Revolution: The Reagan Legacy Rowman & Littlefield

Architecturally imposing, historically rich, and socially important, Chicago's magnificent grand hotels have fascinated generations of Chicagoans and have pleased generations of guests. The Palmer House Hilton, The Drake, and The Hilton Chicago have come to represent a collective formal living room for Chicago, where the city's most important visitors are accommodated, entertained, and made aware of the grandeur and sophistication of their host's hometown. They were built to inspire awe—and still do for anyone fortunate enough to find themselves in the lobby of The Palmer House Hilton, The Palm Court of The Drake, or the Grand Ballroom of The Hilton Chicago. Many of the most famous locales in these classic structures have been transformed or have disappeared altogether due to changing times. Gone, for example, is The Hilton Chicago's famous rooftop miniature golf course and Boulevard Room supper club, complete with its ice shows. Gone, too, is The Drake's legendary supper club, the Camellia House. While the Empire Room of The Palmer House Hilton continues to exist as a function room, it no longer reverberates with the sound of Liberace's piano or Jimmy Durante's vocals, as it did when it was the city's premier entertainment facility. Chicago's Grand Hotels chronicles over 100 years of Chicago hotel history through vivid photographs and memorabilia from the archives of The Palmer House Hilton, The

Drake, and The Hilton Chicago. It tells the compelling story of the visionary architects and hoteliers who brought these hotels to life and made them structural testaments to the warmth of midwestern hospitality.

This book examines one of the most important economic outcomes in American history—the breakdown of the Keynesian Revolution. Drawing on economic literature, the memoirs of economists and politicians, and the popular press, Eric Crouse examines how economic decline in the 1970s precipitated a political revolution. Keynesian thought flourished through the presidencies of Lyndon B. Johnson, Richard Nixon, and Gerald Ford, until stagflation devastated American workers and Jimmy Carter's economic policies faltered, setting the stage for the 1980 presidential campaign. Tracking years of shifting public opinion and colorful debate between free-market and Keynesian economists, this book illuminates a neglected era of American economic history and shows how Ronald Reagan harnessed a vision of small government and personal freedom that transformed the American political landscape.

"Built to Last: 100+ Year-Old Hotels East of the Mississippi" is a sequel to my 2011 book, "Built To Last: 100+ Year-Old Hotels in New York". It has 86 chapters, one for each century-old hotel (of 50 rooms or more) east of the Mississippi River and each is illustrated by an antique postcard. The Foreword was written by Joseph McInerney, CHA, President of the American Hotel & Lodging Association. The book has been accepted for promotion, distribution and sale by the American Hotel & Lodging Educational Institute. My research into the histories of these hotels turned up fascinating stories about single-minded developers, brilliant and accidental architects, dedicated owners, famous and infamous guests and even the story of an underground bunker-shelter the size of two football fields built under a hotel to house the U.S. Government in the event of a nuclear war.

Ever since Chicago's 1873 World's Columbian Exposition, the city has been welcoming visitors with unparalleled gusto. Chicago offers delicious cuisine, great sports teams, inviting museums, elegant shopping, diverse neighborhoods--and some of the most opulent hotels in the country. A Chicago Tradition: Hotels and Hospitality is a tour of The Palmer House, The Drake, The Stevens, and one of the town's newest hotels, The Peninsula, and its restaurants. The Palmer House was built in 1871, only to burn down thirteen days later in the Great Fire. Two years later it was rebuilt as America's first fully fireproofed hotel, and the first hotel in Chicago to have electric lights. Every room had a phone, and elevators were considered a "perpendicular railroad." The Palmer House makes one of the best chocolate fudge brownies going. The Drake burst on the scene on December 31, 1920, as a magnificent resort hotel, right on Lake Michigan, and for years attracted top celebrities to its Gold Coast Room. The famous Cape Cod restaurant is known for its Bookbinder Soup. The Stevens, now the Hilton Chicago, opened in May 1927, with 3,000 rooms with baths, an in-house hospital, a five-lane bowling alley, a private library, and a host of other amenities unusual for the time. Renovated in 1984, it is a delightful fusion of historic luxury and

contemporary amenities, including its Baked Alaska. The Peninsula opened in 2001 and is already rated the number one hotel in America by Zagat's. This glamorous, lavish sanctuary offers a \$485,000 weekend for couples, along with delicious tomato soup. Joan Greene presents many more historical details and asides, providing a wonderful accompaniment to the images- and recipes-of four gracious, inviting, and grand hotels in America's heartland. The Chicago Cultural Center Foundation. 64 pages with Smyth-sewn casebound binding and jacket. Size: 5 3/4 x 6 5/8 in. Includes 41 black-and-white and color historic and contemporary images; and 4 recipes.

Over the past century, luxury has been increasingly celebrated in the sense that it is no longer a privilege (or attitude) of the European elite or America's leisure class. It has become more ubiquitous and now, practically everyone can experience luxury, even luxury in architecture. Focusing on various contexts within Western Europe, Latin America and the United States, this book traces the myths and application of luxury within architecture, interiors and designed landscapes. Spanning from antiquity to the modern era, it sets out six historical categories of luxury - Sybaritic, Lucullan, architectural excess, rustic, neoEuropean and modern - and relates these to the built and unbuilt environment, taking different cultural contexts and historical periods into consideration. It studies some of the ethical questions raised by the nature of luxury in architecture and discusses whether architectural luxury is an unqualified benefit or something which should only be present within strict limits. The author argues how the ideas of permissible and impermissible luxury have informed

architecture and how these notions of ethical approval have changed from one context to another. Providing voluptuous settings for the nobles and the leisure class, luxury took the form of not only grand palaces, but also follies, country and suburban houses, private or public entertainment venues and ornate skyscrapers with fast lifts. The Architecture of Luxury proposes that in Western societies the growth of the leisure classes and their desire for various settings for pleasure resulted in a constantly increasing level of 'luxury' sought within everyday architecture.
