**engineering.purdue.edu** Engineering Economics Problems And Solutions  
 Engineering economics problems inevitably fall into one of three categories: Fixed input. The amount of money or other input resources is fixed. Example: A project engineer has a budget of \$450,000 to overhaul a plant. Fixed output. There is a fixed task, or other output to be accomplished.  
 SOLVING ENGINEERING ECONOMICS PROBLEMS | Engineering360  
 Engineering Economics 4-1 Cash Flow Cash flow is the sum of money recorded as receipts or disbursements in a project's financial records. A cash flow diagram presents the flow of cash as arrows on a time line scaled to the magnitude of the cash flow, where expenses are down arrows and receipts are up arrows. Year-end convention ~ expenses
