BAKER LIZETH

Managing and Leveraging Events Routledge

Dubai has continued to meet its targets in becoming the global capital of Islamic finance, nearly doubling the number of sukuk (Islamic bonds) listings on its exchanges since 2017. Furthermore, eased policy restrictions to encourage foreign investment and the 2019 budget's continued commitment to infrastructure development ahead of Expo 2020 are expected to continue driving economic activity. As one of the most diversified economies in the region, Dubai continues to present growth opportunities in various sectors including tourism, logistics, manufacturing and education. Although the emirate has benefitted from its proximity to oil and gas fields, Dubai is right at the forefront of the emerging cleaner energy world, and developing and promoting renewable technologies, including solar energy and electric vehicles.

The Report: Dubai 2008 Oxford Business Group

The COVID-19 pandemic has brought about drastic changes to the world economy. Malaysia, however, is well positioned to seize new opportunities, including the reorientation of global supply chains, to bolster trade ties with regions around the world, with the Middle East standing out as a particular area of potential for inward and outward investment. This 29-page report, produced in partnership with MIDA, includes interviews, news, and analysis.

Rapid advancement in information and communication technologies have led to interconnected and predominately online interactions in the current era. It is crucial for current organizations to adapt and integrate internet technologies to increase flexibility, effective services, and competitiveness. The Handbook of Research on the Evolution of IT and the Rise of E-Society is a pivotal reference source that provides vital research on the application

of embedded and connected technology and its role in modern society. While highlighting topics such as information privacy, knowledge management, and social media, this publication explores the development and cultivation of e-community in organizations, as well as the methods of addressing interpersonal facilitation, user-friendly design, and mobile accessibility. This book is ideally designed for program developers, computer engineers, managers, business professionals, researchers, and graduate-level students seeking current research on the adoption and efficient usage, formation, and maintenance of internet and communication technology interaction.

Facets of Security in the United Arab Emirates Oxford Business Group

The 30th edition of the World Investment Report looks at the prospects for foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action.

The Report: Morocco 2011 Oxford Business Group

2013 saw the transition of power from the former Emir, Sheikh Hamad bin Khalifa Al Thani, to Sheikh Tamim bin Hamad Al Thani, his fourth son and second son with Sheikha Moza bint Nasser, a move unprecedented elsewhere in the Gulf but not unexpected in Qatar. With sustained, long-term economic growth, the highest per capita income in the world, a stable and well-capitalised banking sector, a sovereign wealth fund that is of true

global significance and one of the largest reserves of natural gas just offshore, Qatar today has many advantages. It is clear that the country is in a strong position from which to continue its robust economic performance, and the years ahead will see a vast construction drive, in line with the principles of Qatar National Vision 2030 and catalysed by preparations for the 2022 FIFA World Cup. Oil and gas accounted for around 51.5% of Qatar's economic output in 2013, while developing downstream facilities that add value to energy by-products, for example, has helped build a portfolio of petrochemicals, chemicals and fertiliser companies and looks set to see Qatar's economic strength continue. With more than \$222bn of projects in the pipeline, the construction sector's growth has been forecast at 15% for 2014, while spending on infrastructure is set to reach \$150bn in the run-up to the 2022 FIFA World Cup. Against this backdrop, Qatar looks set to continue offering a wide variety of opportunities for foreign investors.

BRICS and Resistance in Africa The Report: Dubai 2008

Provides a country profile of Indonesia, including politics, the economy, banking, capital markets, insurance, transport, energy, construction and real estate, telecoms and IT, industry, plantations and agriculture, mining, and tourism.

Oxford Business Group

The United Arab Emirates (UAE) has elaborated its own philosophy of security. Driven by emergencies and increasing risks, both in the region and globally, Emirati authorities have developed a sense of anticipation as well as an agility to react promptly to new threats through the ability to assess the risks in any given situation. War and the avatars of conflict are a constant reality in the Middle East. Transnational threats, including the regional context, the war in Yemen, insecurity in the Levant and tensions with Iran affect the overall stability of the Peninsula and consequently that of the UAE. Owing to the inclusion of the UAE in the networks of globalization, non-traditional security issues are not relegated to the background. Issues such as COVID-19, immigration, cybersecurity and human trafficking need to be addressed domestically as well as globally. This volume offers a comprehensive and multifaceted examination of the traditional and non-traditional security measures present in the UAE that allow the country to remain politically stable in an otherwise volatile region, and aims to offer a comprehensive overview of all forms of security in the UAE.

The Report: Dubai 2018 Oxford Business Group

This Article IV Consultation highlights that UAE has successfully weathered recent external shocks, because of its large financial buffers, diversified economy, and strong policy response. The economy is starting to recover from the 2015–16 slowdown caused by a decline in oil prices. Growth momentum is expected to strengthen in the next few years, helped by higher oil output, increased public investment, and stepped-up structural reforms. Gradual and growth-friendly fiscal consolidation should resume once the recovery gains momentum to ensure intergenerational equity. Key priorities have been highlighted to raise spending efficiency, continue diversifying revenues, firmly anchor fiscal policy, and improve policy coordination and management of fiscal risks. The report also discusses that realizing the government's Vision 2021 requires strong effort to foster productivity growth and increase the private sector's role in the economy.

United Arab Emirates Oxford Business Group

The only monarchy in North Africa, Morocco has one of the more diversified GDP mixes in the region, and the mainstays of the economy include agriculture, tourism, and the textiles industry; higher-end manufacturing, IT and communications, and outsourcing are also all becoming increasingly important. The past few years have seen some significant changes, yet the kingdom has remained stable, even amidst the broader regional turmoil. After 2.7% growth in 2012, economic activity in Morocco ramped up in 2013, increasing by 4.4% as GDP hit Dh864.6bn (€76.8bn), driven in large part by the agricultural sector. The kingdom faces exogenous challenges – such as low external demand and high commodity prices – as well as domestic complications including a fiscal deficit and unemployment, but following the government reshuffle in mid-2013, the prospects look far more positive. With the 2014 budget setting a more dynamic tone as the government takes steps to redress key fiscal imbalances, there are strong indicators pointing to the economy's ability to continue to grow.

The Report: Nigeria 2013 Oxford Business Group

Already a regional and global centre for business and finance, Dubai's reputation has been bolstered by the MSCI's decision to upgrade the UAE from frontier to emerging market status in 2014, while the emirate's successful Expo 2020 bid is expected to generate myriad opportunities for private investors across a range of sectors. Construction is thriving once again, driven in large part by strong retail sector growth, with various projects, including plans for the world's largest mall, indicating that the sector will maintain its position as the emirate's biggest GDP contributor moving forward. The transport and logistics framework is set for major expansion in the coming years as well, furthering cementing the emirate's status as a leading transport and logistics hub not just regionally, but globally too. The continued development of Dubai's retail and hospitality offerings, alongside the upgrades to its airports, should help to ensure robust growth in visitor numbers from both the region and further afield.

The Report: Jordan 2013 Oxford Business Group

Vacation ownership is becoming a mainstream travel product. Continued growth based on number of units sold and an increasing number of international brands has placed this segment in a very strong position. As the market continues to grow there is an increasing demand for clear and engaging sources of information on the key issues and components of vacation ownership, from both hospitality management students and the public. This book updates hospitality students in this vacation sector, provides the key background information, explanation of the growth, the components to vacation ownership management and an overview of opportunities in vacation ownership management. Timeshare Management provides the understanding of the financing, marketing, sales, management, and human resource issues surrounding the subject - vital to any hospitality and tourism student. * Provides an overview of vacation ownership management by sharing the segment's history, terms, and rules * Offers skills that are necessary for success in this segment * Establishes best practice examples through a case study format

Timeshare Management: An Introduction to Vacation Ownership Oxford Business Group

As the single most populous nation in Africa, Nigeria recently overtook South Africa as the largest economy on the continent. Natural resources, oil and gas in particular, comprise the country's single largest revenue-earner but the 170m person economy also has seen significant activity in recent years into the industrial, financial, telecoms and – as of 2013 – power sectors. Hydrocarbons reserves have traditionally attracted the vast majority of

domestic and foreign investment in Nigeria. Oil production capacity has remained at roughly 2.5m barrels per day (bpd) since the start of 2000, although output fell to 2.2m bpd on average in 2012. Still, the country has long operated below its true potential and government efforts in recent years have sought to increase local value addition, by boosting refining capacity and minimising theft and bunkering. The country's banking sector has been through a significant shake-up as well, resulting in a far healthier and more robust financial industry, while reforms in the telecoms and agricultural sectors have strengthened medium-term prospects.

Handbook of Research on the Evolution of IT and the Rise of E-Society Oxford Business Group

Invaluable insights into finding diverse investment opportunities in the emergent global economy From Brazilian farmlands to Colombian gold fields, from Chinese shopping malls to Indian hotels, from South African wine country to the boom/bust souks of Dubai, this around-the-world investing field trip explores the nooks and crannies for hidden investment opportunities. World Right Side Up: Investing Across Six Continents is packed with ideas to power your portfolio in the years ahead while teaching you a little fascinating history along the way. Fact is, the world's markets have changed in a big way. For the first time since before the Industrial Revolution, the emerging markets now contribute as much to the global economy as their more well-developed peers. Far from being an anomaly, this state of affairs is more in line with the bulk of human experience. For centuries, China and India were the world's largest economies. And so the world is turning...right side up. This change creates a wealth of opportunities for investors, in both the emerging markets and developed markets. World Right Side Up is your guide on how to take full advantage of this shift. Provides an entertaining view of various regions visited by the author, including South America, Asia, Africa, North America, and the Middle East Explores specific investment ideas and themes, including opportunities in agriculture, water, energy, infrastructure and much more Includes five key takeaways from each region, an invaluable feature, offering resources to consult for more information and guidance While some people fear the changes happening now, the reality is that for the forward-thinking investor, these sizable new markets will create extraordinary new opportunities.

The Report: Oman 2012 The Business Year

Financial services in particular is one non-oil area where the emirate is starting to pull ahead, with recent growth in the Islamic financial services segment fuelling the emirate's ambition of becoming the knowledge-based capital of the Islamic economy in the future. Meanwhile, Dubai's real estate and construction sectors, which were badly affected by the 2008 financial meltdown, are once again thriving as the legacies of the global crisis recede, and the debts incurred from that time are repaid and restructured. Indeed Dubai is now firmly focused on the future, with preparations for Dubai Expo 2020 in particular helping nourish its economic recovery, development and growth in recent years. The event is expected to attract 25m visitors over a six-month period and the build-up is driving development across several sectors. The preparations,

Though initially considered a welcome counterweight to Western interest across Africa, the BRICS are increasingly being viewed as another example of foreign interference and exploitation. BRICS and Resistance in Africa explores the varied forms of African resistance being developed in response to the growing influence of the BRICS. Its case studies cover such instances as the opposition to China's One Belt One Road initiative in East Africa; resistance to the BRICS' oil activities in the Niger Delta; and the role of the BRICS in Zimbabwe's political transition. The contributors expose the contradictions between the group's rhetoric and its real impact, as well as the complicity of local elites in serving as proxies for the BRICS nations. By challenging and expanding the debates surrounding BRICS involvement in Africa, this collection offers new insight into resistance to globalization in the global South.

International Production Beyond the Pandemic International Monetary Fund

Bolstered by burgeoning cement and ceramics industries that draw on the natural resources of the Hajar Mountains, Ras Al Khaimah has one of the GCC's more diversified economies. Continued investment in infrastructure is enabling further economic growth and encouraging foreign investment.

This book explores and advances the latest concepts and developments in event management theory and practice. Drawing on the ever-growing event management literature – and supported by theories and concepts from parent disciplines – the book examines challenges and opportunities related to maximising business and social benefits for those working in different event management positions in a variety of contexts. Written by an international team of five management scholars, the book investigates event management and leverage from various angles, including international business, event business studies, sport management, community development, and business strategy. It does so by offering a combination of theoretical approaches as well as contemporary cases from around the world. This book will be of interest to undergraduate and postgraduate students of event management, as well as scholars researching in social and business-related areas of event management and leverage.

Korea Economic Report Oxford Business Group

Over the past decade Peru has seen a period of transformative growth, effectively positioning it as one of the leading economic performers in Latin America. Posting growth rates in excess of 6% from 2010–12, the economy expanded by a further 5.1% in the first half of 2013. A major metals and minerals exporter with a burgeoning agricultural sector, Peru's rapid economic growth has been the result of elevated global demand for commodities

and key exports, as well as prudent fiscal planning and the expansion of non-primary sectors. With an investor-friendly legal framework, Peru has become a prime destination for foreign direct investment and was recently ranked the second-best country for doing business in Latin America by the

World Bank. Despite ongoing social conflict related to extractive industries and a sizeable infrastructure gap, Peru's stable macroeconomic environment and its efforts to diversify and guard against price volatility should ensure continued growth for this Andean economy.
