ELLEN LYONS

Maternal Newborn Nursing Care Plans Prentice Hall

AWHONN's Core Curriculum for Maternal-Newborn Nursing, 6th Edition, the definitive resource for nurses taking certification examinations, provides the most up-to-date, accurate information available on today's maternal-newborn nursing practice. Its concise outline format covers concepts of reproduction, fetal development, normal pregnancy, intrapartum and postpartum periods, the normal newborn, complications in the mother and newborn, and ethical issues. With a fresh focus on patient safety and revised case studies, this clinical guide and certification prep tool features AWHONN-endorsed content for the practice of maternal-newborn nursing. AWHONN-endorsed content makes this the definitive resource to prepare for current practice and specialty nursing certification examinations. Content updates throughout provide the most current practice guidelines to promote quality care. Bulleted outline format allows for quick review and reference for the management of pregnant women and their newborns through all stages of care. Contemporary content covers the full scope of maternal-newborn nursing practice, incorporating information on families, ethics, legal issues, research, case management, genetics, and the transition to home and parenthood. ENHANCED! Focus on patient safety draws attention to developing expertise related to safe nursing practice. UPDATED! Case studies and review questions reflect the realities of practice and provide sample questions to help you prepare for certification examinations. UPDATED! Content on medication safety, including high-alert medications, emphasizes critical drug information that must be considered to provide safe patient care.

Study Guide for Foundations of Maternal-Newborn and Women's Health Nursing Addison-Wesley Publishing Company, Incorporated, Health Sciences Division

Written by the foremost experts in maternity and pediatric nursing, *Maternal Child Nursing Care*, 5th Edition offers the accurate, practical information you need to succeed in the classroom, the clinical setting, and on the NCLEX® examination. This new edition offers numerous content updates throughout the text to keep you up-to-date on the latest topics and best practices. Plus hundreds of illustrations, alert boxes, and tables clarify key content and help you quickly find essential information. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, supply resources and guidance, and illustrate nursing care in a variety of settings. Critical thinking case studies offer opportunities to test and develop your analytical skills and apply knowledge in various settings. Emergency boxes in the maternity unit guide you through step-by-step emergency procedures. Expert authors of the market-leading maternity and pediatric nursing textbooks combine to ensure delivery of the most accurate, up-to-date content. Family-Centered Care boxes highlight the needs or concerns of families that you should consider to provide family-centered care. NEW! Content updates throughout the text give

you the latest information on topics such as the late preterm infant, fetal heart rate pattern identification, obesity in the pregnant woman, shaken baby syndrome/traumatic brain injury, Healthy People 2020, car restraints, immunizations, and childhood obesity. NEW! Updated Evidence-Based Practice boxes including QSEN KSAs (knowledge, skills, attitudes) provide the most current practice guidelines to promote quality care. NEW! Medication Alerts stress medication safety concerns for better therapeutic management. NEW! Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice.

Maternal-Newborn Nursing Elsevier Health Sciences

Explains how to assess, plan, provide, and evaluate care for pregnancy, delivery, recovery, abnormal conditions, and newborn care. Features more than 65 of the most common and high-risk care plans for nursing care using the nursing process approach, this text includes NIC interventions, discussions on collaborative problems, key nursing activities, signs and symptoms, and diagnostic studies. -- From publisher description.

Maternal Newborn Nursing Elsevier Health Sciences

Ideal for accelerated maternity and pediatrics courses, *Maternal-Child Nursing*, 4th Edition is filled with user-friendly features to help you quickly master essential concepts and skills. It offers completely updated content that's easy to read and understand. Plus, active learning tools give you the chance to practice applying your knowledge and make learning fun! Critical Thinking Exercises allow you to apply your knowledge to realistic clinical situations. Nursing care plans assist you with applying the nursing process to plan individualized care for the most common maternity and pediatric conditions. Critical to Remember boxes summarize and highlight essential, need-to-know information. Communication Cues provide practical tips for effective verbal and nonverbal communication with patients and families. Clinical Reference sections in pediatric chapters present information relevant to each body system, including anatomy and physiology, differences in the pediatric patient, and related laboratory and diagnostic tests. Integrated electronic features match icons in the text, so you can use print and electronic resources more effectively together. Using Research to Improve Practice boxes help you determine proper care to reinforce best practice. Spanish translations are included for phrases commonly encountered with maternity and pediatric patients. Improved design makes the text easier to read, and up-to-date photos ensure accuracy.

Lippincott Williams & Wilkins

With easy-to-read coverage of nursing care for women and newborns, *Foundations of Maternal-Newborn & Women's Health Nursing*, 6th Edition shows how to provide safe, competent care in the clinical setting. Evidence-based guidelines and step-by-step instructions for assessments and interventions help you quickly master key skills and techniques. Also emphasized is the importance of understanding family, communication, culture, client teaching, and clinical decision making. Written by specialists in maternity nursing, Sharon Smith Murray and Emily Slone McKinney, this text reflects the latest QSEN competencies, and the accompanying Evolve website includes review questions to prepare you for the NCLEX® exam! Nursing Care Plans help you apply the nursing process to clinical situations. Procedure boxes provide clear instructions for performing common maternity skills, with rationales for each step. UNIQUE! Therapeutic Communications boxes present realistic nurse-patient dialogues, identifying communication techniques and showing to respond when encountering communication blocks. Communication Cues offer tips for interpreting patients' and families' verbal and nonverbal communication. Critical Thinking exercises focus on clinical situations designed to test your skills in prioritizing and critical thinking. Updated drug guides list important indications, adverse reactions, and nursing considerations for the most commonly used medications. Check Your Reading helps you assess your mastery of key content. Critical to Remember boxes highlight and summarize need-to-know information. Want to Know boxes provide guidelines for successful client education. Glossary provides definitions of all key terms. NEW! Safety Alerts help you develop competencies related to QSEN and safe nursing practice. NEW! Unfolding case studies help you apply what you've learned to practice. UPDATED Evidence-Based Practice boxes highlight the latest research and the most current QSEN (Quality and Safety Education for Nurses) practice guidelines for quality care. UPDATED content includes the late preterm infant, fetal heart rate pattern identification, obesity in the pregnant woman, and the QSEN competencies.

Maternal-Newborn Nursing Elsevier Health Sciences

Completely updated content matches the textbook and provides a comprehensive review of essential maternal-child concepts and skills.

Maternal-Newborn Nursing Springer Publishing Company

An outline-format, inexpensive, paperback review book for undergraduate nursing students that can be used for course or subject review or NCLEX preparation. Contains NCLEX-style review questions in each chapter, a comprehensive exam, and additional questions on a back-of-book CD-ROM. This edition includes new NCLEX-style innovative item questions.

Disease Control Priorities, Third Edition (Volume 2) Addison Wesley Publishing Company

The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk.

Maternal-Child Nursing Elsevier Health Sciences

Leave the self-doubt behind — get fully grounded in effective perinatal care, with *Perinatal Nursing*, 5th Edition, an official publication of the Association of Women's Health, Obstetric and Neonatal Nurses (AWHONN). This freshly updated, comprehensive resource offers expert guidelines and best practices for the full range of patient care issues, from cultural practices and pregnancy complications to newborn assessments and nutrition. Stay current with this must-have, evidence-based support for both perinatal and labor and delivery nursing. 5 Star Praise for the Previous Edition! "My boss recommended this book, and I am glad she did. It is very comprehensive, up to date on the latest practices, and explains very much the "why?" we do certain things the way we do in L&D units. Pretty much explains you what the standard of care is across the board. Some of my experienced nurses also found it very useful as a refresher and ended up buying it as well. Worth the investment." "I can see myself referring to this book often in my career." "A must have for Mother/Baby Nurses. I think L&D RN's would benefit a lot too. I got it for the RN MNN RNC exam and so far it has been great for resource and up to date standard of care information.. good investment."

Maternal-Newborn Nursing Elsevier Health Sciences

Master the essentials of maternity and pediatric nursing with this comprehensive, all-in-one text! *Maternal Child Nursing Care*, 7th Edition covers the issues and concerns of women during their childbearing years and children during their developing years. It uses a family-centered, problem-solving approach to patient care, with guidelines supported by evidence-based practice. New to this edition is an emphasis on clinical judgment skills and a new chapter on children with integumentary dysfunction. Written by a team of experts led by Shannon E. Perry and Marilyn J. Hockenberry, this book provides the accurate information you need to succeed in the classroom, the clinical setting, and on the Next Generation NCLEX-RN® examination. Focus on the family throughout the text emphasizes the influence of the entire family in health and illness. Expert authors of the market-leading maternity and pediatric nursing textbooks combine to ensure delivery of the most accurate, up-to-date content. Information on victims of sexual abuse as parents and human trafficking helps prepare students to handle these delicate issues. Nursing Alerts highlight critical information that

could lead to deteriorating or emergency situations. Guidelines boxes outline nursing procedures in an easy-to-follow format. Evidence-Based Practice boxes include findings from recent clinical studies. Emergency Treatment boxes describe the signs and symptoms of emergency situations and provide step-by-step interventions. Atraumatic Care boxes teach students how to manage pain and provide competent care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, provide resources and guidance, and illustrate nursing care in a variety of settings. Patient Teaching boxes highlight important information nurses need to communicate to patients and families. Cultural Considerations boxes describe beliefs and practices relating to pregnancy, labor and birth, parenting, and women's health. Family-Centered Care boxes draw attention to the needs or concerns of families that students should consider to provide family-centered care.

Maternal - Newborn Nursing F.A. Davis

A streamlined approach covers the fundamentals of maternity nursing! *Maternity Nursing*, 8th Edition focuses on the care of women during the childbearing years. Designed to meet the needs of today's students, the book offers a clear, readable style and a concise, focused presentation. It integrates an understanding of family, culture, and health promotion into the continuum of care, and coverage of community-based care emphasizes nursing care in many different settings. Not only does *Maternity Nursing* focus on childbearing issues and concerns, including care of the newborn, but it also addresses wellness promotion and the management of common women's health problems. The Evolve companion website includes useful study tools, including medical animations, video clips, a care plan builder, and NCLEX® exam-style review questions. A companion Evolve website includes student resources such as NCLEX® exam-style review questions, audio chapter summaries, a care plan builder, nursing skills, interactive case studies, video clips and animations, anatomy reviews, and an audio glossary with Spanish pronunciations. Unique! Nursing Alerts highlight critical information in providing care. Unique! Emergency boxes provide step-by-step procedures for pediatric and maternity emergencies. Unique! Cultural Considerations boxes discuss customs and beliefs of different cultures that may affect care for patients and families. Unique! Community Activity boxes provide maternal and newborn exercises to enhance care in local community settings. Unique! Nursing Process boxes identify information on major diseases and conditions. Patient Instructions for Self-Management boxes highlight the information nurses need to communicate to patients and families. Critical Thinking exercises are based on case studies of real-life situations. Coverage of nursing care management uses a framework of the five steps of the

nursing process as well as a focus on collaborative care. Nursing care plans include specific guidelines and rationales for interventions.
