore they are also part of the mitigation potentials in at least a threefold way: 1. During the time period between 1980 and 1989 there was a net emission of CO from changes in tropical land use (mostly tropical deforestation) of 21.6 +/- 1 GtC/a, but at the same time it was estimated that the forests in the northern hemisphere have taken up 0.5 +/- 0.5 GtC/a and additionally other terrestrial sinks (including tropical forests where no clearing took place) have been a carbon sink of the order of 1.3 +/- 1.

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in

American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

Underbelly Hoops Ediciones Paraninfo, S.A. We are excited to present the seventh edition of Employee Training and Development. This revised edition maintains a balance between research and real company practices with its lively writing style and most up-to-date developments. It provides readers with a solid background in the fundamentals of training and developments such as needs assessment, transfer of training, learning environment design, methods, evaluation

Salient Features: - New! In-text examples and chapter openers feature companies from all industries, including service, manufacturing, retail, and non-profit organization - New! Latest research findings and best company practices each chapter like flipped classroom, adaptive training, big data and workforce analytics, learning management systems, etc. - New! Cases given in the book provides issues related training and development faced by actual companies - Coverage on use of technologies for training delivery, such as online learning, social media, mobile learning, gamification, and virtual worlds

Preparing for and Surviving the Threat of Wildfire Diversion Books

The “engrossing, thoroughly researched look at women who are in romantic relationships with incarcerated men”—fully updated with twenty-first-century cases (Publishers Weekly). In 1991, Sheila Isenberg’s classic study *Women Who Love Men Who Kill* asked the provocative question, “Why do women fall in love with convicted murderers?” Now, Isenberg returns to the same question in the age of smart phones, social media, mass shootings, and modern prison dating. The result is a compelling psychological study of prison passion in the new millennium. Isenberg conducts extensive interviews with women who seek relationships with convicted killers, as well as conversations with psychiatrists, social workers, and prison officials. She shows that many of these women know exactly what they are getting into—yet they are willing to sacrifice everything for the sake of a love without hope, promise, or consummation. This edition of *Women Who Love Men Who Kill* includes gripping new case studies and an absorbing look at how the digital age is revolutionizing this phenomenon. Meet the young women writing “fan fiction” featuring America’s

most sadistic murderers; the killer serving consecutive life sentences for strangling his wife and smothering his toddler

daughters—and the women who visit him in prison; the high-powered journalist who fell in love and risked it all for “Pharma

Bro” Martin Shkreli; and many other women absorbed in online and real-life dalliances with their killer men.
